## 40 Years of Power

It's incredible seeing the progress of portable power. Lithium-based batteries are now exceptionally affordable, replacing the much heavier Lead-acid in many applications.

40-years ago, devices with built-in rechargeable batteries were virtually non-existent in consumer electronics. Now, however, recharging is commonplace.

Regardless of the battery however, quality matters. We know what differentiates a good battery from a great one. We'll continue to source quality power products and accessories.

**BATTERY CHARGERS**

### 100W Canvas Blanket Solar Panel

Keeps your battery supported Brass Monkey fridge/freezer running for the entire trip without the need for mains power or a noisy generator. Simply lay the blanket in full sunlight on the ground, across the car bonnet or similar flat surface, and plug it directly into the fridge via the DC jack. Small loops around the blanket enable you to secure the blanket to avoid it being blown away in strong wind. When not in use, the blanket folds away flat for easy storage.

- 5m cable

# Compact & Convenient SINGLE-ZONE FRIDGE / FREEZERS

WITH THREE YEAR WARRANTY

Compact models with a single compartment that keeps food frozen or drinks ice cold for day trips or weekends.

- 12V /24V powered
- In-car power lead included

9L - 12 Cans  
GH1627

A great range of compact models to keep drinks ice cold on a day trip or food frozen for that weekend getaway, without the need for ice. The range even includes models small enough to fit on the back seat of a car or centre console of a 4WD.

Qi  
charging

3  
YEAR  
WARRANTY

Fits on a  
back seat

## 9L Compact

A great compact fridge with just enough space to keep your food and drinks cold for day trips and light-packed weekends. Small enough to fit on the back seat.

- -20°C to 10°C
- Comes with 12/24V power lead; 240VAC adaptor sold separately.

Fits in your  
centre console

## 8L Centre Console Fridge with Qi Wireless Charger

This feature-packed fridge is designed to replace the factory centre console in a large 4x4. With a soft leather-looking material lid for those of you who like to rest an arm on the centre console, and brilliant wireless phone charger (for devices with Qi Charging), you'll love this addition to your vehicle.

- -18°C to 5°C
- Comes with 12/24V power lead; 240VAC adaptor sold separately.

**Built-in battery compartment**  
(Removable Lithium battery sold separately)

## 8L - 18L Compact with Carry Handle

Designed for alfresco dining, a picnic, boat trip or a day trip to the beach. The 18L units have been especially designed to allow you to bring up to 4 bottles standing up to your party. You may, for example, want to open a wine beforehand to let it breathe. They're tall, with a two-tone colour scheme which adds to a very stylish presentation. You can chill down your wine and due to the insulation safely carry your wine to its destination without further 12V power. Or, if you are in for a long day in the sun, you can keep the compressor running with the optional 12V rechargeable battery. There is even a solar recharge option.

- -20°C to 10°C
- Comes with 12/24V power lead. 240VAC adaptor sold separately.

# Low-Profile Design

## 75L - 115L Portable Dual Zone Fridge / Freezers

These low-profile units are designed to easily fit into the back of a vehicle or boat and make accessing the contents easier thanks to their shallow design. Made from durable hard plastic, the dual zone allows you to refrigerate and freeze at the same time. The lid is split in two, so you only need to open the section you're grabbing items from, further helping reduce energy consumption and keep your contest cool. They are battery supported and solar ready for continuous operation\*.

- -20°C to 10°C
- Comes with 12/24V power lead and 240VAC adaptor.

# Stand-Up 12/24VDC Fridge/Freezers

## 95L-138L Upright Fridges with Freezer Zone

These Brass Monkey stand up fridges features a slimline design that not only allows it to fit through an entrance door, but also provides more flexibility in your kitchen. These fridges are not comparable to your traditional 240V fridges, they are on the same playing field as other camping fridges but at a far sharper price point. This compressor refrigerator can run on 12 or 24 volts. These fridges are powered by a super efficient LG compressor providing excellent cooling in all conditions, and features quiet operation making it ideal for use in your caravan, motorhome or boat.

- Crisper drawer
- 3 Height adjustable safety shelves
- 12/24VDC cigarette plug with merit socket adaptor
- High insulation rating allowing the freezer to go to below -18°C and fridge 0°C ~ 5°C
- Quick freezing function allows the retaining of natural flavour and nutritional value in fresh foods when frozen
- Metal door to withstand any tough camping and motorhome use
- -18° to +5°C

GH1660: Single door with internal ice compartment

GH1662: 2 Door (separate freezer). 3 Height adjustable safety shelves in fridge and 1 fixed position shelf in freezer

Removable Freezer Section

## 65L Caravan Fridge with Freezer Zone

These units are designed to fit into refrigerator recesses in popular caravans and motor homes but can also be used as a free-standing fridge. They have an ingenious removable freezer section that gives you more fridge space when you need it, and they offer exceptional value compared to similar fridges on the market. The compressor can run on 12 or 24 volts and is powered by a super efficient LG compressor providing excellent cooling in all conditions. Super quiet operation makes them ideal for use in your caravan, motorhome or even a boat. You can even monitor and control the temperature remotely via the Bluetooth™ app.

- Removable freezer section for added versatility
- Crisper drawer
- Hardwired 12/24V power
- Robust single metal door
- LED internal light
- -18°C to 5°C

## 12V Portable Ice Maker

Always have enough ice cubes for a cold drink with this ice maker. It can produce ice cubes in less than 7 minutes and features a compact design with carry handle for portability. Touch control panel with snowflake motif makes it simple to choose different running modes with different colours. Simply fill the reservoir with water and choose the ice cube size.

- Quiet Operation
- 2 Ice Cube Sizes
- Compressor Cooling
- Removeable Ice Basket
- Comes with 12/24V power lead; 240VAC adaptor sold separately.

## Lithium

### Lithium Iron Phosphate (LiFePO4) Batteries

LiFePO4 batteries are the most significant development in large commercial battery storage technology since Nickel Cadmium technology over 50 years ago. You may know that Nickel Cadmium technology is largely obsolete.

This year we have extended our range of Lithium (let's just shorten the term for convenience) 12V batteries from 7Ah to 200Ah. (See table below.)

They are very different internally from conventional lead acid batteries. They are actually made up of many Lithium cells controlled by a battery management system (known as BMS) that ensures that each cell is uniformly charged and discharged. A lead acid battery is "dumb." It has no battery management system and this is one of the main reasons why Lithium batteries have far longer life.

Also, lead acid batteries are not short circuit protected. Under a severe short circuit a lead acid battery can very rapidly heat up to the point where the sulphuric acid boils and the casing of the battery splits open. It's rare, but it happens. Also dangerous flammable hydrogen gas can vent to the atmosphere. Lithium batteries are protected from such short circuits.

Remember all of this when making simple price comparisons with the two battery types.

### 12.8V Lithium Deep Cycle Batteries

The next generation of power storage is here! These LiFePO4 batteries weigh less than half of their Lead Acid counterparts. They may look fairly similar to lead acid batteries, but internally they're a totally different, next generation concept. They're actually made up of regular 18650 or 26650 LiFePO4 cells, which are in mass production for many portable devices. An internal battery management system (BMS) ensures all cells are uniformly charged and discharged, as well as providing short circuit, over current, and reverse polarity protection. This provides you with a higher degree of protection than a traditional lead acid battery which is unprotected, and can discharge rapidly under short circuit conditions, causing fire and damage. The internal BMS will also limit discharge and manage cut-off voltage, to further protect the internal cells.

Absolutely perfect for high capacity portable power, and replacement of similar capacity lead acid / AGM battery.

- Much lighter than Lead Acid and AGM Batteries
- Robust LiFePO4 Cells
- Excellent life span

HELPFUL HINT

#### Notes on Charging

While the internal battery management system will take care of most charging, in order to maintain optimum operation and capacity, we recommend using a charger which is designed for LiFePO4 charging. These chargers are developed to work in the optimum method for recharging, providing longer service life.

If you're installing them as a house battery, then a DC-DC charger between your main battery system and the house batteries is also recommended, such as the MB3683 Dual Input Multi-Stage.

If you're charging from mains power, we recommend the following chargers (see page B39 for individual details)

- MB3611 4-Stage Multi-Voltage
- MB3613 9-Stage Multi-Voltage
- MB3621 Multi-Stage Charger

If you are installing them off grid we recommend upgrading your charge controller to an MPPT Charge Controller

## 6 VOLT LITHIUM

### 6.4V 4.5Ah Lithium Deep Cycle Battery

This is very similar to the 12V versions of these powerful new batteries. The internal Battery Management System (BMS) will limit discharge and manage cut-off voltage, to further protect the internal cells. This 4.5Ah model can provide continuous current up to 4.5A with peaks of 9A. Absolutely perfect for portable power, and replacement of similar capacity lead acid / AGM battery. Also often found in alarm systems, and other critical systems with backup batteries.

- Much lighter than lead acid and AGM
- Robust LiFePO4 Cells

## 12 VOLT LITHIUM

### 12.8V 100Ah Lithium Slimline Deep Cycle Battery with Metal Case

This battery comes in a sturdy mild steel black powder coated case with mounting flanges. It measures a compact 360 long x 180w (excluding flanges) x 115h. It has strong metal handle on the long side above battery display. Including steel box it weighs 13kgs - quite light for a 100Ah battery. On the end of one long side are 2 x flush mount 50A Anderson® sockets and on the other side there is 1 x flush mount 120A Anderson® socket. On the top of the case is a battery capacity voltage display that measures 60x40mm (back lit.) Because of the low profile of this unit, it will fit neatly behind the driver/passenger seat in a car 4WD/RV. Indeed you could put one behind each seat for 200Ah. The Anderson® connectors guarantee a neat wiring installation with no exposed electrical terminals. It could easily fit somewhere in a box-type camping trailer or even a small boat under a seat.

## 24 VOLT LITHIUM

### 25.6V 100Ah Lithium Deep Cycle Battery

At last! A genuine 24V fully self-contained house battery. It will deliver up to 200 Amps for 10 seconds (no more, it is not a starter battery) but it is far happier supplying up to 50 Amps continuously. This makes it ideal for powering 24V trolling motors such as the popular Minn-Kota. No longer will you need to lug 2 x 12V lead acid batteries to do the job! At 24kgs it weighs less than half of lead acid equivalents - if you can find a 24V one. Indeed, weight savings (and space savings) are really even greater. It is also great for running a camp air conditioner. It has a guaranteed life cycle of 2000 charges and features the following:

- Inbuilt power meter which reads voltage, current draw, remaining capacity etc.
- Low voltage cut off
- 2 x Rope carrying handles
- 2 x 8.0mm screw down terminals with washers

Check store for availability as we expect these batteries to be in high demand.

## DEEP-CYCLE BATTERIES

### 12V Deep Cycle AGM Batteries

This product has an absorbent glass mat (AGM) embedded in the structure of the plates. (There are 6 sets of plates, each 2.0V which makes up a "battery" of plates, i.e. 12V). The mat does two things. It reinforces the lead frame of each plate, or cell, and it stops the plates from buckling under heavy discharge current. By helping make the innards of the battery virtually solid, you can mount it in any position, but it is still preferable, of course, to mount the battery upright, even for the sake of convenience of terminal access. They are an excellent product.

*Note: It is important to not discharge an AGM more than 60% between recharge.*

*Note: 150Ah and 200Ah not stocked in all stores but can be ordered.*

### 12V Deep Cycle Gel Cell SLA Batteries

These genuine deep-cycle batteries add to our already substantial range of batteries. As with all gel cells, they can be operated and charged in any position, are leakproof and completely sealed.

Gel batteries are ideal for solar power, camping, 4WD, auxiliary applications and anywhere deep discharge and recovery is required.

## BATTERY MANAGEMENT

### Lead-Acid Battery Conditioner

Removes or reduces sulphation which kills batteries. When wet-cell lead-acid batteries are allowed to sit around they will sulphate up in as short a time as 6 months. The sulphate builds up on the plates and separators. This product basically dissolves the sulphation. The product is so good that the manufacturer will extend the warranty on a new battery by a year if used when the battery is new.

- One bottle will do up to an N70Z size battery (4WD, boat, truck etc.)
- Will not work with sealed batteries. i.e. you must be able to access the battery fluid to use.

## Tech talk

### Battery Maintenance

Periodic inspection of the battery is recommended. If the battery is stored for over six months, it is recommended to charge and discharge the battery several times to recover the battery capacity, failure to do so may result in a loss of capacity and shorter battery life. Bear in mind that self-discharge has to be taken into consideration when storing a charged battery. The remaining battery capacity should be at least 50% after a month of storage at room temperature for a fully charged battery. High storage temperatures will accelerate the self-discharge, and reduce the remaining capacity.

## Battery Box with Voltmeter Dual USB Charger &amp; Dual Anderson® Plugs

This portable 12V battery box has all the common connections you would typically need for your outdoor recreation power needs. The box with carry handles is capable of holding a deep cycle battery up to 100Ah (sold separately), which secures in place with the supplied webbing strap. High current power connectors include two 50A Anderson®, insulated bolt terminals (wing nut), and a 12V cigarette lighter socket with over current protection. There is also a dual-port USB to charge your Smartphone and similar USB devices, and a voltmeter to help monitor the battery level.

- Suits batteries up to 100Ah
- Dual 50A Anderson® Plugs
- 12V Cigarette Socket
- Dual USB Ports
- LED Voltmeter
- Circuit Breaker Switch

Specifications	HB8504
Suits Battery Size	100Ah
Circuit Breaker	16A
USB Sockets	5VDC 1A, 5VDC 2.1A
Cigarette Sockets	12VDC, 20A

## Battery Box with Voltmeter &amp; USB Charge

Simply fit your 100Ah deep cycle battery into the box, connect up the positive and negative wires, and you are ready to go. Features an LED voltmeter to help monitor battery level, two high current marine grade cigarette power sockets, two USB sockets, and high current bolt terminals to connect your higher current loads such as an inverter. Over current protection included for the cigarette sockets.

Specifications	HB8502
Suits Battery Size	100Ah

## DC Control Box for External Battery

This Powertech explorer control box is so feature packed you will need to see it for yourself to truly understand its full potential. It has you covered for all your 12volt needs in a sturdy plastic package. It's durable but easy-to-work nylon case makes it a breeze to add any extra items that will fit in the space available. It doesn't just stop at what you can see, to further simplify things, most of the internal wiring uses simple push-on 6mm spade connectors. The case is sleek measuring at 355x180x138mm (includes height of fuse block), so you simply need to find a spot to mount it using the supplied mounting hardware.

- Supplied wire gauges: 10AWG and 14AWG Standard Fittings (feel free to add other items from our extensive range).
- Built-in weatherproof 6 way Fuse block (100A total max) with individual fuses for each outlet (supplied with 1 x 5A, 3 x 15A, 1 x 20A, 2 x 30A Blade-type fuses)
- 3 x weatherproof cigarette-lighter type 20 Amp DC sockets
- 6 x 20A On-Off power switches, blue LED indicators (3 connections)
- Blue LED Digital Voltage monitor (range 6V to 30V)
- Dual Port USB socket with 1A and 2.1A outputs
- 2 x 50A Anderson Connectors for handy solar and battery connection
- 2 x 4-way internal Bus Bars for more connections (150A 32V DC max)
- 2 x Grommets holes for fixed power cable entry connectors.

## BATTERY TESTER

### 12VDC Lead Acid Battery Tester

This battery tester quickly, easily, and accurately measures the actual cold cranking amps capability of the vehicle starting battery. It tests most automotive cranking lead acid batteries, including an ordinary lead acid battery, AGM flat plate battery, AGM spiral battery, and GEL battery, etc. It can identify a battery with bad cells, has reverse polarity protection, and meets major battery testing standards such as CCA, BCI, CA, MCA, JIS, DIN, IEC, EN, SAE, GB. The handy device features an LCD display to indicate the results, a menu tab and clips to connect the battery tester to the vehicle's battery.

- Voltage Measure Range: 6-30VDC
- Dimensions: 125(L) x 70(W) x 25(H)mm

Note: Battery not included.

### 12-24V Battery Tester

A simple to use battery tester to check charge condition. Simply connect and read. Includes three different connector methods - battery clamps, eye terminals, and cigarette lighter socket. Suitable for 12 and 24V car batteries, sealed lead acid batteries, and other high-capacity batteries. Provides voltage reading as well as LED indication for under/overcharge. Reverse polarity protected. Note: cigarette lighter socket testing method may only be available with ignition on.

- Versatile connections
- Under / overcharge indication

## POWER METERS

### High Precision 200A DC Watt Meter Power Analyser with LCD Display

This exceptional trouble shooting device is not just a watt meter it is an all-in-one power meter, volt meter, amp-hour meter, ammeter and energy meter. It's designed for systems less than 60V and currents up to 200A (Peak). Slotting in between various links of a power system it can check charge going to a battery from battery charger or alternator, solar panel output, charge controller output, health and performance of batteries, evaluate charging efficiency or measure power and energy consumption of any load device with a battery. The Watt Meter only requires a tiny 7mA draw to operate making little difference to power production during usage. Ideal for cars, boats, caravans, off-grid installations, wind, solar installations, and so much more.

### DC Power Meter 6.5-100V with Built-in Shunt & LCD Display

Exceptionally handy for keeping an eye on your solar installation, generator, battery banks, and more. Totally self-contained, so wiring is a breeze, and it's powered from the DC power you're monitoring. Suitable for solar systems up to approximately 2kW or 10kW. Provides details on power, voltage, and current, as well as aggregation of power throughput (which can mean generation or usage depending on your installation) with an easy reset function. Bright blue backlit display provides easy reading in any lighting conditions.

## BATTERY MANAGEMENT

### Car Battery Discharge Protector

This handy device plugs straight into your vehicle cigarette lighter socket, and warns you when battery power is running low. Not only that, but it disconnects power through the unit when power gets too low. This means you can run 12V lighting, an inverter or charger etc, and not risk draining your battery such that it causes damage. Simple plug and play operation, no tools required!

- Low battery level indication
- Automatic power disconnection
- Cigarette lighter connection
- 10A circuit protection Fuse

### 12V Battery Low Voltage Monitor and Protector 10A

Now you don't need any installation to protect your battery. This inline device connects with a cigarette lighter plug and socket, and automatically shuts off power to the connected device (such as a fridge or lighting) if the voltage drops below 11.6V! Power is automatically restored when voltage exceeds 12.8V (eg. the vehicle engine is started). It's simple piece of mind when running power-hungry equipment at a campsite, for instance. Suitable for loads up to 10A.

- Protects battery from excessive discharge
- Power status indicator
- No installation required

### Battery Discharge Protector

Protects your car battery from total discharge by switching off appliances such as fridges and TV sets before the battery voltage drops to an unrecoverable level. When battery voltage is re-established by recharging, it switches appliances on automatically. The interrupting voltage is adjustable from 10.4VDC to 13.3VDC. Essential low-cost insurance if you have a dual battery setup in a boat, 4WD, RV or for an alternative energy system such as solar or wind power.

### Top Post Knife-Blade Style Battery Isolator Switch 250A

This handy isolator switch can serve many purposes. Firstly, it can help avoid battery drain on an idle vehicle or boat that is in storage or only gets occasional use. It can help discourage theft, and also provides an easy way to disconnect power to prevent shorts and fires when you are working on the electrical system. The switch fits directly over the battery's negative post, and has a knife-blade that enables you to disconnect power without any tools. Suits either 12V or 24V systems and is rated to handle 250A continuously and a cranking current up to 750A.

- Red copper and brass with anti-fire nylon construction

Warning: This switch is only to be assembled on top of the NEGATIVE post of battery, under NO circumstances is this to be connected to POSITIVE post of battery.

## BATTERY DISCONNECTS & ACCESSORIES

### Battery Isolation Switches

High current rated battery isolation switches for high power applications. Often fitted to boats, trucks, motor homes and other battery based power systems to allow for quick and easy electrical isolation of the battery for protection against discharge, fire and other safety risks. Each switch features high quality construction with large bolt-down terminals for electrical connection.

### Battery Isolator Switches with AFD

Very durable and rated for massive output. They feature removable windows on all four sides to cater for whatever cabling arrangement you have. Alternator Field Disconnect (AFD) protects your alternator when switching batteries in and out of the circuit. By disconnecting the alternator moments before the battery (moments after when re-engaging), there's always a load on the alternator to protect the regulation circuitry.

### Dual Battery Isolator (VSR)

A voltage sensitive relay (VSR) is the best way to ensure you can always get your dual-battery vehicle started. If the radio stops working that's one thing, but if you're stranded because your car cannot start because you ran your fridge for too long, that's potentially a life and death scenario. It allows two batteries to be charged from your alternator. Once your main starter battery is sufficiently charged, it will begin charging the second battery too. Fully automatic with emergency override.

### 12V 140A Dual Battery Isolator Kit with Wiring

Adding a second battery in your vehicle or boat enables you to power your electrics without flattening your main starter battery when the engine is off. Applications include, for example, 4WD's with a 12V fridge/freezer, a boat with bright cabin lighting, or say a tradesperson's van or ute with an inverter powering various power tools. This Voltage Sensitive Relay (VSR) kit provides everything you need to wire up your second battery, while handling the isolation during shut-off periods. It is provided with marine-grade hardware so it can be used on a boat or vehicle. Suitable for 12V systems with a continuous rating of 140A. All wiring hardware and instructions included.

Note: additional black (negative) wire may be required for systems without chassis earth, such as fibreglass boats, depending on your installation.

## Assembling Anderson® Style Connectors

These connectors come with absolutely no assembly instructions which might surprise some. Assembly is self-evident however.

All that you really have to do is solder-sweat the heavy gauge wire into the 'pot' on the end of the connector tip. It is a good idea to puddle some solder into the pot and then lower the tinned wire into the pot. It may be necessary to apply some more heat (usually with a small gas torch or stove gas top) to get the whole lot to melt. Try to keep the joint immobile until the solder 'sets', then cool off under tap water. And of course you can always crimp the lead into the solder cup, but this should really be done professionally. A piece of heat shrink ties the job nicely. The wire/lug/contact then just snaps into the housing. Look for our Anderson® terminal crimping tool on page B23.

## ANDERSON® TYPE HIGH CURRENT CONNECTORS

These connectors first appeared on electric forklift trucks. They proved to be so useful, reliable and versatile the original type grew to be a family of connectors of various current carrying capacities. The applications have grown considerably and now you commonly see them in RV, caravan and other off-road vehicle, and of course in marine applications. They were originally made by a company called Anderson® and indeed this name has become the generic description for the type. Jaycar carries a very large range of Anderson®-type connectors for every time high current needs to be reliably coupled together.

## 50A Anderson® Connectors

This is the most popular standard Anderson® unit. It supports the greatest range of variations. It is very commonly used in marine, 4WD and caravanning applications. Supplied as a moulded grey body with identical positive and negative contacts. Inserting the contacts in the body automatically polarises the connector (Cable entry contacts do not change overall connector body size).

## Anderson® 35A SBS Mini Connectors

These compact mini connectors can handle up to 600 volts continuous in AC or DC with current up to 35A. The mechanical and colour coded keys protect against accidental cross mating of connectors. The genderless housing makes for easy assembly in the factory or the field. The touchsafe housing prevents accidental exposure to live circuits and these also have the ability to disconnect under load. Supplied as a moulded 2 pole with contacts.

## Anderson® Powerpole Series 4 Pin Data Connector

A genderless 4 pole signal Anderson® connector in a PP15 casing. The design allows you to stack this with the PP15 series 15A Anderson® connector (PT4402) for DC and signal wiring connectivity. It provides a secure quick disconnect for power and signal distribution systems.

- Voltage: 300V
- Current Rating: 7A
- Up to 24 gauge for signal wire connectivity.
- Dimensions: 25(L) x 8(W) x 8(H)mm

### 4 Way 15A Anderson® Connectors

These are the high impact and corrosion-resistant black thermoplastic outer shells with a 4 way 15A Anderson® multi-connectors. They allow easy connection and disconnection for the electrical equipment in commercial and industrial applications. The cable clamps provide strain relief and the integral latches to prevent any accidental disconnections of your equipment. The positive latching provide security in applications where shock or vibration may be severe and the integral strain relief reduces the risk of wire breakage.

## EXTENDED VERSATILITY ANDERSON® HARDWARE

This range enables you to panel mount or waterproof your Anderson® plugs. Something you haven't been able to do in the past.

### Chassis Mount Anderson® Adaptors

Black or red cover assemblies with locking device and UV insulated protection to suit Anderson® and Anderson® style connectors. Used for protection of power connectors in mobile environments. The intelligent design ensures a safe and reliable connection for towing, battery charging, marine & industrial OEM applications.

- Heavy duty materials for protection from the elements
- Compatible with most power connector brands
- Unique locking tab for secure connections
- Power connector snap fits into the cover
- Retractable access cover
- Heavy duty PA nylon construction

### Splashproof Anderson® Connector Boots

These soft shell boots provide water, dirt, chemical and UV protection for the high current Anderson® connectors. The durable boots shield the connectors from water and dirt to IP64 when connected or by itself when the integral cover is used. The terminals of the rubber boot can also be customised to fit cables in-between 12-6 AWG (4-16mm<sup>2</sup>) wires.

- IP64 protection
- Resistant to UV, Roadway Chemical and Ozone
- Splash resistant when connected & by itself when the integral cover is used
- Customise boot terminals to fit different cables from 12AWG (3.3mm<sup>2</sup>) to 6AWG (13.3mm<sup>2</sup>) which is typically 4.5mm OD to about 8.5mm OD.
- Dimensions when connected: 151(H) x 55(W) x 160(L)mm

### 50A Anderson® Leads

A series of Anderson® connector leads for automotive, caravan, 4WD or industrial interconnection. The design of the Anderson® connector housing is genderless, whereby each connector simply interconnects with another so you can't plug them in the wrong way - one less thing to worry about! Each lead is pre-made with machine crimped terminations, and tinned copper cable. Connectors are rated at 50Amps, with either 8AWG cable or 16AWG cable fitted depending on the model.

### 150W Cup Power Inverter with 4.2A Dual USB Output

Mains power in your vehicle has never been so convenient! Simply slip it into a spare cup holder, and plug in to a free cigarette lighter socket. You'll then have access to 150W of mains power, and dual 2.1A USB charging outlets, to keep everything charged and running. 450W peak power provides additional performance when required too. Perfect for laptop charging and small mains powered devices. Internal cooling fan and over-temp/over-current protection.

- Convenient mounting into cup holder
- 150W continuous mains power
- 2 x 2.1A USB charging outlets

## Low Cost Modified Sinewave Inverters

The range below represents an astonishing price breakthrough for a quality, rugged, modified sine-wave unit. Modified sinewave inverters will successfully power a large range of non-critical 240V appliances (see table.) Tens of thousands of modified sine-wave inverters are in service every day. If your application is for a non-critical appliance, and ultimate efficiency.

## Inverters Application Suitability

We DO NOT recommend that you use these products to operate the following: FRIDGES, AIR COMPRESSORS, AIR CONDITIONERS. An inverter is a device which converts 12 or 24VDC into 240VAC. The 240VAC generated is as lethal as the power in homes, and should be treated with the same respect. Inverters can be easily damaged, and connecting the input voltage terminals the wrong way around on the battery can damage the unit - be careful!!

- Appliances most suitable for connection include: Most power tools, lights, most TVs, video recorders / players, most computers, fax machines and most audio equipment.
- Fluorescent lights can give a highly inductive load on start up which can damage inverters. Appliances NOT suitable include: Electric blankets, toasters, hair dryers, irons, radiators and heavy power tools (large angle grinders, circular saws etc.)

Inverters will generally drive inductive loads such as electric motors, but only if the startup current is not high. Generally high startup current situations are when the motor is permanently coupled to a load such as a refrigeration or air conditioner compressor (Imagine the compressor at rest just before top dead centre you can easily realise the start up load on the motor!). Many other motors such as in drills, small angle grinders, buffers etc. start up under virtually no load and this is usually OK for the inverter provided the tool is within the inverter rating.

It needs to be pointed out that one of the major differences between a domestic power point and inverter is that the source impedance of a power point is very low compared to the inverter. This is why inverters have trouble with appliances with high start up currents and a domestic power point does not. Another thing that must be remembered is the special case of fluorescent lights with ballast chokes in them (by far the most common type).

Manufacturers of fluoro lights assume that they are just going to be installed to a normal 240V 50Hz sine wave supply. They are required to supply a product that does not overly distort the mains waveform. They generally comply with this by installing a, say, 3.3µF non polarised capacitor across the mains/neutral supply inside the housing of the lamp fitting. This is called a power factor correction capacitor. This seems to work OK for a sine wave supply from a low source impedance.

When you drive such a device with modified sine wave 240V power, different things start to happen. The power factor correction capacitor presents a much greater load to a modified sine wave signal (which is a complex collection of high and low frequencies) than it would if it was a sine wave.

The bottom line is to reduce this capacitor to about 0.47µF or take it out completely. Inverters are generally OK then. It is also possible for an inverter to be damaged by the surges in current generated when using standard fluorescent starters. This can be prevented by replacing the starter with an electronic starter.

## Premium Modified Sine Wave Inverters:

This range is very rugged. These units come with a 2.1A USB socket as well which has proven to be very handy. They come with surge capability, overload protection and reverse polarity protection. Indeed, so confident are we of this line, we have extended the warranty from one to two years.

# Pure Sine Wave Inverters

Jaycar stocks a range of pure sine wave (3% distortion) inverters from a fantastic new factory with strong engineering qualifications. The range goes from 300W to 2000 Watt.

There has never been a true retailer anywhere in Australia with lower prices on pure sine wave inverters.

**WARNING.** Do not be fooled into comparing a modified sine wave inverter against this product. You will never get a modified unit to have up to 95% battery efficiency. Inferior units are generally 70% efficient at best. You will get far more 230/240V time out of each battery charge.

You don't have to worry whether a sinewave inverter will power your sensitive appliances. They will power anything\* including laptops, microwave ovens & Hi Fi systems etc.

The larger units have dual 230/240V power points and generally a USB power port. They all have power and battery protection too.

**Specifications common to all models:**

<b>DC Input:</b>	10-15V (or 20-30V)
<b>Low Voltage Alarm:</b>	10.5V (or 21V) or less
<b>Working Temperature:</b>	-10° to +50°C

## Which one? Modified vs. Pure Sine Wave

### MODIFIED SINE WAVE

"Modified" sine wave is a crude approximation of the 240V waveform, with square wave components in it. Many appliances are OK with this.

Typically these are:

- All incandescent lighting
- Most switchmode power supplies
- Most TVs, VCRs CD/DVD players
- Small power tools
- Fax machines
- Some audio equipment
- Computers (most)

### PURE SINE WAVE

Pure sine wave is closer to mains and those inverters are much more efficient. Most appliances work OK with the lower cost modified sine.

Pure sine wave inverters are best for:

- Electric clocks
- Sensitive equipment
- Electronic weighing machines
- Mains powered PA equipment
- All other TVs
- Plug pack powered equipment
- Anything where you want to get the most out of a battery charge

### Remote Control for Sinewave Inverters

This On/Off remote control comes with a 6 metre cable and is compatible with select Powertech Inverters. It has an LED On/Off indicator and has an ultra-compact design that can be flush mounted for professional installations.

## WIND TURBINE GENERATORS

When solar panels started to come down in price, wind turbine generators ceased to remain competitive! Wind turbines, however, are still a great option where you need a lot of generating power and don't have room for large solar arrays. Indeed, the two generators below are cheap compared to large solar panel arrays. They are very rugged and made to marine salt water corrosion resistance Specifications and will last a long time.

Both units are warranted for 3 years from faulty materials or workmanship.

Mounting mast and guying hardware available separately.

## SOLAR POWERED

## 10W Solar Mobile Charger with USB Output &amp; 1m Lead

Designed to keep your smartphone, tablet, and other USB charged gadgets running for longer when you're on the go, camping, or away from mains power. The lightweight and flexible charger includes two thin mono-crystalline silicon solar panels to provide up to almost 2A at 5V in full sun.

This means you should be able to charge most phones in less than 4 hours in full sun. It is water resistant, easy to clean, and measures 349 x 265mm when open and 265 x 175mm folded for compact stowage. The mounting holes allow you to conveniently tie it onto a backpack, tent, etc. Supplied with a 1m USB lead.

## 12V Battery Solar Trickle Charger 1.5W

Perfect for keeping your boat, classic car, tractor, or any other infrequently used vehicle battery topped up. It includes battery clips and a cigarette lighter socket for simple connection, which a discharge diode prevents any drain on your battery at night. Provides up to 1.5W charging power, which is plenty to prevent idle discharge of your expensive vehicle battery.

- Ideal for maintaining the battery of an infrequently used vehicle
- Cigarette lighter / battery clip option

## Solar Success - Complete Guide to Home &amp; Property Systems

A complete guide for home and remote property systems, this book is about using solar energy to reduce the fossil fuel generated electricity that produces our carbon footprint. This can be done by three essential and economically viable approaches: reduce energy usage by doing things differently, reduce energy usage by using more energy-efficient appliances, and, change the supply of energy to non-fossil fuel through appropriate technology.

A pragmatic no-nonsense approach to solar energy written by acclaimed Australian author Collyn Rivers, who walks the walk by showing his self-installed solar system on his 100% solar powered

10-acre property in the Kimberley.

## Powertech Monocrystalline Solar Panels

These high performance monocrystalline solar panels are much smaller, thinner, higher in efficiency and more affordable than our previous models. The manufacturing process for this range uses pieces of 156x156mm A-grade solar cells cut into defined sizes with multiple grid lines, which provides excellent performance under low light environments. Each panel is designed to withstand harsh environmental conditions with a durable anodised aluminium frame and 3.2mm low iron tempered glass. The glass is anti-reflective and has a hydrophobic effect to resist dirt and dust, improving light absorption thereby preventing any needless power loss. The junction box and bypass diodes stops the panel from overheating and suffering from the "hot spot effect". The entire range is easier to install with minimal ongoing maintenance and compatible with industry standard inverters and mounting systems.

## PORTABLE SOLAR PANELS

### High Efficiency Monocrystalline Solar Panel Chargers

Quality solar panels with high efficiency and smaller footprint compared to our regular monocrystalline models. An easy way to keep your 12V batteries topped up and ready to go on your caravan, farm equipment, the spare car, or on the shed out the back. The dust and weather resistant panel features a robust frame, and is supplied with 3m long leads terminated with battery clips. Each version is fitted with a blocking diode, so they are suitable for direct connection to your battery as a trickle charger (take note of the minimum battery capacity), or as a low current charger to replace a load or current drain on the battery. A charge controller such as AA0348 is recommended on the 10W and 20W versions when there is not enough current drain to prevent over-charging of the battery.

## FOLDING SOLAR PANELS

## Powertech Folding Solar Panels with 5m Lead

Unfolds in seconds to provide up to 6-8.8A charging current in full sun. Integrated stands allow positioning with a premium angle to the sun. It provides a built-in charge controller and 5m lead to charge your battery without any additional hardware. When you're done, fold it back in half and pack it away. The solid aluminium frame is lightweight, yet strong. It will provide years of faithful service.

## SOLAR POWER METER

## Solar Power Meter

Installing solar panels can result in a missed opportunity if they're not positioned optimally to catch the radiation from the sun. Similarly to a TV installer using a signal meter, you can use this device to find optimum locations on a rooftop (or wherever you're installing them) to help ensure they'll be efficient and generate as much of their rated power possible for your location. Expressed as either W/m<sup>2</sup> (Watts per square metre), or BTU/ft<sup>2</sup> (British thermal units per square foot). Measurement up to 1999W/m<sup>2</sup>, or 634BTU/ft<sup>2</sup>. With data hold and high accuracy, you can get rapid readings on the huge LCD. Includes carry case.

## SEMI FLEXIBLE SOLAR PANELS

### 12V Semi Flexible Solar Panels

A lightweight and versatile monocrystalline solar panel designed for RV, marine and camping applications. The advanced DF cell technology produces high conversion efficiency up to 20%, giving much more power for a smaller footprint, compared to SP cell type panels. The DF cell, identified by its 21 bus bars, is also flexible up to 30 degrees. This means you can mount the panel on a curved surface such as a boat deck or curved rooftop on your car, caravan, boat, etc.

Thanks to its lightweight design, 2.5mm thickness, and IP65 weatherproof rating, it is perfect for portable applications as well. The mounting holes allow you to secure it using rope for temporary applications or screws for permanent mounting. The short leads with MC4 PV connectors also make it easy to disconnect when you need to pack up and stow away for transport.

A blocking diode is built into the panel to prevent discharging a battery at nighttime, but we recommend you add a solar charge regulator to charge batteries more effectively.

- Maximum recommended bending degree: 30°

## SOLAR PANEL BLANKETS

### 200W Canvas Blanket Solar Panel

Blanket solar panels are much lighter and take up less space compared to traditional fold-up solar panels. This 12V 200W solar panel weighs just 6.8kg. When not in use, it folds down to just 512mm wide by 360mm high, small enough to easily stow away in a storage cupboard. When you want to use it, simply unfold and lay on the ground or across your car's windscreen. A charge controller is included, so you can connect directly to a GEL, flooded or SLA battery without any additional hardware. The charge controller also includes a 2A USB charging outlet, perfect for charging mobile phones, tablets, and other devices in an emergency. Built with high grade monocrystalline solar panels, and safety features including short circuit, open circuit, reverse polarity, overload, and dual MOSFET reverse current protection. A carry bag is supplied with a built-in pouch for accessory storage.

- 3-stage PWM charge management
- USB 2A USB Port

### Brass Monkey 100W Canvas Blanket Solar Panel suitable for Brass Monkey Fridge/Freezer with Solar & Battery Support

With this 100W Solar Blanket, you can keep your battery supported Brass Monkey fridge/freezer running for the entire trip without the need for mains power or a noisy generator. The blanket is designed to connect directly to Brass Monkey Fridge/Freezers with a built-in Lithium battery and solar support. Simply lay the blanket in full sunlight on the ground, across the car bonnet or similar flat surface, and plug it directly into the fridge via the 2.5mm DC jack. Small loops around the blanket enable you to secure the blanket to avoid it being blown away in strong wind. When not in use, the blanket folds away flat for easy storage.

*Note: This unit does not have a voltage regulator like other solar blankets, and will only work with the Brass Monkey battery fridge/freezers.*

- 2.5mm DC jack for power connection to fridge
- 5m cable length

## Waterproof Solar Power "PV" Connectors

IP67 rated for maximum environmental protection, these photovoltaic (PV) system connectors are ideally suited to harsh installations such as solar panel arrays and other permanent outdoor applications. When matched with our solar power cables WH3121 & WH3122, you can leave your cabling out in the open with the knowledge that you will never have a bad connection or an oxidised power cable. The panel mounting & in-line connectors suit a wide range of system applications.

## SOLAR PANEL MOUNTING HARDWARE

### Ecotech Professional Solar Mounting Hardware

A universal and code compliant mounting system for attaching solar panels to the roof of your property. Designed to be used with either tiled or tin roofs, with any slope from 0-60° (either flat or pitched), and fully cyclone rated even for wind region D. The easy insertion modules mean that you don't have to slide each attachment along the rail to get it in place, they slot in quite easily at the very spot you want to attach them. For use with 35mm thick modules, a full range of components are available.

- Cyclone proof to Wind Region D (installation guide must be strictly adhered to)
- Vertical or horizontal panel mounting
- Suits any solar panel width, but optimised for 800-825mm width
- Suitable for aluminium framed panels
- 10 year materials warranty
- AS/NZS 1170 approved
- Roof slope: up to 60°
- Wind load: 80m/s
- Snow load: 1.4kNm2

### ABS Solar Panel Mounts for Caravan/Marine

Stick these heavy duty ABS plastic mounts onto your caravan or boat using Sikaflex®, and then screw your panel onto the mount. The solar panel is kept with adequate space underneath for cooling, and the curved design ensures adequate wind deflection for high winds. There are 4 different products, which can be used in any combination to suit your specific application. White in colour.

#### ABS Solar Panel Corner Mounts

A set of four corner mounts, to attach each corner of your solar panel to your desired mounting surface.

These can be used on their own for solar panels 40W or smaller.

- Dimensions: 150(L) x 150(W) x 65(H)mm
- Set of 4, Cat. HS8860

#### ABS Solar Panel Side Mounts 180mm

This pair of side mounts are intended to be attached to the long edge of taller solar panels, such as 80W and above, adding extra mounting strength and giving more wind deflection.

- Dimensions: 180(L) x 120(W) x 65(H)mm PAIR, Cat. HS8862

#### ABS Solar Panel Spoiler Mounts 510mm

Specifically designed to deflect wind on solar panel edges that face into high winds, such as the leading edge of solar panels mounted on caravan or RV rooftops. Well matched to 80W and 90W panels oriented with the short edge leading into the wind.

- Dimensions: 510(L) x 120(W) x 65(H)mm PAIR, Cat. HS8864

### Universal Individual Solar Panel Mounting Bracket

Each bracket includes a stainless steel M6 bolt and nut to attach it to the factory holes in the aluminium frame of your solar panel, meaning that no drilling or modification is required. Sold individually, so you just have to purchase the quantity that suits your panel & application.

- Recommended quantity for panels up to 40W: 4
- Recommended quantity for panels 40W-200W: 6
- Spacing from mounting surface: 22mm
- Dimensions: 80(L) x 68(W) x 35(H)mm

### ABS Solar Cable Entry Point

Usually, at some point the solar power cables need to enter into the caravan or boat and down to the battery area. To avoid making unsightly and potentially leaky cable entries, you can use this neat product and drill out your cable entry point, and then cover it over giving you two fully waterproof cable gland cable entries that look neat and purpose built.

## SOLAR REGULATORS / CHARGE CONTROLLERS

### 12V 6A Battery Charging Regulator for Solar Panels

Designed for efficiently charging 12V batteries using solar cells rated up to 6 amps. It is easy to wire up, prevents battery discharge during low sunlight and indicates charging and full battery conditions using a yellow and green 3mm LED.

- Ideal for charging 12V SLA batteries from solar panels up to 60 watts
- 6 amp fuse and fuse holder recommended - not supplied

### Miniature 12/24V 3A PWM Solar Charge Controller

This compact solar controller uses Pulse Width Modulation (PWM) to manage battery charging from a connected solar panel. It features light and timer control, similar to street lights, and three charging states (bulk, equalise, and float charging). It provides all the important safety features such as overcharge, over-discharge, over-current, short-circuit, and reverse-polarity protection.

- Red charge LED indicator
- Green power LED indicator
- Hang hook
- Battery voltage automatic identification
- PWM charging mode
- Comprehensive electronic protection

SOLAR REGULATORS / CHARGE CONTROLLERS CONTINUED**12/24V PWM Solar Charge Controllers with LED indicator & USB**

Intelligent yet lightweight, this solar controller uses Pulse Width Modulation (PWM) to control battery charging. With total autonomy, its set-and-forget operation means you can get maximum charge into your batteries from your solar installation without having to worry about those things. It provides all the important safety features such as overload, short-circuit, over-discharge, and reverse-polarity protection. A handy feature is also the USB port located on the front panel, to provide up to 1.2A charging. Very handy during power outages to keep your phone charged without any additional equipment. Charge modes include bulk, equalise, and float charging, and the unit automatically switches to the best charging mode. Suitable for sealed lead-acid, as well as Gel/flooded type cells.

- Automatic charge mode selection
- Suitable for 12V and 24V battery banks
- USB charging port on front panel

**12/24V PWM Solar Charge Controllers IP67**

A highly efficient fully automatic 12/24V PWM solar charge controller that adopts the most advanced digital technology which increases battery lifetime and improves solar system performance. With a robust industrial housing and IP67 protection this charge controller is suited to most applications especially extreme outdoor environments where corrosion, dust and water ingress are prevalent. Capable of automatically detecting day/night it comes with an inbuilt timer which can be set to operate loads at specific intervals or manually in the night.

- High efficient PWM charging
- Automatically recognises day/night
- LED indicators for PV and battery status
- Industrial design, wide application range
- Intelligent timer function with 1 to 13 hours option
- PV reverse polarity protection
- Battery overcharge, over discharge, reverse polarity & overheating protection
- Load overload and short circuit protection

**12/24V 10A Dual Battery PWM Solar Charge Controller with LED Indicator**

We have many solar battery charger controllers - up to 50A - but they only work on one battery bank. This unit will charge TWO house battery banks or one house bank and your motor start battery as well. Too often the motor start battery is forgotten if you are camped in the one spot for a long time.

- Will charge 2 completely separate battery banks at the same time
- Works with 12V or 24V systems
- Highly efficient PWM (Pulse-width modulation) charging system
- Provides up to 10A charging current (Limited by size of your solar panels)
- Electronic protection from over charging short circuit or accidental reverse battery connection

**Specifications:**

- Max solar input voltage: 30V (12V system), 55V (24V system)
- Battery input voltage range: 8-15V (12V system), 8-30V (24V system)
- Max output current (both channels): 10A
- Overnight self-consumption: 4mA
- Dimensions: 153 (W) x 76 (H) x 37 (D) mm
- Weight: 240g

Recommended solar panel to utilise output of this controller: ZM9063 160W unit.

(Note output of this controller is limited by the current output of the solar panel feeding it)

Tech talk

**Solar Charge Controllers**

Directly connecting a solar panel or array to a battery can be catastrophic as solar panels can output a wide voltage range. As an example, a nominal 12 volt rated panel can output anything up to 22 volts during an average sunny day. A solar charge controller between the panel and the battery ensures the battery receives the correct output voltage and current from the panel to minimise the risk of the battery being overcharged or discharging back into the panels. Charge controllers come in a variety of types which give different performance and can be matched to simple recreational applications all the way up to complex high power solar array installations.

**SWITCHING:**

Simple switching controllers connect the panel to the battery when the panel is providing power & the battery is not fully charged. This type of controller is low cost and only good for basic solar equipment setups such as standby lighting, etc. where the panel yield is far higher than the load requires.

**PWM:**

Pulse width modulated (PWM) controllers continually apply voltage pulses to the battery whenever the panel is providing sufficient voltage. The pulse width (or duration) is varied by the controller

depending on the charge state of the battery to ensure the correct amount of charge is harvested from the panel whenever it is available. As a result, PWM controllers provide a much higher power yield than simple switching controllers.

**MPPT:**

Maximum power point tracking (MPPT) controllers maximize power conversion between the panel output and the battery input by using a DC to DC switchmode power converter. By continuously tracking the panel output and adjusting the converter they yield the maximum amount of power under widely varying solar conditions. MPPT controllers give the best solar system efficiency and improve solar system power yield by a significant percentage.

Both PWM and MPPT controllers are available with display panels which allow you to track performance of the solar system. Panel voltage, battery voltage, charging current, and total charge supplied can be easily displayed so you can ensure the system is running correctly. More complex models also include integration functions to remotely control other equipment or be linked into advanced systems.

## SOLAR REGULATORS / CHARGE CONTROLLERS CONTINUED

### 12V/24V 30A PWM Solar Charge Controller with LCD Display for Lead Acid & Lithium batteries

This compact charger uses Pulse Width Modulation (PWM) to charge 12V or 24V lead acid (sealed, gel or flooded) or 12V Lithium battery banks. It supports 12V solar arrays up to 500W or 24VDC arrays up to 1000W. The backlit LCD screen displays real-time feedback on battery voltage, load voltage, PV voltage, time, etc. and the integrated Wi-Fi enables you to remotely access the controller using an app on your Smartphone to keep an eye on the system. An external temperature probe is also supplied to adjust the float voltage according to the temperature when charging SLA batteries. Heavy-duty screw terminals for cabling up to 10AWG. Safety features include over-voltage, low-voltage protection, reverse connection, short-circuit, over-current, and over-temperature protection.

- Backlit LCD with real-time energy stats, operational and fault message
- Temperature sensor for battery charging compensation
- 3-stage charging
- 2 programmable timers
- 2 x USB Ports

### 12/24V 30A Flush Mount PWM Solar Charge Controller with LCD Display

This flush mount solar charge controller enables you to keep an eye on your power system without having to stare at an unsightly controller cluttering your RV or boat's interior. The intelligent system features a PWM charger with bulk, boost/equalise, and float modes to keep your Lead Acid or LiFePO4 batteries in peak condition. The integrated LCD indicates real-time energy information, operational parameters, and fault messages, and is easily navigated using the two push buttons. Installation is made easy with pluggable terminals on the rear for the solar panel, battery, and temperature sensor. An RS485 port enables you to connect a computer for programming purposes, or to a Wi-Fi module (sold separately) so you can control the system from your Smartphone. It has extensive electronic safety protection, and is sure to keep your appliances and gadgets running when you're away from mains power.

### 12V/24V MPPT Solar Charge Controller

MPPT technology uses DC to DC conversion along with some electronic smarts to be able to extract the absolute maximum charging power from your solar panels, giving you up to an extra 10-40% from your solar panels when compared to a normal PWM charge controller. Adding to the benefits of MPPT technology are the features of this charge controller, such as 3-stage battery charging, twin timer programming, 30A load control with automatic load disconnection/reconnection, and much more. Programming is simple and intuitive via the front panel buttons whilst the LCD screen shows you what's happening. Suitable for 12V or 24V systems.

- Automatic load control with low-voltage disconnect/reconnect
- Two timers available for programming
- Includes temperature sensor for battery charging compensation
- Protection against over voltage, reverse connection, short circuit, over current, and over temperature

NOTE: Unit WILL charge a 12V battery from 24V solar panels, but not vice versa.

\*MPPT means Maximum Power Point Tracking.

### 12V/24V 30A MPPT Solar Charge Controller with LCD Display for Lead Acid & Lithium Batteries

This intelligent compact charger uses Maximum Power Point Tracking (MPPT) for maximum efficiency and charge rate. It can charge 12V or 24V lead acid (sealed, gel, or flooded) or 12V Lithium battery banks, and supports 12V solar arrays up to 500W or 24VDC arrays up to 1000W. It features eight timer programs, three stage charging including constant voltage charging, and a backlit LCD to display real-time feedback on battery voltage, load voltage, PV voltage, time, etc. An external temperature probe is also supplied to adjust the float voltage according to the temperature when charging SLA batteries. The integrated Wi-Fi enables you to remotely access the controller using an app on your Smartphone to keep an eye on the system, and two USB ports are provided to charge your USB gadgets. The fanless design is built into a durable case for permanent installation with heavy-duty screw terminals for cabling up to 10AWG. Safety features include over-voltage, low-voltage protection, reverse connection, short-circuit, over-current, and over-temperature protection.

- Intelligent and optimum MPPT charging algorithm
- Backlit LCD with real-time energy stats, operational and fault message
- Temperature sensor for battery charging compensation
- Low-voltage disconnect/reconnect
- 3-stage charging
- 8 programmable timers
- Backlit LCD screen
- Integrated Wi-Fi
- 2 x USB Ports

## SOLAR REGULATORS / CHARGE CONTROLLERS CONTINUED

### MPPT Solar Charge Controllers for Lithium or SLA Batteries

Uses Maximum Power Point Tracking (MPPT) for maximum efficiency and charge rate. Able to charge lead acid (sealed, gel or flooded) or Lithium battery banks between 8V to 32V. It features bulk, constant and float charge stages for rapid, efficient and safe battery charging, with feedback on charge status, current, voltages, etc. shown on the LCD screen. Built into a durable case for permanent installation with heavy duty screw terminals.

#### Advanced MPPT control technology

- High tracking and conversion efficiency
- Supports lead acid and Lithium batteries
- 3-stage intelligent charging
- Multiple load work modes
- Extensive electronic protection
- Backlit LCD display
- RS485 communication

#### Remote Status Display

This LCD screen allows you to view current, voltage and power outage coming into the controller. The display also allows you to remote control the MPPT unit which ensures the most efficient charging of your battery at all times.

- Automatically identifies the controller, and displays relevant parameter data
- Large-screen informative LCD displays all the operating data and system working status
- Real-time alarm of failure information
- Energy statistics display function
- Includes cable

## BATTERY TERMINALS

### Universal Brass Battery Terminals

These heavy duty, solderless range of Marine grade brass plated zinc battery terminals have got you connected. With five options available from universal saddle, lug bolt style, side barrel, end entry and not forgetting the built in isolating switch perfect for isolating your battery to prevent battery drain when not in use. Sold in pairs, POS - NEG, HC4038 isolation type sold singular (Negative post only).

### Top Post Knife-Blade Style Battery Isolator Switch 250A

This handy isolator switch can serve many purposes. Firstly, it can help avoid battery drain on an idle vehicle or boat that is in storage or only gets occasional use. It can help discourage theft, and also provides an easy way to disconnect power to prevent shorts and fires when you are working on the electrical system. The switch fits directly over the battery's negative post, and has a knife-blade that enables you to disconnect power without any tools. Suits either 12V or 24V systems and is rated to handle 250A continuously and a cranking current up to 750A.

- Red copper and brass with anti-fire nylon construction

**Warning:** This switch is only to be assembled on top of the **NEGATIVE** post of battery, under **NO** circumstances is this to be connected to **POSITIVE** post of battery.

## BATTERY CHARGERS

### 12V Automatic Lead Acid Battery Charger 1A

This intelligent automatic battery charger stops charging when the battery is full and starts to maintain the battery with a 'floating' charge mode. The charger monitors the battery voltage and tops-up the battery to keep it fully charged all the time. This feature allows you to leave the charger connected to the battery without risk of overcharging. It comes with a LED indication for battery charging status. The 2m long cable includes an interchangeable DC plug and alligator clips.

- Great for jet skis and smaller motor bikes

### 6, 12 & 24V Automatic Lead Acid Battery Charger 1.2A

This switchmode SLA battery charger has an automatic function that cuts the charging current to near zero once the battery is charged, whilst still continuing to monitor battery voltage. Works with 6V, 12V or 24V SLA batteries, and automatically detects the battery voltage ensuring you don't make any mistakes - just connect the charger and it starts automatically. LED indicator shows charging state, with connections made by alligator clips.

### 6V & 12V, 8A Heavy Duty with Trickle Charge

This charger is suitable for both 6 and 12 volt car, boat, motorcycle and lawnmower batteries. Featuring 4-stage LED charge indicators, the charger can be switched between trickle or heavy duty charge rates and is recommended for casual, domestic charging tasks. The unit is housed inside a tough plastic case with carry handle, is double insulated and features overload and reverse battery protection. The battery leads are terminated to heavy duty alligator clips on a 1 metre length of cable.

- Complies with Australian Electrical Safety Regulations
- Good general workshop charger

## MB3619 & MB3527

These chargers are ideal for units that spend a long time unused and therefore with the danger that the starter motor batteries will sulphate up and die. By putting one of these units permanently on trickle charging the battery (in the jet-ski, vintage car, snowmobile, etc) will be ready to rock-n-roll the next time you use it.

## Low Current Chargers

Low current output designed to steadily recharge sealed lead acid (SLA) batteries without causing the battery to overheat and become a swollen mess. As a guideline the charger's current rating should be no more than 10 to 15% of the battery's ampere-hour rating.

## Switchmode Multi-Stage Battery Chargers:

High tech SLA battery chargers for automotive, marine, motorcycle, workshop or industrial use. All feature switchmode operation, multi-stage maintenance and charging, near-bulletproof performance & microprocessor control. All are IP rated for use in workshop and hostile environments.

- Short circuit & reverse polarity protection
- Dust & splash proof - most are IP65 rated
- Anti-spark protection

### 7-Stage 6/12VDC Intelligent Lead Acid & Lithium Battery Charger

An intelligent battery charger to keep your batteries in peak working order. Suitable for 6V or 12V Lead Acid batteries between 1.2Ah - 26Ah, or 12.8V LiFePO4 from 2Ah to 15Ah. The seven charging modes keep batteries fully charged and in peak condition, and can also recover slightly sulfated batteries to increase battery life. LEDs on the front panel indicate the state of charge and a push button enables you to select the appropriate charge mode. The housing can be permanently mounted using the integrated mounting holes and the IP65 weatherproof rating means it can handle a little rain. The charger is mains powered, terminated to battery clips on a 1.8m lead, and features short circuit, overload, incorrect polarity, reverse battery, and safety timer protection.

### 8-Stage 6/12VDC Battery Charger for Lead Acid & Lithium

An intelligent battery charger to keep your batteries in peak working order. Suitable for 6V or 12V Lead Acid batteries between 4Ah - 50Ah, or 12.8V LiFePO4 from 3Ah to 25Ah. The eight charging modes keep batteries fully charged, and can also recover slightly sulfated batteries to increase battery life. Five RGB LEDs on the front panel indicate the state of charge and a push button enables you to select the appropriate charge mode. The housing can be permanently mounted using the integrated mounting holes and the IP65 weatherproof rating means it can handle a little rain. If you happen to live in areas with a cold climate, the charger can be set to provide a more effective charge in temperatures below 10°C. The charger is mains powered, terminated to battery clips on a 1.8m lead, and features short circuit, overload, incorrect polarity, reverse battery, and safety timer protection.

- 6V/12V dual function charger
- Suitable for Lead Acid and LiFePO4 batteries
- 8 stage intelligent charging modes
- Can recover slightly sulfated batteries

### 6V/12V/24V Intelligent Battery Charger

An intelligent battery charger suitable for flooded and gel lead acid batteries including deep cycle batteries at 6V, 12V or 24V. The microprocessor controlled unit provides 4 stages of charging, Soft Start, Bulk Charge, Absorption and Float which assists in the batteries life expectancy and performance. An auto detection feature provides a user friendly experience, which can be pre-programmed or manually set for greater control. Should a blackout occur or AC input power be lost during a charging operation the memory function will resume charging once power is re-established. Other features include temperature/voltage compensation, reverse polarity/short circuit protection and a battery status indicator. Ideal for cars, motorcycles, caravans and boats with battery capacities between 20-200Ah. It's also ultraportable with a handy storage pocket in the back for the leads.

- Memory function
- Temperature controlled fan
- LED battery status display
- Temperature and voltage compensation

### 4-Stage 6/12VDC Charger

This smart charger uses a microprocessor to diagnose the battery's state of charge, providing the correct charging mode, eventually switching to float/maintenance charge to keep the battery at full charge and eliminate battery sulphation. Suitable for all types of SLA batteries-wet cell, gel cell, AGM and LiFePO4 ranging from 5Ah to 120Ah. This charger has pre charge mode to identify sulphated batteries and pre charge at low current for a period before automatically switching to high current to extend your battery's working life.

### Multi Stage Charger

All-in-one chargers which have multiple charge settings to suit different sized batteries and charging requirements. Capable of recharging the battery and maintaining the charge state indefinitely, they are particularly well suited to being continuously connected to a battery. Some models also have additional functions such as rapid boost charging and can also be used as a general purpose high current power supply.

### 9-Stage 12V-7.2A/24V Charger

The bigger brother of MB3611, this is a fully automatic 9 stage charger for 12 or 24V sealed lead acid batteries- wet cell, gel cell, AGM and LiFePO4 batteries. Advanced diagnostics enable this unit to maximise charge rate while also maximising battery life. You can also switch it onto power supply mode where it will act as a 13.8V and up to 5A power supply, useful in supplying power to computer systems of many modern cars when replacing batteries.

## Multi Stage Charging States

Charging stages include:

#### BATTERY TEST:

Checks the battery to ensure it is ready for charging, polarity of leads etc.

#### DESULPHATION:

Detects sulfated batteries. Pulsing current and voltage, removes sulfate from the lead plates of the battery restoring the battery.

#### SOFT START:

Initial battery test to determine battery condition. If the battery is severely discharged, charger will begin the Soft Start stage. Charging starts with reduced current until battery voltage reaches a normal condition for charge.

#### BULK MODE:

Major charging stage where the battery receives the majority of its charge. During this stage the battery is charged to up to 80% capacity.

#### ABSORPTION MODE:

Completes the charge up to virtually 100% at a slower charge rate to protect the battery's working life.

#### RECONDITION MODE:

Select "Recondition" mode, charges at higher voltage to recondition the sulfate of the battery to save battery life.

#### ANALYSIS:

Tests if the battery can hold charge. Batteries that cannot hold charge may need to be replaced.

#### FLOAT:

Low constant voltage, minimal charge current, battery is fully charged.

#### PULSE MODE:

Maintaining the battery at 95-100% capacity. The charger monitors the battery voltage and gives a pulse when necessary to keep the battery fully charged.

### 8-Stage 12V Automatic Marine Battery Charger with Dual Output

Designed to charge and maintain 12V lead-acid batteries, including Wet, MF, VRLA, AGM and Gel, and Calcium batteries from 1.2Ah to 120Ah. Compact in size, but feature-packed with intelligent charging and dual channel output to charge two batteries simultaneously up to 4A each. The 8-step charging process includes Diagnosis, Recovery, Soft Start, Bulk, Absorption, Analysis, Float, and Maintenance for larger capacity batteries. The housing is dust and waterproof rated to IP68, making it suitable for outdoor and marine use. Safety features include short circuit, open circuit, reverse polarity, battery low, over temperature, spark, and safety time protection. Mains powered.

## 5-Stage Charger For Lithium &amp; Lead Acid Batteries 12V

Charger for lead acid and Lithium batteries that can operate with or without a load. This professional charger intelligently charges 12V Lead Acid, AGM and Lithium (LiFePO4) batteries from 50Ah to 300Ah, with (rated output of load should be less than that of charger) or without load. A 5-stage charge mode for Lead Acid batteries includes Soft, Bulk, Absorption, Float and Standby, with Refresh and Equaliser options to keep your Lead Acid battery in peak condition. A half power mode suits batteries under 100Ah and a special algorithm effectively charges LiFePO4 batteries using Bulk and Absorption modes.

A host of safety protection features include short circuit protection, self-recoverable over temperature protection, and self-recoverable reverse polarity (fused). Supplied with three charging cables terminated to 50A Anderson® connectors, large battery clips and eye terminals.

## Dual Input 20A DC/DC Multi-Stage Battery Charger to suit Lead &amp; Lithium Style Batteries

Designed to manage solar and alternator power inputs to charge an auxiliary (house) battery system. The system will preference solar, providing lower loads on your engine when solar is available. With automatic ignition detection enabled, the system will isolate the starting battery when the engine is off, preventing discharge of your critical starting battery. It's fully automatic, with a set-and-forget type operation. The microprocessor controlled circuit keeps your battery in peak condition, automatically switching between six charging modes; Qualification, Recondition, Bulk, Absorption, Check, and Maintenance. Housed in a heavy-duty aluminium case with mounting bracket, and a front panel with charge status LEDs and push button to select between Lead acid, AGM, Calcium, GEL or LiFePO4 batteries. It handles solar panels with 16 to 25V open circuit voltage, and includes over charge, short circuit, over temperature, reverse polarity, thermal overload, and solar input overload safety protection.

- Dual input - solar and/or alternator/car battery
- 20A max charging current (automatically controlled)
- Six-stage Battery Charging
- Supports Lead acid, AGM, Calcium, GEL or LiFePO4 batteries

## On-board Marine Battery Charger

Advanced electronic and fully automatic multi-stage marine battery charger that mounts on-board your boat to charge the cranking and house batteries, once you connect to shore power. The multi-stage charging process delivers five modes of operation, including start-up diagnostics, charging, conditioning, auto maintenance and storage reconditioning of each battery. This process is proven to extend the life of your batteries and will fully charge your batteries each time you connect to AC power. The charger Distributed-On-Demand® charging technology will automatically sense and distribute 100% of the available charging output of 15 or 20 amps to any one battery or combination of all batteries. Each battery charger output is fully isolated.

Tech talk

## High Current Chargers

Higher current chargers steadily recharge larger lead acid batteries such as car, marine or high capacity deep cycle batteries. Available in simple models which need to be monitored manually i.e. disconnected when the battery is fully charged, and automated models which monitor battery condition. Automated models have higher charge rates and improve battery life as their control systems prevent overcharging. Jaycar does not stock simple chargers, only automatic types.

## WIRELESS QI CHARGERS

### 15W Wireless Qi Fast Charger

With this sleek, slimline Qi wireless 15w charging pad gone are the days of fumbling with cables. Using resonant inductance with an enabled device, you simply need to place your Qi enabled Smartphone or Samsung Galaxy watch within 10mm of the charging pad, for charging to automatically begin. ## SPECIALTY USB LEADS

### Power Boosting USB A to USB Micro B Lead

Computer USB ports really don't produce enough power to reliably charge your Android® and Windows Smartphones or Tablets. This cable overcomes that problem, allowing you to charge your device up to 2.4A. Supports all Smartphones and Tablets with a USB Micro-B connection.

- Current Output: up to 2.4A

### Micro USB Socket Saver Leads - Pair

Many of us on the Jaycar staff have found that using a USB socket (either standard or USB micro B, etc.) very frequently actually wears the connector out and it becomes unreliable. To reduce this problem, we have introduced a micro USB lead that should remain plugged into the USB device to save wear on the inlet socket. Yes, this means that you will have to put up with the inconvenience of a small lead sticking out of the device but it saves the product from becoming unusable. You can, of course lay the lead down with double-sided tape if you like to create a neater result.

# Portable Power Stations

## Power your creature comforts in the outdoors

USB, 12VDC and Power Inverter to power your electronics and appliances when you are away from mains power.

Light

Phone

Laptop

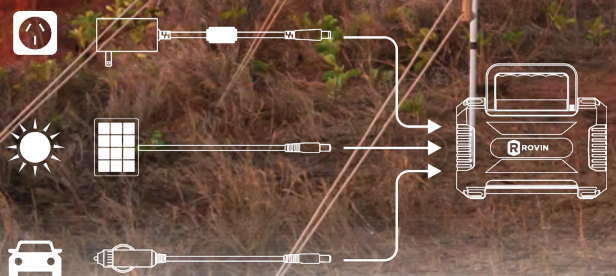

Mini Fridge

## Three easy ways to charge

Charge on the go as you drive, from a solar panel or from mains power.

\* Solar panel not included

## Multi-Function 42,000mAh Portable Power Centre with LCD

This powerful but lightweight multi-function power station is designed to power 12V, USB, and mains powered devices and provide lighting when you are away from mains power. Perfect for camping or during a power blackout.

The internal high capacity 11.1V 14Ah Li-ion battery is equivalent to a 42,000mAh 3.7V battery and provides up to 155Wh of battery power.

A built-in 100W (150W peak) modified sinewave inverter is enough to power small tools, shavers, and laptop power supplies, for example.

12VDC ports enable you to power 12V lights, air compressors, etc., and Smartphones, Tablets, and other USB devices can be charged from the 2 x 2.1A USB Ports and USB-C Qualcomm® QuickCharge™ 3.0 port (total 3.5A max. shared).

The LED light panel provides enough light for reading, and the ultra-bright LED torch features a flashing mode to draw attention in an emergency.

An LCD screen indicates power levels.

To charge, simply connect a 12V solar panel (not included) and the built-in MPPT charger will ensure an efficient charge. Alternatively, use the mains adaptor or in-car chargers provided.

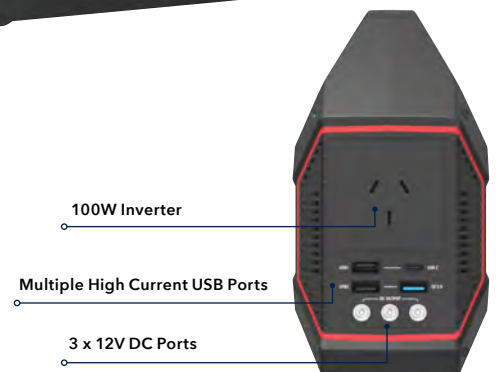

Safety features include short-circuit, overload, over-temperature protection.

## Multi-Function Portable Power Centres with Pure Sine Wave Inverter

Thanks mainly to lithium batteries, this new breed of power station should continue to grow in popularity as a portable power solution. Both feature packed units weigh in at under 6kg, that's 25-30% lighter than the equivalent SLA battery on its own. Except, within these compact lightweight stations, you get the battery, the inverter, the charging management system, and multiple I/O's all in one neat portable package. You even get an attractive LCD screen to indicate the power input and output wattage, battery level, and any operational warnings such as overload or overheating.

There are ample outputs to run multiple devices and small appliances via 5VDC, 12VDC and even 240VAC using the internal pure sinewave inverter (300W/500W options available). Conveniently charge the unit via mains before you leave and then keep it topped up via solar (solar panel sold separately) when you're out and about. The integrated BMS (Battery Management System) and solar charge controller (MB3767: PWM, MB3768: MPPT) ensures you get the optimum charge.

This is the ideal companion to have around your campsite, jobsite or even at home, especially during power outages.

Two models to choose from.

## Mains Laptop Power Supplies:

Buying an extra power supply saves the hassle of taking the power supply everywhere you take your laptop. Keep one at the office and one at home. The original power supply on your laptop may have failed, so get a replacement at a fraction of the cost of a genuine part. There's a model compatible with most laptops on the market. See our website for compatibility charts.

**Manual Type:** Switch the output voltage to suit your laptop

**Automatic Type:** Models switch voltage automatically depending on the connector used.

Some models display the voltage on a LED or LCD display.

- All models feature short circuit and overload protection
- 1 Year warranty on all laptop supplies

## 45W 5 - 19.5VDC Switchmode Plugpack

This universal power supply suits a variety of applications from powering small devices that run on 5V, 9V, 10.5V, 12V or 15V up to laptops that run on 19.5V. Voltage is manually selectable and there are 8 detachable adaptors to fit the major manufacturers' DC power input sockets, including laptops from Dell, Toshiba, IBM, Lenovo, HP, Acer, and Samsung. The power supply has a slim plug-in design with LED power indicator, reliable short circuit and overload protection, and a generous length lead.

- Plug Pack Design
- 8 Detachable Plugs and 6 output selections
- Short circuit and overload protection
- High efficiency
- Low energy consumption

## 65W Compact Auto Universal Laptop Power Supply with USB Socket

An ideal spare or replacement power supply for your laptop, notebook, or ultrabook. It has a slim design to avoid blocking any other appliances plugged into the power point or powerboard, and weighs only 167 grams, so it's easy to take with you. Eight detachable plugs are supplied to suit most laptops on the market, including Acer, HP, Dell, Toshiba, IBM, Lenovo, and more. The voltage output is automatically set between 18.5V to 20V depending on the connector you use, and a USB port enables you to charge your Smartphone, Tablet, and other USB charged devices. SAA, EMC and MEPS approved with over-current, over-voltage, over-temperature, and short circuit protection. See our website for a complete compatibility list.

## MAINS LAPTOP POWER SUPPLIES CONTINUED

**5-20V 90W Laptop Wall Plug-in Power Supply with 2 x USB-C (PD3.0/QC4.0) & USB-A (QC3.0)**

This universal laptop power supply is an ideal spare or replacement power supply designed to quickly charge a laptop, MacBook® or compatible tablet. It features two USB-C Power Delivery 3.0 technology outputs, which communicates with compliant USB Type-C devices and intelligently feeds maximum power for rapid and optimum charging. In addition, one USB-A ports with Qualcomm® Quick Charge™ 4.0 technology efficiently and rapidly charge Smartphones and other compatible devices simultaneously. Multiple safety protection includes over-current, over-voltage, short-circuit, and over-temperature protection. White in colour and plugs directly into mains power socket.

# Uninterruptible Power Supplies

POWER

## Uninterruptible Power Supplies (UPS) - AC:

Critical systems should ideally be connected to some form of backup power in the event of a blackout, power surge or brownout. A fault at the grid may drop the voltage at the mains, which could cause some systems to shutdown, reset, lose data or worse, resulting in thousands of dollars of damage (both material and immaterial). These line interactive units give you a good balance between real time system protection and power

redundancy when mains electricity is down or experiencing reliability issues. During mains voltage sags both units will deliver a steady voltage, keeping critical systems running properly. For a total power blackout the units can keep your systems running long enough to save important data or cleanly shutdown connected devices.

### MINI UPS

#### 30W DC Mini UPS

A compact DC UPS designed to connect inline with your ordinary 12VDC mains power adaptor. In the case of a power outage, the internal battery will keep your equipment operating for longer. Three interchangeable DC connectors are supplied to suit a range of devices such as a modem, network switch, router, video device, surveillance systems or lights. An integrated smart charger ensures the internal 18650 Li-ion batteries are charged, and adjusts the charge current based on the current draw to the device you are powering. The rated output is 2.5A at 12V but 3A can be provided for a short time. Four status LEDs indicate the UPS charge status, and safety features include over-charge, over-discharge, over-current, and short-circuit.

### Line Interactive UPS with LCD - 650VA & 1500VA

Features an auto shutdown when no load is detected, audible alarms for low battery, self diagnosis on boot, and intelligent battery management. Both models feature an easy to read LCD which displays battery and load values as a percentage and input/output voltages. At the rear of the unit are 2 x RJ11 sockets for Telephone/Fax protection and a USB socket for connection to your PC for use with the power management software.

### Switchmode Mains Adaptor 3 - 13.8VDC 2.5A

Variable desktop supply with binding post and 7 DC plugs.  
1.5m lead - interchangeable plugs.

Specifications	MP3308
Output Voltage	3, 5, 6, 9, 12, 13.8VDC
Output Current	2.5A max

### 45W 5 - 19.5VDC Switchmode Plugpack

This universal power supply suits a variety of applications from powering small devices that run on 5V, 9V, 10.5V, 12V or 15V up to laptops that run on 19.5V. Voltage is manually selectable and there are 8 detachable adaptors to fit the major manufacturers' DC power input sockets, including laptops from Dell, Toshiba, IBM, Lenovo, HP, Acer, and Samsung. The power supply has a slim plug-in design with LED power indicator, reliable short circuit and overload protection, and a generous length lead.

- Plug Pack Design
- 8 Detachable Plugs and 6 output selections
- Short circuit and overload protection
- High efficiency
- Low energy consumption

#### Plug Dimensions:

## HIGH POWER SWITCHMODE PLUGPACKS

### Switchmode Mains Adaptor with 7 Changeable Plugs

These slim mains power adaptors don't block other appliances connected to your powerpoint or powerboard. The switchmode design has low energy consumption, keeps it lightweight, and provides a regulated output voltage. It also features overload protection.

- Input: 100-240VAC 50/60Hz
- Supplied with 7 plugs
- SAA, EMC and MEPS approved

Voltage VDC	Current Amps	Cat.	Qty 1+	Qty 5+	Qty 10+

## NBN/UBF POWER SUPPLIES

### NBN/UBF Replacement Power Supply 12V 2.5A

Plug-in replacement power supply for direct connection into your NBN connection box. No wiring required as it plugs straight into the mains power and connects to the 8 pin NBN connection box power port. Features overload and short circuit protection. Compliant with Australian and New Zealand Safety Standards.

- Input: 100 - 240VAC 50/60Hz
- Output: 12VDC 2.5A

## DESKTOP STYLE AC ADAPTORS

These products meet the requirements of Energy Star, the European Commission Code of Conduct, and of course California's legislation, suppliers of electronic equipment requiring an external power supply can ship their products worldwide without needing to understand the complex new systems.

### 60W - 12VDC & 45W 24VDC

Versatile switchmode power supplies in a range of different configurations. All have high output currents and are low-profile for easy mounting.

- Each requires a separate IEC 240VAC lead - Cat PS4106
- Output cable terminated to fixed 2.5mm DC plug except for MP3243 which includes 5 output plugs

Voltage VDC	Current (A)	Cat.	Qty 1+	Qty 5+	Qty 10+
12	5	MP3242	\$49.95	\$44.95	\$39.95

### 120W 12VDC 10A Desktop Style Switchmode Supply

High current switchmode desktop power supply. Suitable for various power requirements, including large surveillance systems to replace a number of smaller plugpacks. DC splitter cables available separately.

- Includes IEC power lead
- Output cable terminated to fixed 2.1mm DC plug

Specifications	MP3241
Input Voltage	220-240VAC
Output Voltage	12VDC
Output Current	10A
Output Connector	2.1mm DC plug
Output Cable Length	1.2m
Dimensions	174(L) x 72(W) x 44(H)mm

### 60W - 12VDC 5A

- Switchmode

Specifications	GH1379
Input	220 - 240VAC
Output	12VDC @ 5 amps
Dimensions	140(L) x 87(W) x 60(H)mm
Input Lead Lengths	1.8m
Termination	2 pin connector

## TRANSFORMER TYPE AC ADAPTORS

Most adaptors are supplied with seven different plugs which suit most applications. All are Electricity Authority (SAA) approved.

### AC Output - Non Regulated - Single Voltage

- Regulated AC output in a plugpack is not currently feasible

Voltage (AC)	Current (A)	Cat.	Qty 1+	Qty 5+	Qty 10+

\*Stripped and tinned termination

### 16VAC 1.25 Amp Alarm Supply

Designed for use with many house alarm panels. Supplied with three metres of cable for connection to alarm.

- Dimensions: 55(W) x 90(H) x 60(D)mm
- Terminated with bare ends

Voltage (AC)	Current (A)	Cat.	Qty 1+	Qty 5+	Qty 10+
16	1.25	MP3021	\$29.95	\$26.95	\$23.95

## GARDEN LIGHTING TRANSFORMERS

Designed to power 12V and 24V garden lights from mains power. All output voltages are AC, not DC.

Note: These devices are not switchmode, they are AC to AC.

### 240V to 12VAC 105 Watt - Indoor

It will power 2 x 50W halogen globes or 5 x 20 watt. Ideal for 5 x 20W pathway lights, for example. Transformer must be used inside.

- 135(L) x 83(W) x 70(H)mm
- Output is via screw terminals
- 4 holes for easy screw mounting

Cat. MP3043

### 240V to 24VAC 150 Watt - Indoor

All globes must be 24V rated

- Output 6.25 amps Cat. MP3045

Tech talk

## Stepdown Transformers

A word on isolation.

This means that:

The primary (240V) & secondary (115V) are totally electrically isolated (Dielectric isolation). This is the safest way of making a mains voltage conversion.

We recommend this type of transformer whenever the application is medical or medically related or where the secondary equipment is to be operated in or near water or high moisture environments.

Note the 240V earth is carried through to the 115V socket earth. As a further safety measure we now supply the ISOLATED units with resettable circuit breakers.

## 240 - 115V STEPDOWN TRANSFORMERS

### 50 Watt - 240VAC to 115VAC

Includes overheat protection. If the unit gets too hot, the thermal fuse will open, then close after unit cools down, restoring operation.

Two pin US socket on unit for 110V appliance and cord plug for 240V power.

- This is not dielectrically isolated. (Auto transformer type)
- Not for use in wet areas

WARRANTY

240 - 115V	50W	MF1091	\$49.95	\$44.90	\$39.90

### Isolated Stepdown Transformers

Quality fully-enclosed stepdown transformer with fold up metal carry handles, approved 3 wire power cord & US style 3 pin 110/115V socket that also accepts 2 pin plugs.

- Electrically isolated between primary and secondary
- Protective earth carried through to output
- Useable with precision electric & electronic appliances.
- Compact, excellent, safe & robust construction - steel case.
- DO NOT compare these to cheap, non isolated units.

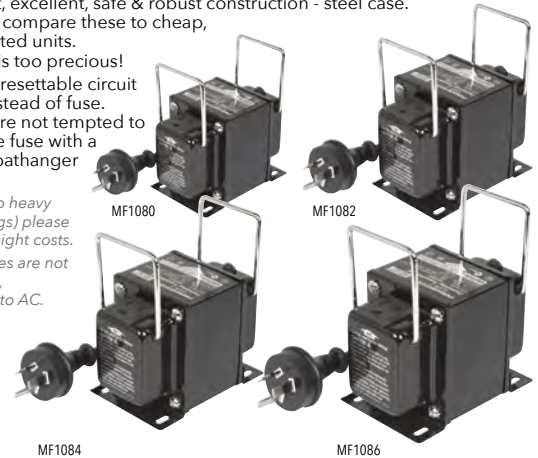

Your life is too precious!

Includes a resettable circuit breaker instead of fuse.

Now you are not tempted to replace the fuse with a piece of coathanger wire.

Note: Due to heavy weight (11kgs) please check for freight costs.

These devices are not switchmode, they are AC to AC.

## VARIAC

### 0-260VAC Variable Laboratory Auto Transformer - 500VA

The variable autotransformer (Variac is the trade name of a popular brand) is one of the most useful and efficient devices ever invented for the control of AC voltage and of voltage-dependent parameters such as current, power, temperature, light intensity, motor speed etc. It enables the AC input to a mains powered appliance to be easily varied from 0 to full line voltage (or greater).

Encased in heavy-duty steel housing it also features on/off switch, output-voltage meter, mains-supply lead and standard 3-pin power output. A must for testing appliance performance under real (simulated) mains fluctuations.

- Now supplied with slow blow fuses for extra reliability

Note: These devices are not switchmode, they are AC to AC.

# Industrial Switchmode Power Supplies

POWER

## ENCLOSED INDUSTRIAL STANDARD SWITCHMODE POWER SUPPLIES

A range of highly efficient, fixed voltage, no load low power (<0.2~0.75W) consumption enclosed power supplies for a wide range of industrial applications. They are more compact and more efficient than previous generation models. The 30mm low profile design allows them to be built into 1U rack enclosures, while the metallic mesh case enhances the heat dissipation. They are capable of operating at altitudes up to 5000 metres. Not only do they satisfy every kind of industrial related application but also can be utilised for household appliances thus accounting for a broader coverage across diverse industries. See our website for full datasheets on each model.

- Full range 85~264VAC input
- Withstand 300VAC surge input for 5 seconds
- High efficiency, long life & high reliability
- 100% full load burn-in test
- Extremely low no load power consumption
- Protection: Short, overload & overvoltage
- Power on LED indicator
- 5G anti-vibration capability
- Complies with international safety standards
- Tolerance figure includes setting + line regulation + load regulation

- Operates from -30°C to 70°C under air convection without a fan
- Backed by 3 year warranty

## MINI Power Supply

The IRM Series is a miniature encapsulated AC/DC power supply. This on board module features compact size and extremely low (<0.1W) no load power consumption at standby mode. This allows designers to easily conform to the requirements of ErP norm (Energy-related Products) and EISA. The 94V-0 flame retardant plastic case and fully-potted silicone enhance the heat dissipation and meet anti-vibration demand up to 5G. The new series complies with UL/CUL/TUV/CB/CE certificates for safety. Suitable applications include electronic instruments, hand held electronics, factory automation and electrical or mechanical equipment. Supplied with screw terminals.

- Universal AC input / Full range
- Compact size
- Protections: Short circuit / Overload / Over voltage
- Cooling by free air convection
- Isolation Class II
- No load power consumption <0.1W
- Pass LPS
- 100% full load burn-on test
- High reliability

## DIN RAIL POWER SUPPLIES

## DIN Rail Power Supplies

Mean Well HDR DIN Rail power supplies are available in 15W, 30W, or 60W and feature an ultra-slim, step shape plastic housing. The HDR family specially adopts the European Union standard DIN EN43880 and slim design with a height of 90mm and the width are only 15U to 35U (17.5mm/35mm/52.5mm). They also feature efficiencies up to 91%, adjustable ( $\pm 10\%$ ) DC output voltage, and a working temperature range of  $-30^{\circ}\text{C}$  to  $+70^{\circ}\text{C}$ . Typical applications include building automation, household control system, industrial control system, factory automation and electro-mechanical apparatus.

- Ultra slim design with 17.5mm(15U) / 35mm(25U) / 52.5mm(35U) width
- Universal input 85~264VAC
- No load power consumption  $< 0.3\text{W}$
- Isolation class II
- Pass LPS (limited power source)
- DC output voltage adjustable
- Short circuit / overload / over voltage protections
- Cooling by free air convection (working temperature:  $-30^{\circ}\text{C}$  to  $+70^{\circ}\text{C}$ )
- DIN rail TS-35/7.5 or 15 mountable
- LED indicator for power on

## DIN Rail Power Supplies

Mean Well EDR Din Rail Power Supplies are an economical and slim solution which adapt to be installed on TS-35/7.5 or 15 mounting rails. They are 40mm wide which allows plenty of space to be saved in cabinets. They are designed with metal housing that enhances the unit's power dissipation. It is equipped with constant current mode for over-load protection fitting various inductive or capacitive applications.

- Universal AC input / Full range
- Cooling by free air convection
- Installable on DIN rail TS-35/7.5 or 15
- 100% full load burn-in test
- Low cost

## MEAN WELL DESKTOP POWER SUPPLIES

## Desktop Power Supplies

Mean Well GST series Power Adaptors are highly reliable desktop style single output green adapters complying with the latest energy efficiency regulation (EISA 2007/DoE Level VI). With a low no load power consumption (less than 0.075W) and an average operating efficiency up to 90% these are far superior to any other power supply in the market. They are made of 94V-0 flame retardant plastic case and are certified for various international safety regulations. This range is ideal for use with various types of consumer electronic devices, telecommunication devices, office facilities, industrial equipment, and various kinds of apparatus or systems requiring conformity to the latest energy related regulations.

- 90~264VAC input
- No load power consumption  $< 0.075\text{W}$
- 94V-0 flame retardant fully enclosed plastic case
- Complete protection functions:
- Short circuit/overload/over temperature (GST60A only)
- 3 pole AC inlet IEC320-C14
- Energy efficiency level VI
- Comply with up to date global energy efficiency regulations
- EISA 2007/DoE, NRCAN, AU/NZ MEPS, EU ErP and CoC Version 5
- Class I power (with earth pin)
- Pass LPS
- LED indicator for power on

### Fixed 13.8V Switchmode

High current general workshop power supplies for equipment component testing, etc. Internal cooling fans assist cooling at higher temperatures.

- Banana socket style binding posts
- LED power on indication
- Rear mounted M205 fuse
- Ideal for 12V amateur transceivers, linear amps and high powered car stereo bench testing
- 12, 20 and 40A models

### Fixed 13.8V

These good looking power supplies are available in three current capacities of 5, 10 and 20 amp. They use proven technology and are designed to give long service life in workshop situations. The range features short circuit protection on the output and a fused input.

## LABORATORY POWER SUPPLIES CONTINUED

## Compact Switchmode Variable

Compact size, high current, variable output and fan cooling make these the ideal power supply for your bench. They are protected against thermal overload and short circuit and will display a warning LED in the event of a fault condition. Current and voltage are displayed on separate backlit analogue meters. Two models available.

## 0 to 36VDC, 0 to 5A Slimline

Often in a workbench environment you don't need massive amounts of power, and your huge unit is underutilised. This slimline power supply provides up to 80W of power, still plenty of grunt for many tasks. It provides constant current and constant voltage options. Simply select your power range, then adjust the controls to obtain your desired outputs. Ranges available are 0-16V @ 0-5A, 0-27VDC @ 0-3A, and 0-36V @ 0-2.2A. Output is provided via banana sockets which will accept insulated banana plugs. A powerful, compact unit for your workbench or mobile toolkit. Includes banana to alligator clamp leads.

- Constant current / constant voltage options
- Up to 5A current
- Compact design

## 0 to 30VDC, 0 to 5A Regulated Power Supply

A must have for laboratory or home workbenches. This robust DC power supply features digital control and a large easy to read LED display. Over-current and short circuit protection are built-in. Voltage is adjustable from 0-30V and current can be adjusted from 0-5A, all through the large front dials.

- Includes a tough carry handle making it ideal for technicians to haul around the lab
- Perfect for educational, industrial, or professional users

## 0 to 32VDC, 0 to 3A Dual Output, Dual Tracking

This automatic constant-voltage/constant-current transfer type power supply is effectively two 0-32VDC 3 Amp power supplies in one case. The two outputs can be operated independently, connected in parallel, or series for multiple output currents and voltages. Coarse and fine voltage controls are provided on both outputs, along with current limit control. Both outputs have independent digital voltage and current meters.

- Displays are backlit and extremely easy to read

## 0 to 15VDC, 0 to 40A Regulated

A good lab power supply is a must-have for any serious hobby bench. This one provides the flexibility of wide voltage range and current limiting. A large backlit LCD provides feedback. Thoughtful design makes this unit very functional. While it's capable of up to 40A, if you're only using up to 5A, handy banana sockets are provided on the front panel. If you need up to 40A, heavy duty binding posts are provided at the rear of the unit. The lightweight switchmode design means you can move it around as required, while voltage ripple is kept below 100mV.

- 0-15V variable output voltage
- 0-40A variable current limiting
- Overload and over temperature protected

## CABLE TIDY

### Cable Tidy for Extension Power Leads up to 25m

No more tangled extension leads! This handy cable tidy will hold a lead up to around 25m long (even a heavy duty one). Simply coil it around and clip the plug and socket into the integrated clips. Then when it's time to use it, unwinding will be an absolute breeze! It even features a carry handle!

Note: Extension lead must be fully uncoiled from the cable tidy before use.

- No more tangles
- Integrated plug & socket clips
- Carry handle

Note: Cable not included.

## MAINS HARDWARE - 15A

### Portable RCD with 15A to 10A Mains Plug Conversion

Convert your 15A power lead to fit a 10A power outlet whilst adding the additional safety of RCD earth leakage protection. Ideal if you only have a device with a 15A mains plug, and you are located somewhere that does not have a 15A power outlet available. Features a 10A circuit breaker/RCD in case you accidentally overload the device. Not suitable for outdoor use.

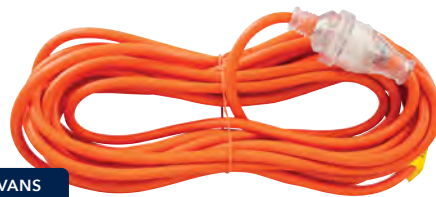

Specifications	MS4044
Voltage	240VAC, 50Hz
Max load	2400W 10A
Rated residual current	30mA

## OUTDOOR HARDWARE

## Mains Plug &amp; Socket Protector - IP44

There are often instances where you have no choice but to connect mains appliances out in poor weather. Sure, your appliance might be weatherproof, but you need to protect the mains plug and socket from the weather too. This brilliant enclosure safely encapsulates a mains plug and socket connection (say from an extension lead to a mains powered appliance), to ensure no water gets into the connection. It not only stops a short circuit that will trigger your circuit breaker, it prevents accidental electrocution from water ingress. Of course, in good weather it still prevents accidental disconnection and damage to the mains plug and socket.

- Protects mains plug and socket
- IP44 waterproof rating
- Heavy duty

## Weatherproof Outdoor Powerboard Enclosure - IP54

This fantastic enclosure takes your average mains powerboard and turns it into a safe, IP54 rated weatherproof power distribution system! It features a heavy duty lockable latch to keep things closed, with an o-ring seal to keep the water out. The cavity inside is around 295(W) x 180(L) x 100(D)mm, which is enough for most 4-way powerboards, and will house plugpacks for Christmas lights and garden ornaments with ease. A 5-way cable grommet is built-in (1 for powerboard, 4 for the items connected to the powerboard). Comes with optional drill holes for M20 or M25 cable glands.

- Wall mountable & lockable

## 2 Outlet 10A Power Garden Stake - IP44

Get the right powerboard for the job! This is a versatile and safe way to distribute power in your garden. It features two mains outlets, which have integrated spring-loaded covers. A hood further protects from water. A long spike makes it easy to push into the ground, while a handle on the top allows easy removal.

- IP44 water resistant
- Spring loaded socket covers
- Carry handle

## Mains Timer with LCD Screen

More advanced than a mechanical timer. You can set it for time of day and also day of the week. The integrated LCD shows current status and guides you through setup. There's also an override on/off/auto selection. If the power goes out, an internal backup battery will retain your settings and accurate time for several days (though obviously won't provide power to your appliance while power is not available). Also includes random mode to switch on lamps or radios to give the impression you're home, while away on holidays.

## MAINS POWER METERS

### Mains Power Meter

This intelligent power meter simply plugs into a normal power point (GPO) and turns it into a real-time power monitoring outlet. You can enter the local price of your electricity and the meter will tell you exactly how much the appliance is costing to run. In addition, the power meter tracks the power used and can display the instantaneous voltage or current being drawn as well as the peak levels that have been drawn. The meter has backup batteries so it will not lose the stored data during a blackout or moving from point to point.

- Simple to install and a valuable tool for monitoring your power consumption

	MS6115	\$19.95	\$17.95	\$15.95

### Mains Power Meter with Extendable LCD Screen

A fantastic large LCD and clear power usage numbers make this unit easy to read, but what's even more impressive is the genius design of having the LCD separated from the mains point!

An all-in-one meter might seem like a great idea, but if you're measuring the usage of your fridge, or your HiFi system, or something else where the mains point isn't in clear view, it can be very difficult to take readings. Solved!

It has all the usual features, power usage in watts, cost conversion, and more.

- Separate wired LCD for better readings
- Displays watts, cost, volts, amps, & CO2 emission
- Display hang-holes for mounting

## SMART POWER SWITCHES

## Smart Plug Wi-Fi Controlled Mains Switch

Control mains appliances in your home or small office using an App or by voice using your Google Home or Amazon Alexa. For example, with a simple touch on your Smartphone or voice command you could turn off a light in your bedroom without getting out of bed. You can also setup multiple schedules to turn appliances on automatically at different times, ideal for turning on lights to deter thieves, or for turning on your coffee machine in the morning. A smart timer or delay is also useful to turn devices on or off.

Note: 2.4GHz Wi-Fi network required. An Amazon Alexa or Google Assistant is required for voice functionality.

## RCD POWER

## Single RCD (Safety Switch) Outlet

RCDs (residual current devices), also commonly called safety switches, are designed to cut the power in a fraction of a second in the event of a fault condition, thereby preventing electrocution. The electricians in your house may be too old to have RCDs installed, or you might want to use a power tool outdoors on an outlet that doesn't have an RCD fitted - use this handy portable one instead. Buy one right now if you don't have RCDs already. Note: RCDs are not a substitute for common sense around mains electricity. While they will work in most situations, they may not in some cases and are not a substitute for current overload devices such as fuses and circuit breakers. Wiring, appliances, leads and power outlets must always be maintained in a safe condition. Test function / reset button.

## 10A Double GPO Power Point with Inbuilt RCD

Built-in RCD to provide protection against electrical shock. In the event of a fault with the connected appliance or accident, such as cutting through the mains lead, the unit will provide complete isolation from mains. A test button, status indicator, and reset button allows you to check the RCD, which we recommend should be done each time before use. Meets Australian and New Zealand safety standards.

Please Note: This item should be installed by a licenced electrician.

## CARAVAN &amp; MOTORHOME ELECTRICS BOOK

## Caravan &amp; Motorhome Electrics

A comprehensive text written primarily for owners, designers and builders of caravans, campervans and motorhomes who face unique power demands and challenges that most auto electricians are ill-equipped to properly address. The book covers every aspect of designing, installing and fixing the electrical systems in all type of caravans, camper-trailers and motor-homes. It explains how things work without the sales pitch jargon, and shows how to dramatically increase power efficiency as well as how to install solar power. Written with emphasis on proven techniques that work, rather than ideas that might work. Written by acclaimed Australian author and field expert Collyn Rivers, this is an essential reference for all caravan and motorhome enthusiasts.

## AAA, AA & 9V BATTERY CHARGERS CONTINUED

### Universal Multi-Channel Ni-MH/Ni-CD Fast charger with LCD Screen & USB Output

This is a powerful, yet flexible, fast charger for all those standard (AA/AAA/C/D) rechargeable cells (Ni-MH or Ni-Cd), up to 6 at a time, including 2 exclusive slots for 9V rechargeable batteries. Up to 1A charging per cell (depending on size) means typical AA cells will only take a couple of hours to charge. Feedback on charging status is provided thanks to an informative LCD panel and status lights. It also provides a convenient 1A USB outlet, so you can charge your smartphone, tablet or any other USB powered device. This unit does not charge rechargeable Lithium or Alkaline cells.

- Quick charge

### USB Powered Li-ion Battery Chargers

These portable chargers can intelligently fast charge a rechargeable Li-ion cell (or two) from a USB power source - no mains power required. The charger automatically detects the battery and sets a 500mA or 1000mA current to fast charge the battery accordingly. The spring-loaded cradle supports a battery up to 71mm long, including 26650, 22650, 18650, 17670, 18490, 17500, 18350, 17335, 16340(RCR123), 14500, 10440, and more. Features zero voltage battery activation for protected cells, as well as over-charge, short-circuit, reverse-polarity, and bad battery detection. Supplied with USB power cable.

### 4-Channel Universal Fast Charger with LCD Screen

This intelligent charger has four independent charging slots to charge any combination of Ni-MH, Ni-Cd, Li-ion, or LiFePO4 cells at the same time. The microprocessor monitors each battery and provides a safe and effective charge using precise Pulse Width Modulation (PWM) technology. A single Li-ion or LiFePO4 cell can also be fast charged at up to 2A. The high contrast LCD screen provides real-time battery monitoring, including charging current (A), charging capacity (mAh), voltage (V) and battery power (%), and humanised voice messages provide audible notifications. Power comes from an available USB port using the supplied USB Type-C cable. Safety features include alarm and error messages for bad batteries, reverse connection, short circuit, over-charge, and over-temperature.

## BATTERY CHARGERS CONTINUED

### Universal Li-ion/Ni-CD/Ni-MH Battery Charger

This cleverly designed model charges various Li-ion battery packs, as well as AA, AAA or 9V Ni-MH and Ni-Cd rechargeable batteries. Housed with a spring loaded cover for clamping down batteries, two Delta-V controlled single cell channel and two adjustable contact pins which are polarity sensing for that added convenience. A USB port on the side accommodates the charging needs for your iPhone®, Smart phone or any USB power device. Topped off with an LCD for displaying the battery type, voltage and charge status. Perfect for digital camera, cordless phone and MP3 player batteries. The charger is supplied with both mains and car adaptors.

- Suitable for: 1 x 3.6V or 7.2V Li-ion battery packs  
1-2 x AA/AAA Ni-MH or Ni-Cd batteries  
1 x 9V Ni-MH

### Universal Professional Balance Charger/Discharger

Balance charging is the ultimate way to monitor individual cells in battery packs, providing more accurate charging, improving the life of your battery packs. The charger includes PC connectivity and temperature sensing, in addition to the large LCD and pushbutton controls. Suitable for Li-Po, Li-Fe, Li-ion Lithium packs, as well as Ni-MH/Ni-Cd packs. An integrated discharge function can also perform as an auto charge/discharge cycle to help condition your batteries (especially useful for NiCd packs). It truly provides some of the most advanced charging around for multi-cell battery packs with balance charging capability.

- Memory to save 10 charge/discharge profiles
- Suitable for Li-Po/Li-Fe/Li-ion (1-6 cell), Ni-MH/Ni-Cd (1-15 cell) & PB (2-20V) batteries

## BATTERY TESTERS & HOLDERS

### Battery / Bulb / Fuse Tester

Battery tester with fuse and bulb checker. Tests AAA, AA, C, D (1.5V) & 9V batteries on the easy-to-read, colour-coded analogue display. It checks bulbs and fuses, giving a 'good' or 'replace' indication, and will also test larger 1.5V button batteries like the LR-44. There is also a handy compartment to store spare fuses, bulbs and button cells.

- Very accurate
- Dimensions: 150mm long
- Uses 9V Battery (included)

### All-in-One Battery Tester

Here's a modern day battery tester to suit all your needs. This handy unit will test all types of batteries currently out there on the market including standard AA/AAA/C/D/9V batteries, button cells and Lithium batteries such as those used in digital cameras. The LCD indicates the level of capacity so you'll never get caught out on a day trip with 1/2 flat batteries in your digital camera.

- One product to test all those batteries in your kitchen drawer before use!

Note: Batteries not included.

### Universal Battery Tester

Never trash a good battery again! This universal tester provides testing for most types of small rechargeable batteries, including a huge range of Lithium-based (LiFePO4, Li-ion etc) batteries. You can test voltage, capacity, and internal resistance. Internal resistance is usually tied to the current charge level, however generally increases with a battery's age, it provides a good indication of battery health, most notably in Lithium-based rechargeable batteries. It also works with alkaline and various other non-rechargeable batteries.

- Tests over 11 types of batteries including cylindrical and button cells
- Test battery voltage, capacity (%), and internal resistance

# Rechargeable Batteries

POWER

## Nickel Metal Hydride Ni-MH Rechargeable Batteries:

Powerful rechargeable batteries with massive capacity for your power-hungry devices. Two types are available. Nipple cap, which are like your standard Alkaline batteries in style, and solder tabs, which are perfect for DIY projects due to their ease of installation and solder connection. If you've ever tried to solder to a regular Nipple Cap type cell, you'll know how tough and unreliable the connection can be.

Ni-MH suffers no memory effect as Ni-Cd does, with huge capacities available in a range of standard sizes.

### Panasonic® Eneloop™ Ni-MH Pre-Charged Rechargeable Batteries

This range of Panasonic® Eneloop™ batteries have numerous advantages over regular rechargeables. Key characteristics include low self-discharge, they are pre-charged so can be used right out of the packet, and can be recharged up to 1800 times. After 5 years of storage they will retain 70% of their capacity once fully charged. A far more environmentally friendly option than churning through dozens of alkalines.

## LiFePO4

Lithium iron phosphate (LiFePO4) is a technology proving to overcome the safety concerns that exist with Lithium ion (Li-ion) and other Lithium battery technologies because it is chemically more stable.

In particular, LiFePO4 is able to deliver extremely high surge currents without risk of the battery chemistry breaking down (and the battery exploding), holds a charge for a very long time, and is far more stable when exposed to high heat and other environmental conditions.

## LIFEPO4 RECHARGEABLE BATTERIES

### LiFePO4 Rechargeable Batteries

Lithium iron phosphate (LiFePO4) is a more chemically stable type of Lithium rechargeable cell that is becoming increasingly popular, due to the increased safety and longer cycle life over traditional Li-ion cells. They have a slightly lower capacity and nominal voltage than equivalent Li-ion cells, but can be charged/discharged around 2000 times (versus 500-1000 for Li-ion), and can deliver higher peak currents. We now offer a couple of common sizes:

### 14500 3.2V 600mAh LiFePO4

- Capacity: 600mAh
- Dimensions: 50(L) x 14(Dia.)mm SB2305

## Hearing Aid Replacement Battery Packs

Supplied in a handy rotary wheel dispenser pack.

Tip: Caring for these batteries is important. When they are not in use, hearing aid batteries should be stored at room temperature. When you're not using your hearing aid, example, at night when sleeping, leave the battery compartment open so the battery doesn't drain and fresh air can dry the hearing aid and battery compartment.

## ALKALINE BATTERIES

### Eclipse Alkaline Batteries

Eclipse batteries are made to the same specifications of those well known expensive brands advertised on TV, but at a realistic price. We are very, very proud of these products and stand behind them unconditionally. If you try them & are disappointed with them for any reason we will give you a full refund and another set of ECLIPSE batteries to see if you can work out what went wrong!

## COMPUTER BACKUP

### 3.6V Lithium Computer Backups

These high capacity batteries are used in many desktop and notebook computers to retain date, time and configuration information while the computer is switched off. They are also useful where long shelf life is important or when the battery is to be fitted into difficult or sealed access areas. Storage life is up to 10 years.

### Lithium can be Dangerous

All the batteries on this page are non-rechargeable. Do not try to recharge any of these Lithium batteries.

There are basically two types of Lithium batteries: rechargeable & non-rechargeable.

Rechargeable batteries are usually referred to as Lithium-ion, Lithium-Polymer or LiFePO<sub>4</sub>. The ONLY WAY to recharge such batteries is with a dedicated charger for the particular battery size, such as CRV-3 or CR123A types.

Such chargers are specifically designed to strictly manage the special charge rate requirements for rechargeable Lithium-ion or Lithium-Polymer cells. Standard Lithium non-rechargeable batteries are not designed to be recharged - even with a Lithium-ion or Lithium-Polymer charger. Indeed there is a VERY HIGH likelihood that the battery will violently EXPLODE if any attempt is made to charge a standard Lithium battery.

DO NOT try to recharge ANY Lithium battery with an undedicated charger, such as lead acid or Ni-Cd charger, under any circumstances.

All batteries on this page are non-rechargeable. Do not try to recharge any of these Lithium batteries.

## Selection Guide for Jump Starters:

It was not until battery manufacturers came up with small (generally) lead-acid batteries with low internal impedance that enabled these products to emerge. With such battery technology, it was possible to make a portable power source in a reasonably lightweight package with enough grunt to be useful. Up until that point you had to borrow a full-size battery - or a nearby vehicle to jump-start a car or truck.

Even if that jump-start capability was the only feature, they'd be worth having. But, in addition they have other in-built features which include: small air compressors, AC/DC chargers, USB outlets, 240V inverters & jumper cables! No wonder these products are some of the fastest sellers in the Jaycar range. There is no reason why everyone who owns a car, 4WD, boat, caravan, truck etc. would not have one.

### 12V 400A Glovebox Jump Starter & Powerbank

Gone are the days of flooded engines and manual chokes to get your car started, but that pesky battery still has a habit of failing at the most inconvenient of times. This unit is amazing. Barely larger than a smartphone, and probably even lighter, but packs a huge power punch to get your car started. With a peak current available of 400 amps, it's powerful enough to get just about all but a tank running. Of course, sometimes emergency phone power is just as important as starting a car, so a 5V 2.1A USB port is provided to get you powered back up. It even includes a cigarette lighter socket charging adaptor, so it never has to leave your car (just remember to charge it when your battery is NOT flat!). In case it's dark, it also incorporates a clever high-power LED, which can operate as a torch or flashing warning light. These devices are now so reliable that similar ones are used by roadside service operations instead of jumping from their own vehicle! If you have more than one vehicle in your family, one for each is a very sound idea.

### 12V 450A Li-Po Jump Starter & Powerbank

Powerful enough to start most vehicles, it'll crank an engine up to a 5L petrol, or 3L diesel. When not being used for jumpstarting it includes an LED torch, as well as a strobe/orange warning light. You can charge USB devices using one of the two USB ports, one rated at 1A, the other at 2A. Recharge time is less than 5 hours, recharged using the supplied mains adaptor. Never leave home without it!

## Lithium Polymer (Li-Po)

Lithium Polymer (Li-Po) batteries are lightweight and pack a lot of power into very small and lightweight cases. They can also deliver an exceptionally high current in a very short space of time, making them ideal for jump starter and power bank devices. Sealed Lead Acid models still typically provide a higher capacity overall, but are much larger and heavier. Our Li-Po based models will fit in your glovebox without a fuss. However like most rechargeable batteries, regular recharging will keep them ready to go at a moment's notice.

**12V 850A Jump Starter & Powerbank with 10W Wireless Qi Charger**

It wasn't long ago that so called "portable" jump starters were about as portable as 4 bricks with a handle on top. Things have changed a lot since then thanks to Lithium battery technology. Indeed, this unit weighs in at around half a kilogram and could almost fit inside a shirt pocket! Not only is it light and portable with a whopping 850A peak cranking current, it also features a wireless Qi charger for your phone and two USB sockets for your other devices. You won't be caught in the dark either thanks to the built in torch with SOS beacon function. Charging is via the onboard USB C socket.

**12V 1100A 17Ah Jump Starter with Air Compressor**

So much more than a jumpstarter. Sure, it has self contained jumper leads and a huge 17Ah battery, so it'll bail you out of many situations. But the real utility of this unit comes from the additional features. There's a built-in air compressor to inflate tyres. There's a 5-LED high power work light on the front so you can see what you're doing. 2 x cigarette lighter sockets as well as 2 x USB sockets for powering and recharging many devices. An internal battery condition gauge helps you make sure it's ready for action, and it's all in a self-contained unit! Includes mains and 12V charging adaptors.

**12/24V 1000/500A Li-Po Jump Starter**

Lithium battery jump starters revolutionised jump starter technology, making them lightweight and ultra-compact. This one is compact, but it's great on the inside! It works on 12V or 24V systems, to provide a whopping 1,000A of peak current (500A on 24V systems). A massive 22,200mAh of Li-Po power is ready to leap into action at a moment's notice. Capable of starting cars, motorbikes, but also large motors such as boats, trucks, buses, other industrial and commercial applications. Intelligent detection circuitry provides automatic 12 / 24 selection, with a manual override option useful with very low discharged batteries (when Auto mode isn't able to detect correct battery voltage). Like all good power banks, a USB outlet is also provided for mobile phone charging and powering other USB

devices too. A small light is also included which is very useful at night and in enclosed spaces. Short circuit, over-temperature, over-current, and internal battery protections are included to ensure the jump starter stays in good working order. Mains and car charger included, with battery-level indicators on the unit.

### Extra-Heavy Duty 700A Jumper Leads with LED Illumination

Rated at 700A, they are suitable for higher CCA (Cold Cranking Amp) loads on big V6s, V8s and diesel 4WDs. At 4.5m long, they have that extra bit of length over your typical jumper leads, which always makes the difference when dealing with large 4WD engine bays. Fitted with a surge protector to protect sensitive electronics, and supplied in a handy clear plastic carry case. LEDs powered by built in batteries (included).

## AIR COMPRESSORS

### 12VDC Air Compressors

Powerful air compressors great for a variety of outdoor activities and emergency situations such as pumping flat car/4x4/truck tyres, inflatable boats, air beds, etc. Both models incorporate automatic thermal cut-out for added protection as well as cleanable air filters to keep the units free from dirt and other contaminants. Includes heavy duty battery clamps for secure connection to your 12V power source and extendable coil hoses for reaching those tricky spots. Each unit has anti-vibration mounting feet to ensure they stay planted to the ground and a foam grip handle. Accessory nozzles for pumping bike tyres, balls, and other inflatables included as well as a black carry bag.

## OIL PUMP

### Oil Pump 0.3-1.2LPM 12VDC

Perfect for siphoning oil to a holding tank, or refilling oil on your inboard while reducing the potential of a bilge full of oil from a spill. Suitable for motor oil and diesel, but not petrol or other highly flammable liquids. Includes hoses and hose clamps.

Note: Motor oil should be warm where possible (40°C to 60°C) for maximum transfer speed. Not suitable for pumping of water or high viscosity oils (such as gearbox oil).

## Air compressors

How do you know you are getting a good compressor? The real way is to pull the compressor apart and check the piston. A good compressor will have a steel piston in an alloy cylinder, or an alloy piston in a steel lined cylinder. An easier way is to look at the construction of the tyre inflator. Cheap compressors supply a poorly built and flimsy unit. Check ours out.

## 24V TO 12VDC CONVERTERS

## 24VAC/DC to 12VDC 1A Converter

Trying to get power for CCTV and security cameras over a long run without losses is challenging to say the least. Solve the problem quickly and easily by sending 24VAC down the long run, then converting it to 12VDC when you get it where you need it. Connection is by screw terminals.

### Universal USB Step-Up Power Cables

Absolute genius! This adaptor provides you with 9 or 12V output from a common USB socket (usually 5V output). Useful for powering all sorts of 12V devices direct from a computer or other USB charging source. 12V @ 1A rated output. Includes 7 standard DC tips to suit your device. Note - your USB port must be equipped for high current charging (2.1A or greater). Some USB ports are 500mA rated. The device will work perfectly, but will not be able to provide the full 1A current at 9V or 12V.

- USB 5V step-up to 12V converter
- Supplied with 7 standard DC tips
- Ideal for powering routers, radios, modems, car DVD players, etc

## MERIT AUTOMOTIVE CONNECTORS

### Merit Plugs & Sockets

Smaller in size than existing cigarette lighter connectors, they also have the advantage of a superior rugged construction and higher current carrying capability. The panel sockets feature a flip down cover to resist ingress of moisture and dust, and can withstand long periods of sustained current draw (unlike the el-cheapo versions of these connectors!). We have even included a modular merit plug to cigarette lighter adaptor in our range for those people who need both styles in a single connector (like those used on popular brands of 4WD fridges and spotlights).

## MARINE GRADE CIGARETTE PLUGS & SOCKETS

### Marine Grade 10A Locking Cigarette Plugs & Sockets

Marine grade, weather and UV resistant. Ideal for situations where your 12V gear will face mud, dust, salt and other contaminants. A matched locking plug and socket will lock together securely for protection against vibration and shock, or happily work individually with normal cigarette plugs/socket as well.

- PP1970 plug features a green power LED indicator
- Rated current: 10A
- Fuse protected (PP1970)
- PS1972 features protective dust cap and mounting panel
- Locking pins so stay plugged in when plug and socket matched

### USB & 12V Cigarette Lighter Power Socket (Switched)

A classy little panel!! It features an on/off rocker switch under a protective tamper-resistant cover. 16A rated - it will behave like a circuit breaker if current draw exceeds 16A, and can be immediately switched on again. The panel measures 130mm wide x 50mm high and will need approx. 70mm behind the panel for wiring access.

The switch turns the power on to both the 10A cigarette lighter sockets and the USB sockets, of which there are 2, one 1A rated and the other 2.1A, both at 5V of course. There are no inline fuses fitted but you could reconfigure the wiring easily as everything connects by 1/4" QC tabs. Mounting is via two countersunk holes 4mm dia.

### 3 Way Cigarette Lighter Sockets with USB Power & Voltmeter

You get three cigarette lighter sockets, two high current 2.4A USB charging sockets, and two standard 1A USB charging sockets. Of course, a 120W maximum total applies (since that's the maximum rating of the one in your dash). The three cigarette lighter sockets aren't voltage regulated, so they'll output the same voltage as your vehicle, however the USB charging ports are regulated to 5VDC regardless of the input.

## TRAILER WIRING ACCESSORIES

Before 1988, the only trailer connector in common use was a 6 pin unit (There were some 5 pin plug/sockets found in VIC, TAS, SA & NT). Since 1988 you must have a 7 pin (minimum) connector in order to register your boat, camper trailer etc. (You may need a bigger connector in some cases, so consult an auto electrician for this) in both Australia & New Zealand. You can, however, in the case of small box trailers use 5 core wire. See below.

## Trailer Connectors

There are now three types of trailer connectors - each with its own wiring configuration. See our website for full details of pin connectors and colours...

## Re-Wireable Trailer Connectors - 7 Pin

A range of the most common 7 pin trailer plugs and sockets, featuring easy to use screw down terminals, corrosion resistant metal contacts and high quality UV stabilised plastics. In each type, the socket is fitted to the vehicle, and the plug is fitted to the trailer.

- All trailer plugs and adaptors are made from the highest quality material.

## 5 Core Box Trailer Cable - 10m - Tinned

A 10 metre length of the standard 5 conductors sheathed in a tough black PVC jacket. Conductor colours are listed below. Makes wiring easy.

- Yellow (Left indicator)
- White (Earth)
- Green (Right indicator)
- Red (Stop light)
- Brown (Tail light, no. plate & clearance)

\* Suitable for box trailers only.

You still must use 7 pin connectors.

## Trailer Plug Adaptor Leads - 7 Pin

Often we find that the trailer we've borrowed from a mate does not plug into the socket on your vehicle, and that's where these trailer plug adaptor leads come in handy. About 300mm in length, and 6 versions available to fix up any mismatch of the 7 Pin Flat, 7 Pin Large round and 7 Pin Small round trailer connectors. Remember, match the plug end of the adaptor to the socket on your car, and the socket end of these adaptors to the plug end on your trailer.

## CAR LIGHTING - TRAILER LIGHTS

## 12V LED Trailer Lights (Stop/Turn/Tail)

Regular bulb failures in your trailer lights are not only a pain in the posterior, but also quite dangerous to your fellow road users. Switching to LED alternatives solves this problem completely, since LEDs are not at all affected by shock and vibration, last over 50,000 hours, use a fraction of the power, and are actually more visible to other road users. These trailer lights are an "all-in-one" solution measuring only 100mm wide by 90mm high, and providing all the legal illumination needs of a caravan, boat trailer, camping trailer etc., being; Stop, Tail, Turn and number plate illumination. They appear to be quite water resistant but we cannot quote an IP rating for water and dust. Also has a red reflector panel.

- Screw stud mount.

## 12V LED Trailer Light Kit with Wiring

Regular bulb failures in your trailer lights are not only annoying to replace, but also quite dangerous. LED alternatives solves this problem completely, since LEDs are not at all affected by shock and vibration, last over 50,000 hours, use a fraction of the power, and are actually more visible to other road users. These trailer lights are an "all-in-one" solution measuring only 100mm wide by 90mm high, and providing all the legal illumination needs of a caravan, boat trailer, camping trailer etc., being; Stop, Tail, Turn and number plate illumination, along with a red reflector panel. The housing is submersible which is perfect for boat trailers, and each light is fitted with a connector to make wiring easier. The kit includes 2x trailer lights, a pre-made 7m trailer cable with 7pin flat trailer connector. Sold as a pair.

## CAR LIGHTING - EXTERIOR

**WARNING:** State roads & traffic authorities prohibit the retrofitting of these products to cars with normal headlights. To be used only for off-road and showroom vehicles when replacing quartz halogen bulbs, or as headlight replacements for HID factory-fitted new model vehicles.

### Slim Ballast Xenon HID Light Kits

HID provides far greater light output than standard automotive lights. At night, road signs, pedestrians, and general road hazards will receive much better illumination so you can drive with more confidence. This series of kits all feature a slim ballast design for ease of installation in engine bays and tight spaces.

- Ballast: 85(L) x 61(W) x 15(H)mm
- Lifespan: >2500 hours
- 300% more light than halogen
- HID 92 Lumens per watt compared to 18 Lumens per watt for a halogen

### Headlamp Kits with Luxeon Z ES LEDs

Bright vehicle headlamps with advanced LUXEON Z ES LEDs. Each light comes in an alloy bodied case and connects via the supplied ballasts. The kit contains 2 x LED modules, 2 x controller assemblies, and all the wiring is pre-terminated to appropriate connectors to make installation as quick and easy as possible. 3,000 lumens for 40W (H4) of power light output. These modules will last up to 10,000 hours and are very efficient.

- Accurate LED position to ensure correct beam pattern
- More spot without glare
- Plug and play
- High intensity

## EXTERNAL LIGHTS & SPOTLIGHTS

### 1,136 Lumen LED Vehicle Floodlight

Compact but powerful, it uses eight 1.5W Osram® LEDs to throw a huge, wide beam in front of you. A broad 50° angle gives you plenty of light spread, while still retaining up to 57m illumination range. Powered from 12-24VDC so they're suitable for trucks too, they're built tough. Protected against shock, water, and UV shielded, their powdercoated aluminium frame and stainless steel mounting hardware will go anywhere you do.

### 2,272 Lumen LED Vehicle Floodlights

These are stunningly bright floodlights, with a massive 2,272 lumen output. Available in a round or square aluminium enclosure to suit your personal style, both styles encase the same LED array and produce the same light power. Built with 16 individual 1.5W Osram® LEDs for huge light output, they're shockproof, weatherproof, and UV shielded. Powered from 9-36VDC so they'll run on cars or trucks. Fitted with stainless steel mounting hardware.

## 12VDC 30A Relay Wiring Kits

Taking a shortcut might be fine when you're driving through the bush. But don't do it with your electrical wiring. These relay kits take the hassle out of figuring out relay wiring, to provide a safe and easy method to install any high current device. That might be a fridge, driving lights, awning lights, or anything else. By wiring through a relay, you're not feeding all the power through your switch mechanism, which keeps the high current cabling to a minimum. They're easy to install and will save you time. Two models available. Each kit includes a 2m wiring loom, 30A relay, a contour style switch, and one or two high current outputs.

Tech talk

Because the LED lamps run cooler, you can run the lights with the covers on. Great for foggy/misty conditions. (A quartz lamp would melt the cover!)

## Free Boxes!

MOVING HOUSE? NEED SOMETHING FOR STORAGE?

In the course of running our business, we go through thousands of stout cardboard boxes that become surplus to our needs. If you need a box - even several - just ask and we will probably have half a dozen or so that could be suitable for you. They are FREE and you are doing yourself and us a favour by recycling them.

## How to Wire Up Driving Lights

Fitting spotlights or driving lights to your 4WD, ute or other vehicle is generally pretty simple when you use a relay wiring kit like our SY4081 shown above, but it pays to wire it correctly to avoid any hassles with the law. Most states follow the requirements of the Australian Design Rules (ADRs), which requires that they be wired so that they only operate in conjunction with the head light circuit and are fitted with an independent ON/OFF switch - however, some states require them to only operate in conjunction with the HIGH beam circuit and with an independent switch. Check with your local transport authorities for rules in your area.

### LED T10 3D Wedge Globe

Many cars are now employing an electronic control system called CANBus, which can be a problem when using LED replacement globes as the system will give a globe failure indication. Being CANBus compatible, these LED globes don't cause these failure indications. Each globe features a special "3D" type of LED lamp, which provides an extremely even, wide light output that is very similar to a normal globe in style and appearance. This makes them a perfect replacement for interior lights, and automotive lamps where the light fitting has a lot of "clear" elements making other LED globes unattractive to look at. Powered by 12VDC, and suitable for off-road use only.

### 4 x RGB LED Strips with Controller for Car Interior

Add some colour and lighting effects to your car interior with these bright RGB LED light strips. The kit includes four LED strips with twelve LEDs in each, a controller and a remote control. The LEDs can be remotely controlled to change between eight different colours with four different lighting patterns. The lights can be set to change with the beat of the music, and the brightness and speed can also be adjusted.

### LED Replacement Globes with 6 x 5730 SMD LEDs

This range of common automotive and general use LED globes are also compatible with modern CANBus systems, so that they don't give globe failure warnings when you fit them to your modern vehicle. Each globe is powered by 12VDC, is fitted with six high brightness 5730SMD type LEDs, and have a non-polarity circuit so you don't have to worry about fitting them the right way around. There are two models to choose from.

## CANBUS COMPATIBLE GLOBES

### LED Festoon Replacement Globes, CANBus Compatible

A range of ultra-bright LED replacement "festoon" globes for car interior lights, which are fully compatible with modern "CANBus" systems that would otherwise give a globe failure warning when using an LED globe. Each globe features six ultra bright wide angle SMD LEDs, a non-polarity circuit (can fit the globe either way), and a CANBus circuit. There are three models to choose from, each working on 12VDC.

## CANBUS COMPATIBLE GLOBES

## CANBus Compatible Automotive BA15 Type LED Replacement Globes

More and more modern vehicles are employing an electronic control system called CANBus, which has many benefits including monitoring of globe failures. This can pose a bit of a problem with LED replacement globes causing the CANBus to detect that globe as having failed. This range of BA15 type LED globes are all CANBus compatible (won't give errors), with universal polarity, very low power consumption and a high lumen output. For off-road use only.

- Powered by 12VDC, can be used as tail/brake light (BAY15D), parker light (BA15S), or even as interior light globes (BA15D/BA15S) thanks to their high brightness
- The BA15D is very commonly used in caravan and marine interior lights

## Automotive Globes

You may look at our range of LED automotive globes and wonder what all these different globe numbers mean: BA15S, T10, E10, BAY15D, etc.

Well luckily these numbers are an industry standard, and actually describe the type and size of the globe's base and pin arrangements.

Below is a list of the most common types of automotive globes, and a typical application for them:

- T5** 5mm wedge style base. Used in dashboard illumination
- T10** 10mm wedge style base. Used in dashboards, park light, number plate illumination, etc.
- T20** 20mm wedge style base. Used in some indicators, tail and brake lights
- E10** 10mm Edison screw base. Used in some dashboards, park lights and number plate illumination (typically on older vehicles)
- BA9S** 9mm Bayonet cap base with single contact pin. Used in dashboards, park lights and various lights
- BA15S** 15mm Bayonet cap with single contact pin. Used in indicators, tail, parker and some brake lights
- BA15D** 15mm Bayonet cap with two contact pins. Used in caravan interior lights and marine navigation lights
- BAY15D** 15mm Bayonet cap with offset side location tabs, with two contact pins on the base. Used for tail/stop lights (high/low brightness)

## CAR LIGHTING KITS

## Universal T10/211/BA9S LED Retrofit Kits

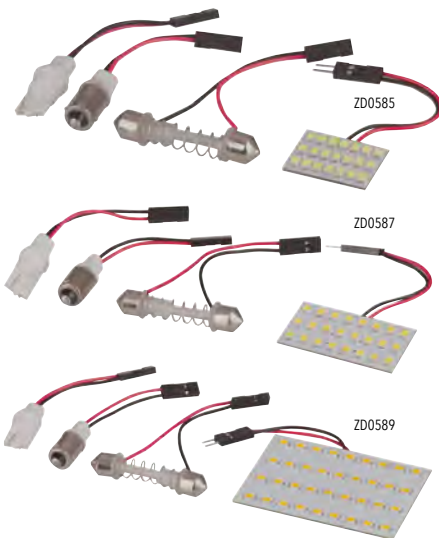

Fantastic little kits to upgrade your car/caravan/boats interior lighting with LED technology. Each kits consists of an array of LEDs on a board with 3M adhesive foam backing, making it easy to retrofit into almost any existing light. There are 3 bases which can connect to T10, 211, or BA9S sockets. The base is then connected to the SMD LED array, couldn't be easier! The LEDs will give greater lifespan and brighter light in many cases.

Three kits available:

## LED POWER SUPPLIES

In efforts to conserve energy globally, Mean Well has consistently introduced new series of LED Power Supplies. Our range includes a wide range of products which offer higher efficiency, lower power dissipation, compliance with the latest domestic and international lighting regulations. Mean Well LED Power Supplies are ideally suited for street lighting, architectural lighting, decorative lighting, embedded lighting, indoor lighting, stage

### Non-Dimmable - APV Series

The APV series is ideal for users looking for a low cost, reliable constant voltage LED driver for use in indoor applications. All models are subjected to a 100% full load burn in test and these LED drivers are backed with a 2 - year warranty. 94V-0 flame retardant plastic is used in the manufacture of the plastic housing and all models feature a full suite of safety protections including short circuit, overload and over voltage protection. The APV-12E and APV-16E Mean Well LED drivers are supplied with a 1.8m input lead and plug.

- 180~264VAC input only
- Rectangular plastic case with IP42 level
- Low cost, small and compact size
- Constant voltage mode for APV-E series
- Suitable for indoor LED lighting and moving sign applications

and theatre lighting and LED signage. Because of the robust design and high protection levels against dust and moisture, they can be installed in many indoor and outdoor LED applications.

### Dimmable - LPF Series

The Mean Well LPF-D series is a plastic bodied - constant current dimmable LED driver. It comes with a 5-year warranty and 1.8m input lead and plug. Models in this range have an IP67 ingress protection rating making them suitable for outdoor applications in tougher environments. These can be used in LED panel lighting, LED downlights, LED decorative lighting, LED tunnel lighting and many other applications.

- 90~305VAC input, built-in active PFC function
- Fully isolated plastic case with IP67 level
- Class II design, without FG
- Built-in 3 in 1 dimming function (1~10VDC, PWM signal or resistance)
- Suitable for LED lighting and moving sign applications
- Supplied with 1.8m SAA approved input lead

### LED Drivers - ELG Series

The ELG series is Mean Well's latest generation of IP67 weather proof LED drivers that come with three in one dimming options.

- 0-10V dimming
- PWM signal dimming
- Resistance dimming
- 100~305VAC input range
- Built-in active PFC function
- No load/standby power consumption <0.5W
- Metal case, IP67 design for indoors or outdoors
- Function options: 3 in 1 dimming (0~10VDC or 10V PWM signal or resistance, dim-to-off);
- Suitable for LED street lighting & outdoor LED lighting
- Constant voltage & constant current mode output
- Supplied with 1.8m SAA approved input lead

\*Note: A PWM signal is used to vary the current amplitude of the output, this LED driver does not have a PWM output.

## SMART LED BULBS

## Wi-Fi Smart LED Bulbs with Colour Change

These smart LED bulbs can be controlled from an App on your Android or iOS phone or from voice commands using your Alexa or Google Assistants. From the comfort of your seat (or from anywhere across the internet) you can easily command the light to adjust for your mood, from a comforting warm white up to a cool white for reading, etc. You can also dim the brightness without the need for an external dimmer, and set up automatic schedules using the App. Family members can be provided access to control the same devices, and multiple lights can be controlled simultaneously. Available with Bayonet or Edison Fittings, sold individually or in three packs.

Note: 2.4GHz Wi-Fi network required. An Amazon Alexa or Google Assistant is required for voice functionality.

## LED REPLACEMENT LAMPS &amp; ACCESSORIES

## LED Replacement Lamp for 2D Fluoros in Caravans

One of the most common lights used in caravans up until quite recently, is the 16W 2D fluoro. The problem with these is not only do they draw a lot of power for the light they produce, but they also blow very frequently, take a long time to "warm up", and they aren't very pleasant on the eye. This LED replacement lamp solves all that! The circular shape metal core PCB is backed with the same moulding as a normal 2D fluoro, so it fits into the same light socket - all you have to do is bypass the fluoro ballast and supply the lamp with 12VDC directly. No need to carry spare globes as the LED lamp is impervious to vibrations, and the LEDs are rated to last over 50,000 hours.

## LED Information

Power supply requirements for LED lamps or lighting modules, such as MR16 LED downlight replacement globes, can vary considerably and it is essential that a suitable power supply is used.

Switchmode transformers, or "electronic transformers" that are designed to run halogen lights, should not be used with LED lighting modules or lamps unless they are specifically certified to do so.

LED lamps are compatible with all types of magnetic (linear) transformers, but not all types of switchmode transformers.

Most halogen lamp switchmode transformers require a minimum load to function correctly & output a high frequency pulse train based on the load requirements. As LED lamps draw a fraction of the current of an equivalent halogen lamp (typically ~1/10th), this usually results in problems such as flickering, strobing, or in some cases, no light at all. It may also reduce the life expectancy of the LED lamp.

It is essential the maximum input voltage of the LED lamp or module is not exceeded and the power supply can deliver the necessary current required in a linear manner.

If using switchmode or electronic power supplies, make sure they are designed for use with LED lamps, otherwise use a linear or DC output power supply.

## FLEXIBLE LED STRIP LIGHTING

### Flexible Adhesive LED Strip - 5m roll

When the absolute brightest light possible isn't what you are looking for, then these competitively priced flexible LED strips are what you are looking for. These strips still use the same super efficient 5050 SMD LED package as our ultra bright LED strips, but each LED has around 20-40% less light output than our ultra bright versions. Everything else is the same; there are 60 LEDs per metre, the flexible strip can be cut into sections every third LED to create separate strips to your desired length, the strip is backed with 3M brand adhesive tape, and each section had solder pads to enable you to wire up to your desired configuration. Sold as a full 5 metre reel in cool white and warm white colours, they are an excellent solution to thousands of lighting applications such as display cabinets, under bench lighting, accent lighting, caravan camping, 4WD, mood lighting, etc.

### Ultra Bright Flexible Adhesive Strip - Per Segment

These flexible adhesive LED strips are made using the highest brightness 5060-SMD type LEDs, and feature 60 of these LEDs per metre of stripping. Each strip comes as a 5m length, which can be broken down into individual 5cm sections with 3x LEDs that can be individually soldered to apply power. We understand that not all applications require a full 5m length, so we cut them to length and sell by the 5cm section, so that you can get the exact length you require. The strip itself is a flexible circuit board, backed with quality 3M brand adhesive tape to ensure a long term adhesion to your mounting surface. Powered by 12VDC.

### RGB vs. RGBW

You may be thinking we have a typo in our text when you see RGBW. However it's accurate, and a little different to regular RGB strip.

In addition to the Red, Green and Blue LEDs, there's a pure white LED also.

Typical RGB does a fairly good job of giving you a white-ish light output, however, nothing beats true white LED.

While it might not make too much difference if you're using it for a little illumination while camping, the true-white makes all the difference when reading and using technology.

In addition, the extra white provides additional colour-blending options to get even more colour shades from the light. Now you can have light pink, light green, or anything in between, and still have a high volume of light output.

### Motion LED Strip - 1m

Powered by just 4 x AAA batteries with 30 x LEDs on a flexible strip! Simply switched on and off using the controller, or better still; use the internal motion detector to automatically switch on when there's movement detected!

### Motion Activated LED Strips - 2 x 1.5m

This is ingenious. It essentially contains two long LED strips, which are connected to motion sensors. Simply mount them under your bed, cabinets, or cupboards. If you get up during the night, or your kids come and greet you before the sun rises, it will automatically create a soft glowing light to help you see what's going on. If there's no more movement, it will automatically switch off after around 25 seconds. They're mains powered so there's no batteries or recharging to worry about, and each strip has 45 LEDs to create a soft glow. The LEDs are very warm white (around 1600 Kelvin) so they're not jarring at night either. Of course, you can override the motion sensor to simply create nice bedroom mood lighting if you like too. Includes everything you need including mains power supply.

### USB Powered Trimmable RGB LED Strip - 1m

Featuring 30 RGB LEDs along a 1m strip, for great light output with colour-changing dazzle. Attach it to your laptop, TV, a wall, wherever you like! Unlike many designs, this light strip can be trimmed down at any of the 30 points between the 30 LEDs, so you can "fit it" to whatever you like. A small remote inline with the power lead provides light mode, colour-change, and on/off controls. Power from a USB port using the provided 1m USB lead.

### RGB LED Flexible Strip Light - 5m Roll

This is an extremely versatile lighting solution. The 150 RGB LEDs allow you to change the colour to suit your mood, match your shoes, or just change it just because you want to. It uses a handy remote control for all on/off/colour selections, and you can change the brightness of any colour too. You can even trim the LED strip to a shorter length if required. Amazing! Totally flexible and self-adhesive strip. Mains power supply included.

### Ultra Bright IP67 Weatherproof LED Flexible Strip Lights

Fully weatherproof yet flexible. They're made from an array of ultra high brightness 5050 SMD-type LEDs, 60 LED's to each metre of strip light. Everything's encapsulated in a protective casing to keep the dust and water out. Weatherproof male / female connections are provided at either end. 12VDC powered. The 1m version can be daisy-chained (up to 5 together), and it's available as a single 5m run too. The 5m version should not be daisy chained, instead run an individual power connection to each 5m length.

### Smart Wi-Fi RGBW LED Strip Lighting Kit with Easy App Control

A 5m long RGBW LED strip light that can be controlled from an App on your Android or iOS® phone, or from voice commands using your Alexa or Google Assistant. From the comfort of your seat (or from anywhere across the internet) you can easily command the light to adjust for your mood, from a comforting warm colour to cool white for reading, or set to produce colourful patterns that can flash with the rhythm of the music playing on your Smartphone. Great for use in an entertainment area or a display case at the office or exhibition space, for example. The App also enables you to dim the brightness and to set up automatic schedules to turn the light on or off at a pre-set time. Family members can be provided access to control the same devices, and multiple lights can be controlled simultaneously. The included double-sided tape backing makes installation easy.

## Strip Lighting

Our range of LED strip lights are made using some of the most common type of SMD LEDs used in LED lighting products; the 3528 type, and the 5050/5060 type. Their model designations actually come from their footprint dimensions: 3528 = 3.5x2.8mm, 5050 = 5.0x5.0mm, and 5060 = 5.0x6.0mm. The 3528 type is a single LED emitter type in a very compact package, whereas the 5050 and 5060 type are commonly referred to as "triple-chip" due to

having three LED emitters built into the one package. The 3528 typically offers superior lumen performance per emitter and greater light efficiency than 5050/5060, but the 5060/5060 triple-chip types are more cost effective due to lower manufacturing and production costs when built into a finished product.

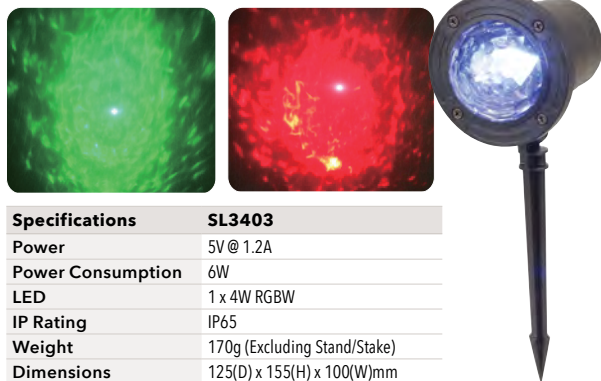

## SPECIAL APPLICATION LIGHTING

### LED Projection Light

This is a convenient and fun way to light up your home or garden to get things into party mode! There's no need to hang hooks and find the blown globes. This self-contained unit features an extremely bright 4W RGBW LED. You'll be dazzled by a great assortment of illuminating light patterns in a mesmerising display. Mains powered, IP65 weatherproof housing. Includes a garden stake, stand, and wall-mounting kit.

## ELECTROLUMINESCENT (EL) WIRE

### 3m EL Wire Light

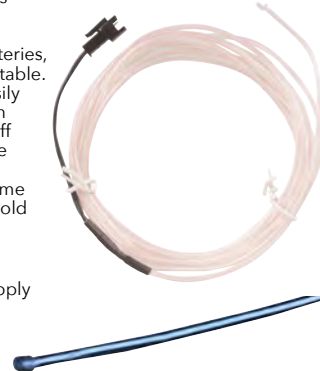

#### Electroluminescent Lighting

Add amazing colourful lighting to your party, costume, signage, decorations, etc. These 3m long flexible wires can be bent into most shapes and glow (similar to a neon light) when power is applied. Power is provided using the compact EL controller (SL2440 sold separately), which runs off 2 x AA batteries, making it extremely versatile and portable. At only 2.3mm diameter it can be easily stitched into clothing or fastened with cable ties. Excess length can be cut off to suit your application (note: can't be re-joined). Up to 3 x EL wires can be connected at the same time to the same controller using 2 or 3 way splitters (sold separately).

- Dimensions: 3m length x 2.3mm diameter
- Requires SL2440 EL Wire Power Supply and Controller (sold separately)

#### Splitter modules sold separately:

### EL Wire Power Supply & Controller Electroluminescent

Small enough to fit in your pocket or stitched into a costume, and can power up to 3 x EL wires using the splitters available separately. Features a pocket clip and a push button to switch between constant or two flash speeds.

#### Compatible 3m lengths of EL wire sold separately:

##### Compatible splitter modules:

- SL2441 2-way 350mm
- SL2443 3-way 350mm

*Note: The controller circuit may emit a high pitch sound when in operation. This is normal due to the built-in inverter.*

## SOLID LED STRIP LIGHTING

## Solid LED Strip Lights - 12VDC

An efficient, bright and affordable LED lighting solution, which is safe and easy to install. Each strip features wide angle, high brightness SMD LEDs which are powered by 12VDC. They are fixed easily using the strong 3M brand self adhesive backing tape or mounted into a range of aluminium and plastic extrusions and diffusers available separately. Each 500mm length can be snapped into individual segments and are powered by either 12VDC or 24VDC. Applications include under cabinet kitchen bench lighting, hallway or mood lighting, marine/caravan/motorhome lighting, commercial strip lighting, retail shop fit outs, and many many more. Available in 8mm and 11mm widths, 12VDC.

- 8mm strips fitted with 3528 single chip SMD LEDs
- 11mm strips fitted with 5050 tri-chip SMD LEDs
- Strips can be snapped into individual segments and powered individually
- Strips can be integrated with our aluminium and plastic extrusions and diffusers

## IP65 LED Lighting Module Strings - 12VDC

A very flexible and weatherproof (IP65) solution for low power lighting; use for backlighting of signs, illuminating stairwells, marine lighting, caravan lighting, etc. Each string is supplied as a 1m length of wire, with ten "modules" containing three high brightness SMD LEDs along the length of the string. You can cut the string to supply power to each module separately if you wish, allowing for a whole host of different applications. Simply provide 12VDC power and you are in business. Available in standard 3528-LED or ultra-bright 5050-LED versions, in cool white or blue colours depending on the model you choose.

## SOLID LED STRIP LIGHTING CONTINUED

### Portable Multipurpose Cabinet Camping Light

A superb rechargeable LED light that you can use on-the-go or mount in your tent, caravan, camper, etc. The versatile 3-in-1 base holder enables you to mount the light almost anywhere using the supplied strong 3M® double-sided tape, timber screws and built-in magnets, and the 360° angle adjustment means you get light to where you need it. A 1m long USB cable is provided so you can charge the light's internal Li-ion battery from a USB power source such as a powerbank, computer or USB power adaptor. To operate, simply touch the button at the end of the light, which can cycle between natural, warm, and cool white light up to 200 lumens. An SOS flashing mode is also included if you need to attract attention. By holding the switch in, you are also able to dim the brightness from 100% to 2%, which can help save power if you only need some ambient lighting. The light can be used for other applications where mains power is not available, including cupboards and cabinets, garages, sheds, outdoor gazebos, etc.

## LED Cabin Lighting

LED lighting fixtures are ideal for areas that do not have mains power. LED lights draw such a small amount of current for their light output battery power (generally AA cell is all that is necessary). Indeed many fixtures have inbuilt battery compartments or simply require a 12V source. All units can be wired by DIY handy people. They are 12V safe or battery. They are ideal for caravans, sheds, boats - even cubby houses. With these products you never need to be scared of the dark again!

### Mini LED Light

Pre wired in a sleek and compact design, this is a perfect mini LED light for illuminating harsh areas. Using new advanced lens technology the LEDs increase light output for optimal lighting with minimal power. The 12 volt light draws 10% of the power of conventional lights. Sealed stainless steel construction allow for placement in tight spaces and harsh environments. Horizontal and vertical mounts provide a variety of mounting options. Can be used in step, board, accent lighting as well as marine applications!

### Remote Control 3 Piece LED Puck Light Set

This amazing kit of three LED puck lights takes the hassle out of adding lighting to, well just about anywhere! Each puck light contains not one, two, or three, but 5 ultra bright LEDs. There's no pesky wiring to get them to work though just install three of your favourite AA batteries in to each light and put them in a location that's begging to end the darkness. The included adhesive tabs also mean no screws are required! But these aren't your average puck lights, there's a central remote control to control them all! The remote control then caters for centralised on and off functionality, as well as a "low brightness" dim setting, or set them to turn off in 30-minutes automatically. Not near the remote? Simply press a puck light and it will turn on for you too. Amazing!

- High / low brightness modes
- 30 minute auto-off option
- Can be operated by remote or directly on each LED puck light
- Peel and stick adhesive
- No wiring required

# LED Worklights

POWER

## SUPER BRIGHT LED WORKLIGHTS / FLOODLIGHTS

Once again LEDs have revolutionised the established concept of floodlights and work lights. Up until recently a workshop light meant trailing a dangerous 240V lead, often across a wet or greasy floor. Now these devices are often 12V powered (there are still powerful 240V models for all night marathons). The portable ones are also great for outdoor functions at night, as well as camping and fishing outdoors. Once you have appreciated the portability of these bright, rugged and lightweight lamps you will wonder how you did without them.

### 5W Portable LED Worklight

Ultra rugged and totally portable. A huge 5W COB LED provides amazing light output with low heat. Convenient fold-out stand. Perfect for the work site, camping, and more. High / low light modes to suit your requirements.

### Slimline LED Worklights - IP65 - 240VAC

Avoid the heat and hassle of traditional Xenon / Halogen worklights. They're power hungry, generate a lot of heat, and there's nothing worse than a blown globe while you're trying to see what you're doing. These lights feature an integrated floor stand, and put out plenty of ultra-white bright light. They use far less power than their traditional counterparts, which is especially important when running from a generator or inverter power. They're IP65 rated so won't mind a little rain, and they're tough, so you don't have to wrap them in cotton wool to transport them in the back of your ute either. 10W and 30W versions available.

## 120 Lumen Ultra Bright COB Head Torch

This COB (Chip on board) head torch provides a very bright, wide, and uniform 120 Lumens of light (unlike other LEDs that emit directional light). COB LED technology has increased efficiency and life span when compared to other LED technology. Great for tinkering on the car at night, cooking snags on the campfire, in around the campsite, or just reading a book. Incorporating a comfortable and adjustable elastic strap. Made from shock resistant ABS plastic. Built to last.

## 250 Lumen LED Head Torch with Red &amp; Green LEDs

Designed with two distinct light sources to suit different uses. The first is a powerful Cree® LED for long range / torch style illumination when hiking or searching etc. The large COB LED can then be operated in white, red or green modes. This provides you a broad flood-style light which is perfect for more general illumination. Red and green modes are especially useful in adverse conditions. Shock-resistant case for durability. A small red light and whistle is also included on the head-strap as an additional emergency feature.

## FLEXIBLE OUTDOOR LED STRIP LIGHTS

### Flexible USB LED Strip Light with Mounts & Carry Bag

USB lights used to be the domain of gamers and computing enthusiasts. With the proliferation of USB power in portable power devices (power banks, mains inverters etc.), USB power is often more available than mains or 12V power. This waterproof flexible LED strip light connects into any USB port to power its 120 LEDs. Use it as a strip light, or keep it in the included nylon bag and it will behave more like a lantern! It includes magnetic sliders and reusable cable ties for absolute convenience. Lightweight and handy, perfectly suited for camping as well as a backup emergency kit.

### 1.2m Flexible LED Strip Light for Outdoors

A simple solution for campsite lighting. Just plug it into a 12V cigarette lighter socket, flick the switch and you have over 1,000 lumens of brilliant white light to light up under your awning, inside a tent, or anywhere else around the campsite. The 1.2m long LED strip is fitted inside a fabric strip with hook and loop backing allowing you to easily attach it to tent poles or awning frames. Metal hooks are also fitted for alternative mounting options. The supply cord is 5m long with a waterproof in-line switch. The LED strip is IP67 water resistant - so there's no worries if you leave it out in the pouring rain. Includes carry bag.

## FANS

## 12VDC Oscillating Fans

Keep cool in the stifling heat. If you need some extra air circulation in your car or truck grab one of these fans, mount it, and away you go. The models just connect to your cigarette lighter socket for power. The on/off switchbox includes screw mounting holes to give your installation a more permanent look. Clamp & suction mount bracket versions available.

## HEATING

### Heat Powered Fireplace Fan

This fan evenly distributes the hot air rising upwards from your fireplace or stove top to provide more effective heat circulation around the room. No batteries are needed! Simply sit the fan on a flat surface on top of the fireplace and it will automatically start to spin when the temperature exceeds around 60°C. The hotter it gets, the faster it circulates warm air throughout the room.

### Mini 240V Oil Heaters

Oil heaters are so safe you can leave them unattended. They will automatically turn off if tipped over and the cabinet will not get hot enough to seriously burn. You know this because you have them at home. Now JAYCAR has developed these wonderful products for outdoor camping, caravanning or RV. They are scaled down versions of domestic units, designed to fit into smaller environments.

#### 500W & 700W models available:

Check the modest external dimensions! They are simply plugged into a 240V and left. When you get back to your camp site you will be greeted with a toasty warmth! No waiting for other heaters to start up. They are noiseless, inexpensive, require no installation and energy efficient. You will love them.

- Temperature Adjustable
- 1.4m cable length

**These heaters are fantastic at the foot of the office desk to warm cold feet. The 500W unit is ideal for this!**

## Tech talk

## 12V kettles, how long is too long?

A lot of people bring these back as they are dismayed at the amount of time it takes to boil water. They often take over 20 minutes to boil 1/2 a litre of water. You need to look at the physics of this. A 12V Kettle will often draw 20 amps at 12V. This equates to 240 watts of power. Whilst this may seem a lot, it is generally only a fraction of a domestic 240V Kettle. They routinely draw between 1800-2200 watts of power. No wonder they are quick! 12V Kettles work, but the laws of physics are against them. You may be able to live with them once you are aware of the above.

## 12V Large Portable Stove

Perfect for cooking and/or storing food hot on those long trips. It gets up to 149°C and its insulated design keeps food hot, while the outside stays cool. It plugs into a 12V cigarette lighter socket in the car.

## PORTABLE SHOWER

## Athnor Portable Gas Water Heater

This portable outdoor gas water heater makes cleaning up after a day's adventure in the outdoors very easy. The adjustable temperature, water flow, and shower head makes it very versatile, from showering yourself or the kids to washing the dishes, cleaning pets, removing the mud or salt-water from your equipment, and much more. To operate, simply connect up your water source and LPG gas cylinder, and open the shower head to activate the heater. Water will heat to your desired temperature up to 45°C, which is shown on the LED display. Safety features include a temperature sensor to stop the water temp from exceeding 50°C, and a water flow sensor that only enables the burner to work when water is flowing. Supplied with shower head on a generous length shower hose and hanging kit with mounting hardware for temporary or permanent mounting. 2 x standard D cell batteries are required.

Note: For outdoor use only, hung upright, and not to be used for drinking water. A water pump is required (sold separately) when water pressure is below 0.25MPa.

- Easy to set up
- Adjustable temperature and water flow

## PEST CONTROL

### High Power 'Frequency Shifting' Ultrasonic Pest Repeller

Uses frequency shifting techniques which may prevent pests from developing an immunity. It has an output of 140dB that can protect up to 280m<sup>2</sup>. It may be effective against mice, rats, roaches, fleas, flies, crickets, silverfish, waterbugs, moths, ants, spiders and most other common pests. The ultrasonic frequencies used are out of the hearing range of humans & most household pets such as cats, dogs, fish and birds etc. We make no guarantees that this will solve your particular problem, but there are thousands of people who swear by them.

### Dual Speaker Pest Repeller

Emits ultrasonic sound waves which are extremely unpleasant for cockroaches, flies, crickets, silverfish, mice & other nasty critters. Laboratory research has shown ultrasonic sound waves attack the auditory and nervous systems of most common pests causing them pain and discomfort. The high intensity sound waves will end up driving away these pests. The frequency can be adjusted from 22kHz up to 49kHz, for driving away certain pests. A clean alternative to poison or dangerous traps. Includes mains power supply.

### Mosquito Zapper with 180 Lumen LED Lantern

This rechargeable electronic zapper measures 90mm in diameter and 130mm high. It weighs only 200 grams and features a nifty double hook to mount anywhere. The unit also features a soft white light (3 light levels) which can be operated independently of the zapper. The zapper can work with or without the light. When on, the zapper has an unobtrusive UV style light, which attracts the bugs. The bugs fly through the finger guard only to be confronted with a high voltage grid which either kills them instantly or stuns them. Result? No more bugs around your ears at 2am! It gets better. The unit is charged by USB! It works for about 8 hours on a charge, depending on insect kill rate and lighting level. Great for camping or at home.

### Collapsible Mosquito Zapper with Camping Lantern

Avoid sleepless nights in your tent, van or camper with this rechargeable mosquito zapper camping lantern. Instead of those pesky mosquitoes buzzing in your ear, they will instead be attracted to the UV light where they will be zapped dead. Simply slide the mosquito zapper out to turn it on, or collapse away to operate just as a lantern, which you can carry with the fold-out handle or hang using the integrated swivel hook. The push button switch on the case lets you select between high and low brightness or a flashing mode for times when you need to attract attention. The internal Li-Po battery can provide power for up to 6 hours at 50% brightness, which can be charged from an available USB power source. The lantern also features an emergency USB port to provide enough power to charge your phone so you won't be left stranded.

### UV Rechargeable Mosquito Trap

Trap those pesky mosquitos to get a peaceful night's sleep with this effective rechargeable mosquito trap. It works by attracting the mosquitos with the detachable mosquito bait, specially designed UV light and uses a fan to suck the mosquito into the collection trap below. The funnel design stops the mosquito from escaping. Thanks to its internal rechargeable battery, you can use the trap virtually anywhere, including a bedroom, caravan, tent, etc. To charge, simply connect it to an available USB power source. Includes USB charging cable and mosquito bait. Once bait is opened the bait will last approximately 1 month depending on weather, the hotter the weather the shorter the bait will last and the colder the weather the longer it will last. The mosquito baits shelf life is 12 months.

## **Before Drones...**

For many years before drones hit the mainstream, we've been selling flying toys. In the early 2000's our first helicopter was loads of fun. It only flew for about 5 minutes, and had no real steering control. Certainly not compared to the current models we have. Though admittedly it was rather stable in the air, which was a great advance in the technology at the time.

Naturally the technology has come a long way since then with models featuring obstacle avoidance, high resolution cameras, and so much more.

We now carry a range of amazing drones and R/C toys, great for kids (big and small). Our R/C car lineup this year is particularly great.

### Laser Battle Gun and Drone Set

Let the battles begin between you and your drone. Simply toss the drone into the air and it will automatically hover and be ready for a shootout. Be the first to get three successful hits with the infrared light beams to win the game. You need to be careful though, as the drone flips to avoid being hit and quickly fires back. If you are accurate with your blaster, the drone will shudder with each hit, and then safely descend to the ground when it has no more lives. The drone features anti-collision, 180° flip, cool colourful lighting and sound effects, and can be operated as a gesture controlled drone with your hands to control its direction. The blaster gun features voice and sound effects, an LED life indicator, one-click reload switch, four weapon modes and sounds, and a team colour switch. Up to four teams can battle it out at the same time so you can challenge friends and family who have a similar set to laser tag. The blaster requires 3 x AAA batteries (sold separately) and the drone can be charged using the supplied USB charging lead. Recommended for ages 8+.

## HELICOPTER

## 2.4GHz R/C Helicopter 2-in-1 Air and Land with Hover Mode

This Osprey-inspired R/C helicopter has ground and air modes so you can taxi it across the floor just like an R/C car, and then launch into the air at the touch of a button. It is easy to fly, has great stability and maneuverability, can perform flips and rolls, and can hover thanks to its altitude hold. Features headless mode, direction fine-tuning, and two-speed settings to suit beginners or experienced pilots. A low voltage alarm and low power auto-landing help ensure a safe landing. To charge, simply connect it to a USB power source using the provided USB cable. Remote requires 3 x AAA batteries (sold separately).

- Air and ground modes
- Flips and roll
- One touch takeoff and land
- Headless & altitude hold modes

## QUADCOPTERS

## Mini R/C Quadcopter with LEDs

This agile remote controlled quadcopter is very easy to fly and has LEDs built into the rotor surrounds for a dazzling aerial show as you fly. Take off or land at the touch of a button or to perform amazing 360° flips. The durable rotor surrounds help bounce the quadcopter off walls, and thanks to the built-in 6-axis gyro and barometer, the quadcopter maintains its altitude and provides a very stable flight. The headless mode option keeps the quadcopter moving in the same direction as you rotate and perform stunts, and a speed switch on the remote toggles between beginner or experienced flying modes. The compact remote provides a range up to 30m, and runs off 2 x AAA batteries (sold separately). A USB charging lead is supplied to charge the quadcopter from an available USB power source. Ages 14+.

## Important Safety Information!

In operating drones you become a pilot with responsibilities and must comply with rules set by relevant government authorities. Before you fly a drone be sure to check out the safety information guides put out by the relevant authorities shown below. You can download these guides from our website, pick up the guide in our store, or by visiting the following websites:

## 720p FPV Wi-Fi R/C Drone

Watch a live video feed from the high definition camera onboard this agile remote controlled drone as it flies in the sky above. The front facing 720p camera can be adjusted 60° from the remote control to provide a first person view (FPV) on your Smartphone via Wi-Fi from up to 60m away. Take-off and landing is made easy using just one button, and a return home function means that you can safely get the quadcopter to return back to you before the battery runs out. The headless mode option keeps the drone moving in the same direction as the drone rotates and perform stunts, and a trajectory flight function enables you to draw a flight course on the touch screen of your Smartphone. When you have finished flying, the rotor arms fold in so it takes up less room for easy storage. The remote control has a universal phone bracket to hold your phone. A USB charging lead is supplied to charge the remote and quadcopter from an available USB power source. Spare batteries are sold separately (GT4147) so you can keep flying while your other batteries charge.

## Waterproof Metal Detector with Large LCD

Ideal for beachcombing and prospecting as well as finding objects in obscured locations such as long grass, this high grade portable metal detector is suitable for many applications. Capable of detecting a coin at up to 180mm depth it will detect a variety of metals, with three different tones to distinguish dissimilar metals. Operating at a low frequency of 6.6kHz, the detector will only respond to metal objects and ignores the effects of iron ground mineralization, making it more accurate for locating at large depths. Alternatively, the all-metal mode can be switched on to enable any underground metal traces detected and is signalled both optically and acoustically. An extra large waterproof pick-up coil with its intricate two-dimensional helical winding technology enables very fine and precise measurements to be carried out while carrying it comfortably with the arm support.

- Adjustable sensitivity
- Deep target searching
- 3 Operation modes: All metal, Disc, Notch
- Ferrous/Non-ferrous indicators
- Waterproof search coil
- 3 Tones for different metal indication
- One touch auto ground balance
- Headphone jack & 2" speaker
- DSC and GND adjustment
- Requires 2 x 9V batteries

## TRAVEL GADGETS

## Fuel Cell Breathalyser with Advanced Flow Detection

This personal breathalyser uses an internal fuel cell to measure alcohol in your breath, which is one of the more accurate ways to test. Testing is simple, and blood alcohol is presented as a percentage on the backlit LCD display. Of course, all measurements are an indication only and you should only use them as a guide. The safest blood alcohol to drive with is zero. Features include a breath sample flow check, memory of the last 16 results, cumulative test counter, and a sensor self-diagnostic system. Just one AA battery is required for power. An auto-off function extends battery life, and a battery low indicator reminds you when its time to change the battery. Mouthpieces are supplied, and a pack of six (QM7321) can be purchased separately.

- Fuel Cell Sensor
- Breath Sample Flow Check Technology
- Backlit LCD screen

Note: Readings taken with these devices are for reference only. In spite of their quality and accuracy, errors may occur due to operation or environmental conditions and we accept no liability or responsibility whatsoever for any consequences arising from the use of these devices.

## 40 Years of Sight and Sound

Well before Bluetooth\*, prior to 4K, and even before digital audio, Jaycar has been a leading supplier of fantastic audio products, including speaker kits, car audio, and of course all the related accessories.

Our range has evolved over time, with hardware becoming smarter and faster, pushing the boundaries of what high fidelity means, often while getting cheaper and smaller.

We continue to stock a huge range of parts and accessories, while embracing the latest technology.

**ETI 4000/1**  
**4-WAY SPEAKER SYSTEM**

For those not prepared to compromise, this is the David Tilbrook's all-out effort has resulted in a system which can only be described as brilliant. Those who have heard it have been unanimous in their praise, the 4000/1 to systems costing three times the price with embarrassing results! The design has been made possible with Philips latest generation of distortion drivers, used in a highly sophisticated format. All drivers work only in their optimum range and are coupled with a complex phase crossover, using only highest grade components. You want one of the finest systems available at any price, can put it together yourself!

Drivers: AD12250/W8, AD70620/M8, AD021610/T8.  
 Speaker kit includes all drivers and crossover but does NOT include cabinets.  
**\$599.00**

**ETI 4000/2**  
**3-WAY SPEAKER SYSTEM**

This system, while using much of the knowledge of the design of the 4000/1 system is a simple compact system designed to offer a very high performance at a significantly lower price.

The system uses the same drivers as its larger brother, but misses out the upper bass/lower midrange driver. The crossover is a complex octave constant-K design, carefully tailored to the drivers used are: AD12250/W8, AD021610/T8.  
 Includes all drivers and crossovers (pair) but NOT cabinets.

## Bluetooth® 5.0 Explained

Bluetooth® 5.0 offers many benefits over earlier versions: Lower power consumption (for longer battery life), twice the data rate (up to 2Mbps), 4 x the range (up to 240m) and 8 x the broadcast messaging capability of Bluetooth® 4.2.

That's not all, with Bluetooth® 5.0 Dual Audio, you can stream music to two different speakers at the same time! But to benefit from all the new Bluetooth® 5.0 features, you need to have both devices compatible with the new standard.

### Sci-Fi Bluetooth® Speaker with TWS

Fans of everything sci-fi will fall in love with the sci-fi inspired Bluetooth® speaker. It also packs a ton of useful features. The TWS Mode (True Wireless System) allows you to sync the sci-fi speaker with another TWS enabled Bluetooth® speaker. You can enhance your sound or set up the speakers across different rooms. With Bluetooth® 5.0, you get more range and improved speed. The connection is fast and more stable, allowing for smooth, glitch-free playback. Packed with a 17W subwoofer that delivers powerful bass despite its compact size. After 10 minutes of inactivity, the speaker will automatically power off to extend its battery life. Its body light also acts as a cool ambient light.

- True Wireless Stereo (TWS)
- Adjustable Bass Control
- Green LED Flashing Lights

#### TWS Explained

True Wireless Stereo (TWS) technology allows you to wirelessly connect two Bluetooth® speakers together to provide you true left and right channel stereo quality sound. Once your smartphone, tablet or laptop is paired with the main speaker; connect a second speaker which will act as a slave and be able to play the same music in stereo format. Any speaker that supports TWS technology can be paired together without the need for messy cables or wires.

2.4GHz Wireless Stereo Headphones with TOSLINK

Wireless headphones provide fantastic freedom for personal listening pleasure, but there's more than just no cable that makes these fantastic. Firstly, they have a powerful 800mAh battery for hours of listening, as well as a convenient charging dock on top of the base-station. No fussing about with cables, just rest them on the base station and they'll begin recharging. What's more is connectivity - standard 3.5mm stereo audio is a given, but with direct digital TOSLINK connection you can enjoy premium digital audio without an additional digital de-coder! It also includes various cables and mains plugpack so there's nothing more to buy!

- 3.5mm & TOSLINK audio connection
- Rechargeable headphones
- Headphones sit on-top of sending unit to charge
- Volume up/down buttons on headphones
- Headphones can be connected directly to audio source via supplied 3.5mm or RCA cables
- Quality 2.4GHz transmitter

**Free Boxes!****MOVING HOUSE? NEED SOMETHING FOR STORAGE?**

In the course of running our business, we go through thousands of stout cardboard boxes that become surplus to our needs. If you need a box - even several - just ask and we will probably have half a dozen or so that could be suitable for you. They are FREE and you are doing yourself and us a favour by recycling them.

## HDMI EXTENDERS

**50m 1080p Mini HDMI Cat5e/6 Extender**

These mini extenders plug straight into the HDMI sockets on the source and receiver, allowing you to run your full 1080p HDMI signal up to 50m! Cat6 cable is recommended for longer distance, however will work with Cat5e cables over shorter lengths too. The receiver uses Power-Over-Cable (PoC) technology so it receives its power from the transmitter using the Cat5e/Cat6 ethernet cable. Includes USB Micro B power cable and USB mains power adaptor.

## HDMI EXTENDERS CONTINUED

### 150m 1080p HDMI Cat5e/Cat6 Over IP Extender

Send high definition AV signals to a screen in another room up to 150m away using a Cat5e/6 cable or your gigabit network. A sender and receiver with power supplies are included, and additional receivers are available separately (use AC1753) to share the same AV signal to additional screens. Setup is straightforward and no software is required. Simply connect the receiver and sender into your gigabit network using Cat5e or Cat6 leads (not included) or directly with one long Cat5e or Cat6 cable (not included). Features an HDMI loop output, is compatible up to HDMI 1.4b with up to 10.2Gbps bandwidth, and compliant to HDCP 2.2. It even allows you to use your infrared remote control from the receiving point, so you can control the device you're sending video from.

### 4K HDMI Cat5e/6 Extender

Send UHD 4K signals from a set top box, media player, or other video source to another room up to 50m away over a Cat6 cable. Ideal for Pay TV, home theatre systems, meeting rooms, or to connect a computer to a display where they may not be in close proximity. The plug-and-play system provides a stable picture with superior audio and supports the latest standards including HDCP 2.2, DVI 1.0, and High Dynamic Range (HDR). There is a HDMI loop output on the transmitter, and the EDID (Extended Display Identification Data) can be switched to copy either the source or output device. For added convenience, an infrared extender is fully integrated, so you can use your remote control on the receiver end for full control of your devices too! Power is sent to the receiver over the Cat cable, and the infrared emitter and receiver each have short leads that enable you to mount the main units out of view.

- Up to 4K x 2K Video Resolution
- High-Dynamic-Range (HDR) Video Support
- Integrated Remote Control Extender

## SPECIAL FUNCTION HDMI HARDWARE

### 4x2 4K HDMI Matrix Switcher Splitter

Simultaneously routes up to four HDMI sources to two HDMI displays in all resolutions up to UHD 4K at 60Hz on all ports. This will add a level of convenience for households that have two TVs but don't want to buy another set of Blu-ray players, set top boxes, etc. A single Blu-ray player connected to the matrix would output its movie to two screens. This is also great for retail service-scapes, shopping centres, reception areas, and foyers. Flexible control using the on-panel button or from the comfort of your couch using the supplied remote control. Output A supports audio extracting to optical and analogue L/R outputs, and output B supports automatic 4K to 1080p downscale function if the source is 4K but your TV only supports up to 1080p. Support for 3D signals, High Dynamic Range (HDR), audio up to 7.1 surround, and smart EDID management so switching sources will be fast with minimal interruption.

- Up to 4K Video Resolution on all ports
- Optical and analogue L/R output on output A
- 4K to 1080p downscale support on output B

## 4 Channel IR Extender Kit

Some aesthetically pleasing home theatre setups may not be 100% functional. AV source devices may be hidden in a cabinet to create a clean minimalist setup. In these scenarios, the signal from your remote control may be partially or completely blocked. To overcome this you can use this IR repeater extender kit to give you control of your devices. Plug the IR receiver in (to receive signals from your remote), then connect up to 4 devices to the emitter outlets. The 3M adhesive backing on the IR receiver the emitters can be mounted in an unobtrusive location. The kit is 4 channel so will accept up to 4 source devices.

The IR repeater unit includes:

- 2 x Dual IR emitter cables included
- 1 x IR receiver cable
- 1 x Mains plugpack
- 1 x Repeater/Extender
- Mounting holes & screws
- Cable length: 3m

## Wireless IR Extender Kit

Wirelessly control your video sources such as cable TV, streaming boxes or Blu-Ray/DVD players from another room. Infrared remote controls usually have an effective range of only 5-10m, however this extender allows you to use your remote control on devices up to 50m away! Features in-built infrared ports for easy operation and infrared extension cables if you have devices hidden inside a wall or TV cabinet. Supports up to 4 transmitters with the purchase of additional kits for control to one or more TVs from the one source. Perfect for controlling a source device which is being displayed in a bedroom, garage, conference room or an outside entertainment area. Includes infrared emitter cable, infrared receiver cable and two mains power adaptors.

Note: Transmission distance varies depending upon the obstacles in between the transmitter and receiver such as walls or solid objects.

## DAB+ &amp; FM Audio Receiver with Bluetooth® Technology

This is a very flexible device. Firstly, it can be operated as a multi-input Bluetooth® transmitter. It is capable (as a radio) of receiving and storing up to 6 DAB+ or FM stations, as well as a line-in input and transmitting this via Bluetooth® to Bluetooth®-enabled remote headphones or speakers in stereo. Secondly, it can be operated as a Bluetooth® receiver accepting Bluetooth® signals and producing an audio line out of that signal. You could, for example enjoy music from your cell phone to a non-Bluetooth® stereo speaker set. (You must, of course have an amplifier to take the line output of this unit, either by powered speakers or a separate amplifier.) The unit, in either mode, has a backlit clock, and calendar/date display alarm etc. It could easily be a bedside unit. Supplied with an antenna cable, 3.5 stereo plug to 3.5 stereo plug cable and user manual.

Truly an ideal radio for the casual user and the enthusiast. It offers FM, MW(AM) stations and three Short Wave (SW) stations which range from 1,711kHz to 29,999kHz for receiving international broadcasts. The analogue tuning is assisted with a digital display and a tuning step, select fast for scrolling through the frequency or slow for that fine adjustment. Uses a Phase-Locked Loop (PLL) to ensure a stable reception. This unit is built with high performance IC's and MOSFET's that provide high sensitivity, strong anti-interference, low background noise and distortion. Includes a large back lit LCD displaying the frequency, clock, battery level and signal strength indicator. Other features includes AM RF gain, AM bandwidth switch, internal/external antenna switch, Local/DX antenna switch, IF out, total of 50 presets - 10 presets for each band (AM/FM/SW1/SW2/SW3), alarm function, snooze button, button lock, and the list goes on. Power options are 6 x AA (not included) used with supplied 6 x D size battery adaptors, 6 x D batteries (not included) or the supplied 9V PSU. Supplied with a carry strap.

## Tech talk

### What is World Band?

World Band Radios are those radios that are capable of tuning into radio programs generated by, say the British BBC, Radio Australia (Australian ABC Radio programs), Voice of America, Radio Vatican, etc. These programs are transmitted on a regular weekly basis in any one 24 hour period. It is generally preferable to use 24 hour time, linked to GMT (Greenwich Mean Time) which is the time it is in London (UK) so that confusion is eliminated as when the program is broadcast. There are dozens and dozens of programs from countries all over the world in the special languages of these countries. For example if you are an Australian citizen but originally from Greece, you can tune into stations that enable you to keep your knowledge of the language up to date. The stations typically have a lot of local news which you would normally not hear. The World Band stations are generally broadcast in several frequencies at the same time, typically between about 1.8MHz & 29.00 MHz, especially between 7 & 21MHz. You can look up the broadcasting details on Google etc. Phase-Locked Loop (PLL) is a circuit configuration invented over 80 years ago. Originally the circuit was so complex that it only appeared in expensive radios. With modern microchip technology, the PLL got a lot cheaper. The benefits of PLL technology enabled receivers to remain on a station frequency with great accuracy. The radio circuit did not 'drift'. PLL technology, though still not cheap, is a hallmark of quality short wave radios and that's why Jaycar specifies them.

## CD & CASSETTE PLAYERS

### Portable CD Player with Anti-Shock

Put that huge CD collection to good use with this portable CD player. These days, many Hi-Fi systems come with an iPod\* dock but no CD player! This one doubles as a personal music device (if you dare take it running), or can serve as a CD player for your larger Hi-Fi system via the Aux input it probably has. If you do want to take it with you, a huge 60-second anti-skip protection is built-in to keep the tunes playing. Powered by 2 x AA batteries (not included) for portability or it can also be powered by a 4.5VDC plugpack (not supplied). Includes a set of earphones on a 1.15m cable.

## AUDIO CONVERTERS

## Coaxial/TOSLINK to TOSLINK/Coaxial Digital Audio Converter

This is a bi-directional converter for changing digital audio signals. Connect your coaxial or optical source, and you can connect optical or coaxial (or both) outputs! This unique design means it can also be used as a signal repeater - great for long digital audio connections. USB powered (mains power supply included).

Specifications	AC1592
Input	1 x Coaxial RCA / 1 x TOSLINK (optical)
Output	1 x Coaxial RCA / 1 x TOSLINK (optical)

## Digital to Analogue Converter with 4-Way Switcher

Manually switch between four digital audio signals and simultaneously output to TOSLINK, stereo analogue, and a headphone output. Use it to switch the audio from your DVD, Blu-ray, Playstation, Xbox, HD player, PC, etc. to your amplifier or active speakers. Supports common audio formats including PCM, LPCM, DTS, Dolby-AC3, THX, and HDCD, and uses 192kHz/24bit DAC to minimise any audio loss. It automatically identifies the digital signal format and remembers the previous settings if the power is turned off. Status LEDs on each input flash when no audio is detected or when there is an input data error. Over-voltage protection helps prevent any damage caused by connecting signals unmatched to the device.

- 192kHz/24bit DAC
- Support LPCM digital audio converted to analogue audio output
- Automatic identification of input signal format
- Last state memory when powered off
- Over-voltage protection
- 3.5mm earphone socket with 30mW output
- No loss of quality

## Galvanic Isolation Audio Filter

When certain audio devices are interconnected, it's possible to end up with what is referred to as a ground loop. You may not know what that is, but it results in a rather annoying "hum" coming from the speakers. In a vehicle it can also change pitch with engine speed. A galvanic isolation filter can be used to eliminate this electrical condition, removing the hum from the audio so you can enjoy the music properly! No power required, it simply connects inline with the line-level RCA connections, and you're ready to go.

- Gold-plated RCA sockets
- Can be wall-mounted
- No power required

Specifications	AA3075

## SPEAKER SWITCHES

## Two Way Stereo Speaker Switch

This is a simple manual speaker switch so you can easily select between two different sets of speakers from the one stereo system. You can select from set A, set B, or A+B. Designed for use with 8-ohm speakers (the standard for HiFi speakers), you should check that your stereo can support 4-ohm speakers, since it will provide a 4-ohm load when using the A+B selection. Rated at 10WRMS per channel, plenty for indoor/outdoor speakers, ceiling speakers, and other applications.

- Non-shorting speaker contacts
- Select A, B, or A+B speaker sets
- No power required

## High Power Two Way Stereo Speaker Switch

Perfect for controlling two sets of speakers from the one audio source for your indoor/outdoor area, separate rooms, and more. Simple operation with pushbuttons for both A and B sets so you can easily switch them on or off independently. Easy installation with screw terminals for speaker wires. No power required, suitable for systems up to 50WRMS per speaker.

- Pushbutton switches
- Aesthetic wall plate design
- Simple installation

Note: As speakers are connected in parallel in A+B mode the amplifier must be rated for half the rated speaker impedance.

## 3 Way TOSLINK Switch with IR

Allows you to connect up to three TOSLINK sources to one TOSLINK input. Source selection is done via the supplied remote control, or the pushbutton on the side. An infrared receiver is also included so you can tuck the switch away with your equipment and still use the remote. The switch also features state-recall, which means your selected input is maintained even after the power has been switched off. Compatible with LPCM2.0, DTS, and Dolby AC3.

Specifications	AC1594				
Supported Audio Formats	LPCM2.0 / DTS / Dolby AC3				
Peak Wavelength	650nm				
Max Baud Rate	16Mbps

### USB Recording Phonograph Preamplifier

This fantastic device allows you to use your existing record player to record those fantastic vinyl tracks to USB! It also provides a preamp output to feed to your amplifier which may not have a "PHONO" input, when you're not recording to USB. It works natively with both Windows\* and MacOS\* systems, and is effectively plug-n-play. Then you can record using your computer's audio capture utilities! Audio sampling is up to an impressive 48kHz so you're sure you're capturing everything in high quality.

- Digitise Records using PC or Mac\*
- High quality preamp
- Native operating system support

WARRANTY

Specifications	AC1593
Recording	2 Channels
Sampling Rates	8kHz, 11.025kHz, 16kHz, 22.05kHz, 24kHz, 32kHz, 44.1kHz, and 48kHz

### Phono Stereo Preamplifier

Vinyl records have become all the rage again but you may encounter a couple of issues which are addressed by this unit. Firstly, vinyl records are manufactured in a way that requires frequency equalisation of the turntable output to make them sound right. Secondly, if your amplifier doesn't have a phono input then you won't be able to listen to your records. This unit provides the necessary frequency equalisation and increases the signal level so that it can be fed to your line-level amplifier. There is a second set of inputs for a CD player or other device. There is a front panel switch to choose between input devices and a volume control on the front panel to adjust the output level as necessary as your turntables cartridge may provide a lower or higher output than expected. All connections are made with the popular RCA connectors. Power is provided by an included mains adaptor.

#### Features:

- 2 x stereo RCA inputs
- Volume control
- Stereo RCA output
- Function can be set to mix or IND
- Screw mount holes
- RIAA equalisation for phone input

## SPEAKER TESTER

### Speaker Polarity Tester with Tone Generator

Ideal for troubleshooting and testing an audio system and installation. It offers an output range of 0-8 volts at a variable 13Hz to 10kHz tone for setting system levels, checking speaker crossover points, verifying connections and general trouble-shooting. It features a 9V speaker popper for visually testing speaker connection polarity. Connections can be made via included RCA or alligator clips. It also features an auto shut-off for extended battery life.

- Tone generator, speaker polarity and RCA cable tester
- Output Range: 0V-8V
- 9V speaker popper

## IN-CEILING 2 WAY SPEAKERS

These ceiling speakers are a 2 way speaker design giving excellent audio quality compared to traditional PA speakers. Combining a coaxial woofer with dome tweeter they are available in three sizes to cover a variety of domestic and commercial applications. Two of the models also have adjustable tweeter mounts making them ideal when used in a home theatre setup by allowing you to direct high frequencies towards the centre of a room. The flush mount design and fold out retaining clamps allow them to be easily installed in new or existing ceilings, and the matte white finish blends in with most ceiling colours.

Paper Cone Woofers:

These woofers are excellent for replacement or for new speaker design construction. Not only are they price competitive & perform very well, but they look fantastic! The concave treated paper cone matched with rubber surround provides smooth overall response.

Housed in strong steel frame baskets, high power magnet & voice coils, these drivers will produce massive quantities of clean bass output for any musical application.

Tweeters:

One unit is magnetically screened for applications where the device may be near a CRT screen, Home Theatre for example. The Titanium dome unit has quite a high power rating for a dome tweeter. Both are ferrofluid filled which keeps the voice coils cool and adds to reliability. We are delighted with these products.

25mm Titanium Dome Tweeter

This tweeter features a titanium dome with a phase shield which provides a more controlled high frequency roll-off. It produces very crisp & clear high frequencies.

## Tech talk

## Decibels

Contrary to much popular usage, the decibel (dB) is not actually a unit of any particular quantity, but rather an expression of the ratio between two quantities, such as, power, voltage, current, acoustic pressure.

Many sensors, including our own ears, respond to stimuli in a logarithmic fashion, that is, an increase of 10dB results in a doubling of loudness. This allows a huge range of intensities. As the dB compares the logarithmic quantities, it agrees with our perceptive comparisons. To calculate the ratio, in dB, of two power levels, P1 and P2, the formula is:  $dB = 10 \log (P1/P2)$ .

If the quantities are voltages, currents or sound pressure levels, X1 and X2, the formula becomes:  $dB = 20 \log (X1/X2)$ .

If the quantities X1 and X2 are both measured in the same impedances, their dB ratio will be numerically equal to the dB ratio of their equivalent powers.

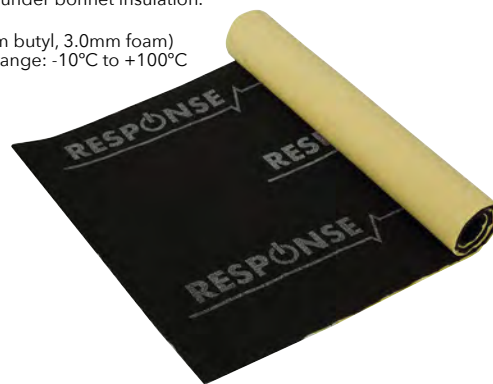

If their impedances Z1 and Z2 are unequal, the dB ratio of their power can be found from:  $dB = 20 \log (X1/X2) + 10 \log (Z2/Z1)$ . Negative dB ratios will result when P1 (or X1) is less than P2 (or X2), while positive values indicate that P1 (or X1) is greater than P2 (or X2).

## Combination Butyl/Foam Super Sound Deadener

Combining both the sound deadening properties of butyl material, and insulating properties of honeycomb foam, this is an easy single application solution for complete sound deadening and isolation that also offers thermal insulation. Consisting of a layer of our AX3687 Butyl Based sound deadener and a 3.0mm thick layer of honeycomb foam (similar to our AX3662), lining the cabin of your vehicle with these sound deadening sheets will give you drastically reduced road noise, less panel vibration and a cooler cabin temperature. Application is easy with the self adhesive backing and the ability to mould to the shape of the panel. Ideal for door skins, head linings, door cards and under bonnet insulation.

- Thickness: 4.5mm (1.5mm butyl, 3.0mm foam)
- Temperature range: -10°C to +100°C

## Butyl Based Sound Deadening Material

Give your vibrating buzz-box a luxury car ride with this butyl-based, foil backed sound deadening material. By adding weight to the metal panels of your car, such as door skins, boot lids, quarter panels, etc., you can stop nasty vibrations, reduce road noise, and give your doors and boot a nice solid "thud" when they shut. Each sheet is self-adhesive, and can be easily moulded, cut and stuck onto virtually any metal surface of your vehicle's body, giving you a pleasant, quiet and comfortable ride. Combine with our AX3662 Sound Absorbing foam to add thermal insulation and eliminate low frequency humming from big exhaust systems for an even more comfortable vehicle interior.

## AV WALLPLATES

### Ideal for HDMI Extenders

#### Brushed Rear Cable Entry Wallplate

Allows you to run pre-terminated cables through a wall. Brushed entry and concave extrusion will help protect against dust and keep the cables secured.

- Great for use with HDMI, Cat5, component/composite, S-video, and a variety of other cables (excluding VGA)

Cat.	Qty 1+	Qty 5+	Qty 10+
PS0296	\$9.95	\$8.75	\$7.75

#### Brushed Cable Entry Wallplate

Single gang brush plate for cable entry through walls etc. Suitable for pre-terminated cables going to LCD or plasma screens, and particularly suited to HDMI cables as they can't be split, spliced or field-terminated. An ideal solution if you only have a short cable run.

Cat.	Qty 1+	Qty 5+	Qty 10+
PS0291	\$11.95	\$10.45	\$9.45

#### Recessed Cable Entry Wallplate

Create a neat cable entry/exit point for terminated or non-terminated audio and video leads. The wallplate design allows cables to be passed through walls with minimal fuss and the inner curved recessed design ensures maximum safety.

- Mounting screws included
- Screw thread size: 2.5mm

## CARAVAN TV ACCESSORIES

### TV Outlet Socket

Make sure you never miss your favourite programs, sporting events or current affairs whilst travelling around Australia. This unobtrusive weatherproof cable socket includes connections, to support satellite dishes/receivers and/or a TV antenna. Installation on most caravans, motorhomes and boats is easy; just identify where you want the socket to sit, drill the appropriate holes, feed the attached cables through the holes, and screw the socket into place. Close the cover partially to protect the socket from the weather. When you want to hit the road again, disconnect the cables and close the cover fully. Supplied complete with mounting hardware and an illustrated installation guide.

## BALUNS &amp; FILTERS

## Flat Antenna Lead for Window Installs

This unassuming piece of cable can be a lifesaver. Its flat ribbon lead style means it will fit in door jambs and other tight spaces without damage. Just 265mm long with F-type female connectors on either end. Female to female joiner so you can place it inline with two standard F-type coax leads.

- Flat ribbon lead for tight spaces
- Will fit under a sash window or similar when the window is closed
- Low signal drop
- Quality F-type connections

## 4G/LTE Filter for Digital TV Reception

Since the re-stacking of Digital TV transmissions has already begun, pretty soon 4G/LTE mobile phone signals will start being transmitted on the old UHF TV channels 52-69. Of course, this means that UHF antennas will be picking up those signals, and interfering with Digital TV reception. When this filter is plugged into the back of a digital TV receiver blocks unwanted signals from 4G/LTE mobile transmitters.

- In-line coax connection - waterproof design
- Frequency pass range: 5-694MHz
- Insertion loss <1dB
- LTE band rejection: 720-1000MHz, 40dB

### Indoor Flat Panel UHF/VHF Digital Antenna with Amplifier

Sits unobtrusively near your TV. A very capable unit featuring signal clear technology with extremely low noise circuitry. It is able to pick up both UHF/VHF signals as well as DAB+ radio. It is also coupled with a separate amplifier with independent UHF and VHF gain adjustments. The amp can be powered with the supplied mains adaptor or from a USB cable (mini plug lead not supplied). Though the unit does not require the amplifier, it may be needed for areas with weak indoor reception.

## 6 Element VHF Yagi Digital TV Antenna

with the major cities in Australia now receiving their Digital TV reception on Band 3, the Kingray range of yagi antennas provide the perfect solution for metropolitan and some country areas. The antennas are almost completely assembled out of the box, with only the reflector and director having to be attached to the boom. The heavy duty 12mm elements, stainless steel screws on the driven element connection points, powder coated boom and UV stabilised plastics will ensure many years of trouble free reception. They are also suitable for DAB+ reception.

### COMBINATION VHF/UHF ANTENNAS

#### Digimatch VHF/UHF X-Type Colinear 27 Element

These Australian made heavy duty antennas are the ideal metropolitan antennas for Digital TV as they are capable of receiving digital and analogue TV on VHF channels 6-12 and UHF channels 21-46. The UHF section of the antenna employs X-type elements for wider bandwidth and higher gain, whilst the VHF section has elements made from high grade aluminium strong enough to withstand damage from birds. The VHF section of these antennas can be mounted horizontally or vertically for areas such as Canberra and Shepparton, making them suitable for all TV transmitters throughout Australia. Their overall design has improved figures for gain, VSWR and F/B ratio to give a superior carrier to noise ratio - this means more signal, less noise and therefore much lower chance of picture dropouts. The Digital anti-reflection Matching System (DMS) employs a diplexer to electronically couple the VHF and UHF sections of the antenna together, giving 20dB isolation to achieve a better Bit Error Ratio (BER) and maximum digital performance.

- Receives Band 3, 4, and 5 (Channel 6-12 and 21-69)
- Ready for today and future UHF allocations and Plus One networks
- F-Type PCB balun & diplexer for quick installation & improved VSWR
- Black ABS UV resistant plastics
- 12.7mm dia. VHF elements
- Stainless steel screws
- Australian designed & manufactured

## SPLITTERS/AMPLIFIERS

## Amplifier 20dB Gain Plug In 4G LTE Filter

This TV amplifier with 4G filter is ideal for improving reception on a single TV whilst simultaneously eliminating interference from mobile phone signals. To use, simply plug into electrical socket, connect TV antenna cable into the "ANT" socket and the TV/VCR cable into the "TV" socket. Once proper connection is made, turn the power on and select gain level as required. Includes 2 x 'F' Type male to PAL female connectors.

- 4G LTE filter output 694-862MHz
- Frequency 40 - 694MHz
- Adjustable gain 20dB
- Power: 240VAC/50Hz 10A 2.5Watt
- Low Noise 3dB

## Indoor TV Amplifier/Splitters

## Single Output

Such a simple and neat solution to boosting your TV antenna signals. The unit simply plugs into a mains outlet, and boosts your TV antenna signals through the F-type input and output sockets. There is also a mains output socket on the front so that you don't lose any power points behind your TV unit. Up to 20dB of amplification is provided, with a variable gain control.

Specifications	LT3285
Frequency Range	46-860MHz
Gain	20dB
Gain Control	15dB VHF, 10dB UHF
Noise Figure	Only <3.5dB
Dimensions	96(L) x 60(W) x 40D(mm)

FEATURES "F" SOCKETS

## 2 Way - LT3288

Boost your TV signal indoors. The antenna lead is plugged into the amplifier, and there are two outputs for two TVs, both which have a 12dB boost. One outlet can be used for FM stereo if desired. Runs on 240VAC mains, and includes a LED power indicator.

## 4 Way - LT3287

A digital television splitter/amplifier for use in multiple receiver applications. The amplifier has F type input/output connectors and features variable gain on the VHF band. The unit operates from 240VAC and is mounted in a white ABS housing with integral mounting lugs. Size 60(W) x 40(H) x 85(L)mm. Adaptors are included to suit Belling Lee installations.

## UHF/VHF Masthead Amp with Signal Meter

The main feature of this unit is the signal strength meter built into the masthead unit itself. This enables you to rotate your T.V. antenna while you are up the mast to get the best signal strength before you clamp the assembly permanently in place. No more climbing up and down the ladder to check T.V. reception! The masthead unit measures 100(W) x 90(H) by only 30(D)mm. It has 2 x downward facing female 'F' type output sockets, with a drip shroud. Two rubber boots are provided to waterproof cable entry to the unit. The masthead amp comes with a mains power supply which plugs into a power inserter. The power inserter sends power up the mast to the amplifier and then provides a D.C. power free signal to your T.V. set. All connections are by 'F' type connectors. Apart from that, the kit includes mast "U"; clamp, 9V battery power supply to show signal when installing and sundry other hardware.

- 4G LTE interface filter
- Coax line power
- Includes all mounting hardware, A.C. adaptor, injector box

## Kingray VHF/UHF Masthead Amp with LTE/4G Filters

As you may be aware by now, a large chunk of the Australian TV broadcast spectrum is being reallocated for the next generation 4G/LTE mobile phone service. This is currently due to happen at the end of 2013, and early reports are suggesting that this reallocation of the spectrum may interfere with existing TV reception apparatus. To guard against this, Kingray have produced this Australian made masthead amp that provides a good VHF & UHF TV band gain, and user selectable filters for VHF bands 1&2, FM radio, fixed pagers, and the new 4G/LTE band.

- Supplied with AC power injector and F-type to PAL adaptors
- Combination and separate VHF & UHF Antenna inputs.

A fantastic product proudly made in Australia

## Digital TV Antenna Guides

Before you invest in a new antenna and make the effort to climb up on the rooftop to install it, be sure to check out our TV Antenna Guide to make sure you have the correct antenna. Our friends at KINGRAY have come up with some very useful TV Antenna Guides that recommend the best antenna for your area. The coloured charts show you the main, adequate and tertiary TV coverage areas based on the transmitter tower's location, and then recommends which antenna is best suited to that location. The guide also suggests accessories, such as masthead amplifiers, that you may need depending on your location. TV antenna guide for the Sydney Region shown below.

### Indoor TV Antennas?

Jaycar carries a great range of "indoor" type TV antennas in both passive & active gain models, which are good quality. Many people select such products hoping that they will offer satisfactory TV reception without the cost and/or hassle of a full outdoor TV antenna system. Often people who are renting premises cannot install a full TV antenna system anyway because they are not allowed to drill holes etc. The reality, however, is that indoor TV antennas rarely give totally satisfactory results. The antenna element dimensions never correspond to broadcast frequencies for a start. Because you are inside, you may have no idea where the TV tower is anyway. Even if you knew where the tower was the antenna rarely has directional qualities. This makes the towers' location fairly meaningless. Trying to make an indoor antenna according to the laws of physics misses the point. Despite this, indoor TV antennas can work amazingly well! Just don't get too scientific about it. They work best when you can throw a rock and hit the TV tower. As all the channels you will want to watch will not be in rock-throwing distance, some stations will work better than others. Wiggling the antenna around is really your only available technique. Indoor TV antennas are made for flat dwellers in large Western or Asian cities with high building density. In other words, all the TV towers will not be far away.

If you live in a "spread out" city and cannot see a TV tower i.e. like most Australian and New Zealand cities, it is highly likely that an indoor antenna will not solve your reception problems. There may simply be very little signal for you to pick up. Just imagine walking into a darkened room at night. Even with your eyes wide open you see virtually nothing until your eyes adjust to the conditions. At best you can see, say the white frame of a door. You certainly would not be able to read! You would not blame your eyes because you could not see but people frequently blame an indoor TV antenna in a similar situation for "not working" (visible light and TV signals are both part of the electromagnetic spectrum).

LTE = LONG TERM EVOLUTION (4G WIRELESS BROADBAND TECHNOLOGY)

So when you buy an indoor antenna - from us or anyone else - don't expect a lot. If you bring the product back and say "it doesn't work", we know that you are really blaming the messenger. You may think that our words are a bit harsh but we respect both your time and your money too much to tell you what you need to hear, not what you want to hear. The copy above relates mainly to Analogue TV systems. They are basically gone now but the need for an indoor or temporary TV antenna still exists. Let us Jaycar people take a position on this: We do not like indoor TV antennas and if we could get away with it, we would not sell them.

The behaviour of an indoor TV antenna can be ok, it can really be bizarre. If you are renting a flat and have a hopeless TV (Digital) reception you really need to get the landlord to fit a proper TV signal feed. Good Luck.

The TV Signal is still R.F. however, although digitally encoded. This means that the indoor antenna is still capable of picking up the radio frequency signal and converting it into a signal voltage. In all likelihood the antenna will pick up several versions of the R.F. signal at once. This is because R.F. being R.F. will have made its way to your antenna via several paths. It will be up to the front end of your TV receiver to distinguish the strongest signal and ignore the others. Modern TV front ends are pretty good at this.

So if you are in a rented flat and want to watch TV try one of our indoor antennas. Ours are as good as or better than anyone else's. If you are not happy with the performance of the antenna, keep the packaging, your receipt and bring it back to us if you feel you have to. Just don't tell us that "...it does not work..." You will get your money back all right, but you might get a blank stare....

## SPLITTERS / AMPLIFIERS CONTINUED

## Indoor Splitter - 2 Way

Allows you to connect two TV, video, games, FM receivers etc. to one RF plug, so you can run multiple devices on one outlet.

- Takes standard PAL RF connectors
- 2 x female sockets to male plug

## VESA Mounting Standard

The Video & Electronics Standard Association (VESA) has issued suggested standards for the attachment mounting systems for electronic visual displays also known as the Flat Display Mounting Interface. This is a family of standard defined by VESA for mounting flat panel monitors, TV's and other displays to stands or wall mounts, it is used on most modern flat-panel monitors and TV's. Whilst these standards are quite detailed the basic details of the standards involve the size of the display and the relevant spacing and sizing of the hole to mount the display. The dimensions vary from 75 x 75mm to 800 x 400mm.

### Ceiling / Wall Speaker Bracket - Steel

This sturdy bracket has main axis angle adjustment by a diecast, toothed plate secured by a wing nut. The detents won't slip as can happen with ball types. Minor axis adjustment is by a handwheel with backup by lock screw. As a safety measure a steel wire lanyard easily secures the two halves of the bracket - a good safety feature that is common in professional P.A. Installations. The wall plate has holes for 4 x 6mm (or 1/4") screws. Another hole is provided for speaker wire egress. The speaker mounting plate has 4 x 4mm holes and also two slotted holes. Sold individually.

## CABLE MANAGEMENT

### Hidden Cavity Media Hub

Designed to be mounted in a cavity / stud wall, it has provision for up to five wall plates, or three wall plates and a small converter. Inside you can install whatever you need for HDMI connections, power points, antenna connections, or anything else you like. The cables are then fed through the hole in the front-plate for connection into your TV. It only protrudes from the wall by a few millimetres, so you could have it behind a flush-mounted TV and wouldn't even know it's there! Includes mounting hardware, just BYO wall plates and equipment.

Note: GPO mains outlets should only be fitted using a licensed electrician.

- Holds up to 5 standard wall plates
- Dimensions: 285(W) x 250(H) x 70(D)mm

## Tech talk

### VESA Mounting Standard

The Video & Electronics Standard Association (VESA) has issued suggested standards for the attachment mounting systems for electronic visual displays also known as the Flat Display Mounting Interface. This is a family of standard defined by VESA for mounting flat panel monitors, TV's and other displays to stands or wall mounts, it is used on most modern flat-panel monitors and TV's. Whilst these standards are quite detailed the basic details of the standards involve the size of the display and the relevant spacing and sizing of the hole to mount the display. The dimensions vary from 75 x 75mm to 800 x 400mm.

### Phone Holder - Air Vent Magnetic

This simple device allows you to easily hold your smartphone in a convenient position (for use when safely parked of course). The mount itself simply slips firmly onto the grilles of your air-vents. You then have two options: use the small (40mm Dia.) adhesive mounting plate, or slip the 40 x 60mm mounting plate inside your protective case. Both mounting places are just a fraction of a millimetre thick and weigh barely 1 gram, so you won't even notice it's there. Then by simply putting your phone close to the magnetic holder, it will firmly snap into place. Simply pull to remove! No clips, cradles, or other inconveniences. The magnetic mount itself is also rubber-moulded so the strong magnet won't scratch your phone (or phone case). Product may differ slightly to one shown.

## Acoustic Sound Absorbing & Deadening:

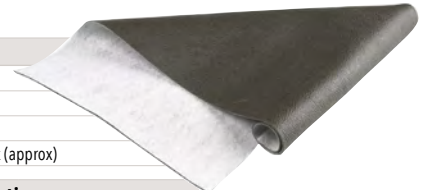

Ideal for car sound installations. One of the most hostile environments for a loudspeaker is in the door of a car. It is made out of flexible sheet steel which, when it is not vibrating & absorbing energy by rattling or buzzing, is reflecting energy all over the place! to produce Hi-Fi sound in a car you not only need to control the acoustics of the car environment. As any professional will tell you, it's the installation which makes for sound quality more than any other factor.

### Heavy Duty Sound Barrier Damping Material

This is basically a flexible plastic-like material that forms an attenuating / reflecting sound barrier. The product is made of 25% PVC loaded and spread evenly with barium mineral powder which takes up the other 75% (by weight) of the product. The barium mineral is very heavy and makes the vinyl heavy and impenetrable to sound waves. It's sort of like if lead was plastic! It weighs 4kgs per square metre. It is ideal for any surface that needs to be 'deadened' e.g. car door or floor panels. It completely damps (ie prevents) any panel resonating from high power speakers. It is also amazing for attenuating road noise from steel car floors, etc. It can be cut with a hobby knife or good scissors etc. The material is held in place with spray or gel contact cement. One sheet is generally enough for the average car door. Supplied in a polyethylene bag.

### Self-Adhesive Sound Absorbing Foam

The perfect ultra light weight insulator to use in conjunction with AX3687. This durable crush and tear-resistant material has the highest heat blocking properties available in a single layer synthetic foam-type material. Not affected by oil and does not absorb water. It provides acoustic isolation and excellent thermal insulation for roof, firewall, floor, quarter panels, doors and even as an under bonnet liner. Adhesive backed for easy installation.

### Butyl Based Sound Deadening Material

By adding weight to the metal panels of your car, such as door skins, boot lids, quarter panels, etc. you can stop nasty vibrations, reduce road noise, and give your doors and boot a nice solid "thud" when they shut. Each sheet is self-adhesive, and can be easily moulded, cut and stuck onto virtually any metal surface of your vehicle's body, giving you a pleasant, quiet and comfortable ride. Combine with our AX3662 Sound Absorbing Foam to add thermal insulation and eliminate low frequency humming from big exhaust systems for an even more comfortable vehicle interior.

### Combination Butyl/Foam Super Sound Deadener

Consisting of a layer of our AX3687 Butyl Based sound deadener and a 3.0mm thick layer of honeycomb foam (similar to our AX3662), lining the cabin of your vehicle with these sound deadening sheets will give you drastically reduced road noise, less panel vibration and a cooler cabin temperature. Application is easy with the self adhesive backing and ability to mould to the shape of the panel. Ideal for door skins, head linings, door cards and under bonnet insulation.

## Car Speakers:

Low cost doesn't mean low quality. Coax speakers are an ideal replacement for the standard speakers you get in the average car. All are equipped with titanium coated fibre woofers and silk dome tweeters for smooth high frequency response.

• Sold as a pair.

### 12 Piece Audio and Interior Removal Kit

Those of us, who have installed a pair of speakers or a head unit, know how difficult it can be to get the door panels and centre consoles off without scratching them. By using the right tools the job is made much easier! This set of pry bars allow you to remove all the panels including those upholstery clips. They are made of ABS plastic and are extremely sturdy.

This professional kit includes 12 distinctive tools designed to suit any car model.

## Kevlar Coaxial Car Speakers:

These are our ever popular Kevlar Coaxial Speakers that have won many awards and magazine recommendations in the past, only with a new look. The Kevlar speaker cone is now supplied in Black but it still retains its outstanding performance that we are all accustomed to. The tweeters are still the original soft dome tweeter that provide clean, crisp sounds and maintains a natural and smooth balanced sound; nestled in an adjustable bracket for optimal sound trajectory. Virtually unchanged in design and performance, we have put our efforts in changing one thing; the price. Now at a more competitive price points; these coaxial speakers are great value for money topped with award winning performance.

#### Speaker Specs

- In an effort to assist customers choices between speakers, our entire speaker range have been assessed and measured under the same test conditions. Therefore, making the resulting data in this catalogue comparable.
- All drivers have been measured for Thiele and Small parameters after a period of "Breaking In" for a minimum of 15 hours, and not tested straight off the shelf. This ensures a more long term and realistic result.

### Car Noise Filters

Car noise filters or hot line filters are used to reduce noise and interference entering your car stereo through the power lead. The car alternator is one of the most common sources of problems, and these essential devices can help to reduce this.

## CAR AUDIO ACCESSORIES

### Line Level Control (Attenuator)

This unit when fitted in a signal line allows you to adjust downwards excessive signal levels. You may have, for example a source from a CD/MP3 player and a tuner. Often one source is too loud (at line level) to the other.

- Stereo
- RCA line sockets in/out

## 40 Years of Security & Surveillance

Looking back four decades, alarm systems were one of the primary ways to protect your home or office from potential intruders. We began selling alarm systems, some with glass breakage and ultrasonic features. Soon after, alarm systems with telephone diallers became exceptionally popular for added protection.

Now of course, many people are selecting ultra high definition CCTV systems. With intelligent features such as facial recognition in some models, they are hard to beat. The added benefit of course, is police can be provided quality footage in the event of an incident.

### Swann 4 Channel 1080p DVR Package with 4 x 1080p Cameras with Warning Spotlights

NEW

This system includes Swann's True Detect PIR Thermal Sensing technology to reliably detect heat-generating moving objects, such as people, large pets & cars. With more accurate motion detection, you have more reliable notifications & recording, eliminating false triggers such as falling leaves, bugs, rain & more, saving hard drive space & playback time. It can even be set to send push notifications when movement is detected!

Supplied with 4 weatherproof security cameras with Motion Sensored Spotlights. Remote viewing is incredibly simple to set up on your smartphone or tablet. Just scan the QR code sticker on the DVR to see the cameras in real time from anywhere in the world! You can even search the recordings for any previous incident.

The massive 1TB HDD is designed especially for continuous surveillance recording. Store months of recordings and easily transfer videos to a USB stick or download via a network.

Select a specific area of the image to search for movement within the recordings. For example, highlight the position of a stolen object and Smart Search will find motion around that area.

## Swann 8 Channel NVR Packages

These all-in-one 4K Ultra HD network video recorder (NVR) and camera kits are easy to install and will keep your premises secure. Wiring is quick and simple as the video, audio and power are all run through a single network cable for each camera. True Detect™ heat and motion-sensing can be set to record only when an actual intruder is detected, so you save space on the HDD and don't have to review several hours of footage when an event occurs.

Upload footage from up to 2 cameras and still images from all cameras to your Dropbox account in the cloud. So even if your video recorder gets stolen, you'll have video evidence off-site.

The massive HDD can store months of footage before overwriting older files. Easily transfer videos to a USB stick or download via network with no ongoing fees ever. You can even add more cameras for a total of 8 to cover any blind spots on your property.

Talk and listen via the 2-way audio to greet guests or warn intruders.

The cameras have an IP66 weatherproof rating so they will work in rain and snow, all year round.

Go hands-free with Google Assistant or Alexa. Facial recognition lets you add an unlimited number of people to trigger recordings and alerts.

### Swann 8 Channel 4K NVR Kit with 6 x Upscaling 4K Cameras

Includes six cameras with digitally enhanced upscaling technology that provides 4K resolution and zoom, so you won't miss a thing. The four bullet cameras also have powerful sensor lights built-in that turn on when heat and motion-based activity is detected. Whilst not the same, upscaling technology digitally creates a 4K resolution, without the price tag of 4K cameras.

SECURITY & SURVEILLANCE

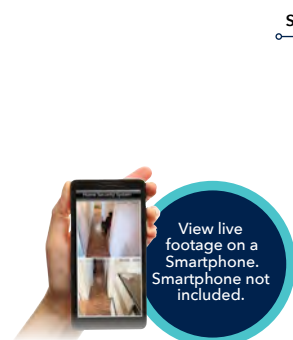

## Swann 8 Channel & 16 Channel Premium NVR Camera Packages:

4K  
UHD

Get amazing image definition with 4K UHD cameras. Zoom in closer with incredible clarity to license plates, facial features and clothing patterns. The IP security cameras come with Ethernet cables and are weatherproof, built tough for the outdoors or indoors. Swann's True Detect™ PIR Thermal Sensing technology detects motion by heat, such as from people & cars, to trigger recording and push notifications. This virtually eliminates false triggers, like plants moving with the wind, to only capture events with security relevance. See in the dark up to 40 metres with the camera's powerful infrared night vision. Enjoy easy camera installation with Power over Ethernet (PoE) as each camera is connected via Cat 5 network cable to transmit power, video and audio. Set up the security system to save video footage to your personal Dropbox, Google Drive or Microsoft OneDrive account in the cloud. Expand your CCTV system by adding up to 8 cameras for a complete 8 channel home security system, suitable for medium-sized businesses & detached homes. For maximum resolution, add 8-megapixel 4K cameras, which have 1.7 times more pixels than 5MP.

- True Detect™ PIR motion sensing technology

## DVR vs. NVR

There are key differences between NVRs and DVRs. NVRs may have a higher cost, however, can provide an easier install and higher quality images.

**DVR (Digital Video Recorder):**

- Uses coax cable to run video from the camera to the DVR
- 200m maximum camera maximum distance to DVR
- Each camera needs its own power source using a secondary cable between power supply and cameras using a splitter
- Cameras are analogue with the image processing done by the DVR
- Cheaper camera cost

**NVR (Network Video Recorder):**

- Uses common Ethernet cables to run video and power between the camera and DVR
- 100m maximum camera distance to DVR, but can be extended using PoE enabled Ethernet Router or Switch
- Power is provided from the DVR over Ethernet (PoE). No extra cabling.
- Modern homes and offices already have Ethernet running between rooms, which makes installation easier
- Cameras are digital with the images processed in the camera.
- Higher camera cost

## CONCORD

Concord offers a collection of video surveillance products with features that were previously only available on high end or commercial products.

Concord DVR and NVR surveillance systems range from 1080p HD to 4K UHD resolution. The kits come in different configurations of camera type and quantity and contain everything you need for and an easy DIY installation.

For added peace of mind all Concord surveillance kits come with a 2-year warranty, online and phone support.

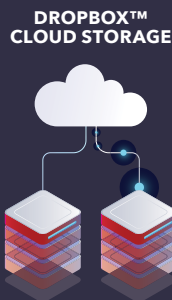

For more information, visit:  
[www.concord.support/surveillance](http://www.concord.support/surveillance)

### DVR & Camera Kit Common Features:

#### Dropbox™ Cloud Storage

Setup or use your own personal Dropbox storage account to automatically save your footage so you can retrieve it in case your DVR is stolen or damaged. Dropbox offers 2GB of free storage or for users who require larger storage; a subscription service is available.

#### HDMI Output

Watch live or playback video on your HDTV or LCD monitor via HDMI or VGA.

#### Easy Setup

Connecting your Smartphone is made easy using Peer-to-Peer (P2P) technology and scanning a QR code with the app.

#### Mobile Viewing

View live or playback video from your mobile device with the free app for iOS or Android.

#### Concord DVR/NVR Wi-Fi USB Dongle

Connect the DVR/NVR to the internet router using the Concord USB Wi-Fi Antenna to avoid having to run cable in awkward locations, saving you time and money. It also enables you to place your DVR/NVR discretely inside your house or small workplace.

Connects your DVR/NVR wirelessly to your Internet

**Surveillance  
Resolutions  
Explained**

Tech talk

**CIF:**

You'll still find CIF quality equipment available, but not nearly as common as it once was, as higher resolution equipment continues to fall in price. It provides 352 x 240 (0.1 Megapixels) resolution. We no longer carry any CIF equipment.

**D1:**

You'll find D1 resolution offered on a number of our low-cost solutions. It provides 704 x 480 (0.3 Megapixels).

**960H:**

Providing reasonable resolution but still in a value price range. 928 x 480 (0.5 Megapixels). 960H is the same vertical resolution as D1, however it has a widescreen aspect ratio, providing more pixels overall.

**720P HIGH DEFINITION:**

720p was the first resolution classified as high definition, even for televisions. Now almost everything is full high definition, but high definition is still used in many surveillance cameras 1280 x 720 (1 Megapixel).

**1080P FULL HIGH DEFINITION:**

This is the most common TV standard, and is considered "Full High Definition". 1920 x 1080 (2 Megapixels). One major benefit of 1080p hardware is it matches pixel-for-pixel, many off-the-shelf displays designed for computers or TV.

**4 MEGAPIXEL ULTRA HIGH DEFINITION:**

Providing a marginal increase in resolution over Full HD 1080p, with a resolution of 2560 x 1440 pixels. It provides a marginal increase in resolution over Full High Definition 1080p.

**5 MEGAPIXEL ULTRA HIGH DEFINITION:**

Super high definition, 2560 x 1920 resolution, very good level of detail from images.

**4K ULTRA HIGH DEFINITION:**

Highest resolution available today, 3840 x 2160 four times more pixels than 1080p, provides crystal clear video with very high detail

**WHAT ABOUT TV LINES?**

TV lines came about when most recording was done with analogue hardware, with tape-storage being the common method. The TV Lines / TVL standard is falling out of favour to Megapixel specifications, mostly because once we hit 1000TVL, it all started getting a little difficult to track. For a basis of comparison however, a 600TVL resolution is approximately 0.4 megapixels, or 1000TVL is approximately equal to 0.9 megapixels. So you can see once we enter high definition territory (2 megapixels or more), the TVL standard becomes a little difficult to manage.

**IN SUMMARY:**

The quality of resolution you need is really determined by your own specific requirements. While "more is better" when it comes to resolution in many ways, consider your own budget and circumstances to find a balance between cost and quality. If you would still like to chat to someone very knowledgeable about surveillance and resolution, find one of our friendly team who can help you find what you need.

## Concord Cameras

Expand your surveillance system with extra weatherproof HD and 4K cameras.

Choose either a bullet shape to make the camera more visible to potential intruders, working as a deterrent to protect your property and loved ones or a dome shape that is more difficult to see where the camera is pointing and much harder to damage.

All cameras have built-in Thermal Detect Technology for compatible DVR or NVR systems and built-in infrared LEDs for night vision up to 20m. The integrated IR cut filter improves colour reproduction during daylight and automatically switches off in darkness.

Depending on the Concord DVR or NVR you own you can choose to add HD 1080p, 5MP or UHD 4K cameras so you won't miss details such as number plates or clothing details that can help catch trespassers.

## Swann Cameras

### Swann TVI and IP Cameras

The range of additional Swann TVI and IP cameras allows you to increase the security coverage of your home or business with bullet or dome cameras in HD 1080p or UHD 4K resolution. Bullet cameras are easily visible which means they work as visual deterrents to anyone thinking of intruding on your property and record them if they choose to ignore the warning. The dome shape cameras are a little more difficult to see but are much harder to damage in areas where they can be hit by objects such as ladders. All the cameras feature True Detect™ PIR Thermal Sensing which is designed to reliably detect people, pets, cars and other heat generating objects. This saves you precious space on your DVR or NVR and reduces the number of push notifications you receive on your phone as it will only store events that were triggered by things you actually want to know about, not the washing on the line or a tree branch moving in the wind. Swann's Day/Night Surveillance Cameras allow you to clearly see what is going on during the day in resolution from HD 1080p to UHD 4K for when you want to be able to capture every detail such as number plates or writing on clothing. Then at night you can see up to 30m using their powerful infrared technology with no extra illumination.

## Swann 1080p Battery Powered Xtream Wi-Fi Camera

This camera gets its name thanks to its extremely long battery life. On a single charge, the camera can last up to an impressive 6 months, giving you a set and forget convenience to protect your family and property. It works completely wire free, and records to the included 16GB microSD card, and to the Cloud via Wi-Fi for handy backup purposes. The camera has a compact and durable design, is completely weatherproof, and features a 1080p HD camera with 110° lens for a wide field of view. The True Detect™ heat sensor reliably triggers recordings and phone notifications once it detects moving people, cars or large animals, and the powerful infrared night vision kicks in automatically to capture objects up to 8m away in the dark. Using your Smartphone, watch live or playback recordings easily, and use the camera's internal speaker and microphone for two way conversations. Use it to chat remotely to a delivery driver, scare off an intruder, or talk to a loved one, for example. You can position the camera on a shelf indoors or use the supplied magnetic bracket to position it at the right angle outdoors. For added convenience, a simple voice command using the Hey Google and Alexa integration can stream video from the camera to your Google Nest Hub or Chromecast, or your Echo Spot, Echo Show or 4K Fire TV. All in all, a smart, easy and long lasting video surveillance system.

## Swann 1080p Battery Powered Smart Wi-Fi Cameras

This 1080p Wire-Free Smart Rechargeable Security Camera installs in minutes. With free face recognition you can add up to 10 faces to trigger recording & push notifications. Set & forget to save video clips to secure cloud (for 7 days rolling) & local back up (for 2 days), with the ability to expand that to 60 days cloud recording if needed. Best of all, if your internet or power goes down, recording continues & is backed up to the cloud later. Truly reliable security with True Detect™, heat from people & cars triggers push notifications & video recording. The camera has a microphone & speaker. Talk back with people near the camera. Scare off intruders or ask the deliveryman to hide the package somewhere safe. Enjoy hands-free security using voice commands. Stream video from your camera via the Google Assistant & Chromecast, Google Home Hub, or via Alexa devices with a screen, such as Echo Spot, Echo Show or 4K Fire TV. Built to withstand rain, snow & heat, all year round. The ultra wide 180 degree field of view covers broad areas, so that you can have fewer cameras around your property, bringing down the cost of home security.

- 1080p HD quality
- Wide 180° viewing angle reduces blind spots
- 2-way audio to greet guests or warn intruders
- Go hands-free with Google Assistant or Alexa

SECURITY & SURVEILLANCE

## Uniden 4G 1080p Solo Camera Kit with Solar Panel

Uniden introduces a 100% wire-free 4G cellular smart security camera. Including features such as Cloud & SD Backup, Large Capacity Rechargeable Battery, Starlight Night Vision, Solar Power and FULL HD 1080p recording abilities, the App Cam Solo 4G is in a class of its own. The App Cam 4G allows for 100% flexibility using a 4G Cellular Connection with a 4G Micro SIM Card (Subscription with Carrier Required - Data Only). With a Weatherproof Design, the App Cam Solo 4G can be placed anywhere from building sites, caravan spots, marinas, farms and agricultural locations where keeping an eye on property is essential. The 4G Cellular Connectivity allows you to protect your property, watch animals and valuable equipment without the need for installing long cabling. The flexibility of the App Cam Solo 4G allows users to place the camera almost anywhere outdoor, overlooking critical farming equipment, feeding hoppers in remote paddocks, keeping an eye on a boat at its mooring, watching over a caravan in a caravan park and outdoor equipment while out on a trek or watching over a building site with valuable equipment. Simply choose a data plan from your preferred carrier and insert their supplied SIM card to the App Cam Solo 4G and you can view the camera from anywhere on your Smartphone through the Uniden Solo app. A complete wire-free security solution; the App Cam Solo 4G includes a large capacity (7800mAh) rechargeable battery that ensures long battery life using advanced power-saving technology and low battery notifications. The battery can be charged either directly via a power outlet or with the included Uniden Solar Panel accessory. The solar panel can charge up the camera in daylight conditions to ensure your camera's battery is always fully charged.

Solar Panel (Included)

## 4 Channel Wireless 7" LCD DVR & Camera Kits

The large 7" touch screen LCD gives you full control, and you can even connect up to 4 cameras (1 camera included in kit, others available separately). There are two different resolution models available to suit your requirements too! Digital transmission up to 100m ensures a flexible, no-fuss installation. The monitor can be easily moved around thanks to the in-built rechargeable battery, which will power the unit for up to 2.5hrs at a time. Video is then easily recorded to an SD card (not included). The camera itself is a solid weatherproof outdoor camera with built-in LEDs for night vision, and a motion detector (PIR). This can be used to automatically trigger recording from motion detection, so reduce required memory and save review time when looking for events in the recordings. Of course all video is transmitted wirelessly, so you just need a power source nearby the camera. All power supplies are included, as well as mounting hardware for the camera.

- Quad viewing mode
- 2 way audio communication
- Record & playback simultaneously
- Motion detection, scheduled & manual recording

Connect up to 4 cameras

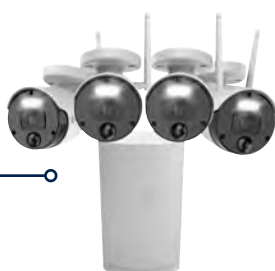

View live footage on a Smartphone. Smartphone not included.

## WI-FI IP CAMERAS

## 1080p Wi-Fi IP Camera with Security Alarm

This surveillance camera can work stand-alone to record audio and video in 1080p high-definition, or expanded with sensors (sold separately) to turn it into a security system. It features a magnetic base to quickly adhere to any metal surface and Wi-Fi connectivity for easy installation. Plug in your microSD card (up to 128GB) and it's a full recording system that you can leave perpetually recording, or set to motion-detection mode. Once the built-in PIR detects movement, or connected wireless PIR, reed or panic switch is triggered, the camera will send 30-seconds of audio and video to your Smartphone! The free Android & iOS\* app provides flexible control and monitoring. What's more is the provision of 2-way audio communication, meaning you can talk to the intruder "You are being watched!", or use it more like a doorphone for less sinister visitors "Sorry, I'm not home right now". Infrared LEDs mean it works in just about any lighting conditions too. Setup and configuration is easy, and there's Windows software provided if you prefer to access via a computer. Powered using the included USB mains power adaptor.

- Supports additional security sensors (QC3872/4/7)
- PIR Motion Detection & Manual Recording
- microSD Card & Smartphone Recording
- Video snippet with alert to your Smartphone
- Free Android & iOS\* Smartphone App
- Internal Microphone & Speaker

## POWER-OVER-ETHERNET

## Gigabit PoE Injector

Power Over Ethernet (PoE) devices are becoming more commonplace, such as IP cameras, telephones, and many more small devices which require a small amount of power to operate. However most conventional Ethernet switches do not natively support PoE. This device adds the power inline to a single network cable, working up to 100m, so you don't need mains power down the line at the device. It supports up to gigabit network throughput for ultra-fast connectivity, and is PoE IEEE 802.3at compliant.

## Power-Over-Ethernet (PoE) Passive Kit

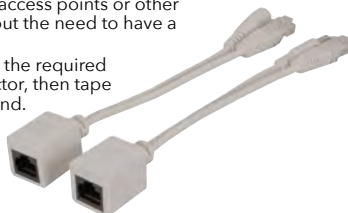

PoE allows transfer of electrical power, along with data, over twisted pair cables. Finding a power supply is a common obstacle in LAN installations: PoE allows you to power wireless access points or other equipment via a Cat 5 cable without the need to have a separate power source available.

You simply connect a plugpack of the required voltage via the 2.1mm DC connector, then tape it where you need it at the other end.

## 5 Port PoE Switch

Power Over Ethernet (PoE) simplifies installation for IP telephones, routers, IP cameras, and more. It reduces the need for mains power at each IP camera location, for instance, powering them from a central supply. Suitable for use up to 100m, it provides up to 30W per PoE port.

## 10 Port Gigabit PoE Network Switch

PoE simplifies power delivery for IP surveillance, telephone, and many other systems. This is a powerful gigabit switch with 8 x PoE-enabled and 2 x standard gigabit ports. It can deliver up to 130W of power (max 30W to a single port), which is loads of power for just about any PoE-enabled device you may have. Ultra-fast gigabit network also enables fast data transfer, critical for high resolution IP cameras and data-intensive systems, and is also very useful for providing PoE to access points and switches which are also distributing the connection. Automatic PoE detection, fully compatible with non-PoE devices. Includes mains power adaptor and mounting bracket.

Specifications	YN8049

## BALUNS

## BNC to Cat5e/6 UTP AHD Video Balun Kit

Extend the transmission distance of your CCTV cabling without the need for a video amplifier. The balun accepts all composite video signals such as AHD, TVI and CVI. To use the baluns, strip away your UTP Cat5 cable at the ends and use a stranded pair connecting one wire to the positive terminal and the other to the negative terminal. Note the colour of the wires used and repeat the process at the other end.

This kit includes two baluns; one to act as the transmitter and the other the receiver. It is suitable for CCTV setups, multimedia presentations and video conferencing.

Specifications	QC3667

## SURVEILLANCE ACCESSORIES

### Long Range Infrared Spotlight

CMOS and CCD surveillance cameras are often designed with only minimal night vision range or sometimes without infrared LEDs at all. This high-power spotlight will add or increase your existing surveillance cameras infrared viewing range of up to 50 metres. The six built-in LEDs switch on automatically at night or when dark conditions are detected. The compact size of the spotlight is ideal where unobtrusive surveillance in low light areas is preferred, such as warehouses, driveways, backyards, alleyways and boundary line fences. Includes a 12VDC power supply and mounting hardware.

- Automatic day/night operation
- 180° bracket adjustment

Tech talk

## IP Surveillance

IP surveillance is a digitised and network version of closed circuit television (CCTV). In an IP surveillance system, an IP camera records video footage and the resulting content is distributed over an IP (Internet Protocol) network.

Digitisation offers several benefits over analogue CCTV including:

- Improved search capabilities & greater ease of use
  - Better quality images and no degradation of content over time
  - The ability to record and play at the same time
  - The ability to compress content for improved storage
- Adding networking capabilities to digital CCTV provides additional benefits, including:

- Improved ability for remote viewing & control. Anyone on the network with password access can potentially see video from any camera connected to the network.
- IP Storage makes it possible to store data in any geographical location
- Greater ease of distribution. An image of a crime suspect, for example, can immediately be distributed to officials
- The ability to connect to email and other communications systems so that alerts can be sent automatically

### 23.8" LED 1080p FHD Surveillance Monitor

A quality monitor is essential for any surveillance installation. The high resolution display will give you clear vision, with more than enough room to show a quad-display if you're viewing a DVR or multiple cameras.

Includes HDMI and power cables.

## Dummy IR Camera

Visible deterrence is probably the most important aspect of security. Most criminals aren't completely stupid - if your premises looks like it has CCTV surveillance, they'll move on to the place that doesn't. These dummy cameras look totally convincing - they have genuine-looking IR LEDs and a real LED that adds to the illusion. Add a couple of warning signs (1 is included) and the baddies will never know the difference.

- Requires 2 x AA batteries
- Mounting hardware included
- UV Stabilised

## Dummy Camera with LED Spotlights

This dummy camera looks just like a security camera but features a motion activated alarm and bright spotlight to deter intruders. The built-in 120° movement sensor can detect movement up to 6m away, and be set to either spotlight only, alarm only or both. This is great for safely lighting the way to your front door when you return home at night. The internal 120dB siren is quite loud and sure to draw attention and hopefully send the intruder running. Being battery powered means you can install it in a location where mains power is not available. Other features include a dusk sensor that enables the light and siren to work only at night, and the remote control includes a panic button.

### Camera Detector

Protect your privacy! Covert cameras and listening devices are nearly impossible to spot with the naked eye. This handy little unit will detect hidden wired and wireless cameras through the units lens finder. The 6 pulsing LEDs reveals the location of a camera by illuminating its lens when you look through the lens viewer. Also features a built-in wireless RF detector that provides audible (buzzer) and visual (LED) signal strength indication. Great for detecting wireless transmitters and eavesdropping devices. It even comes with a set of earphones for complete discrete bug detection.

## DOOR & DRIVEWAY BEAMS

### Indoor Commercial Grade Doorway Beam

The system consists of a send/receive unit which transmits an IR beam across the doorway onto a prismatic reflector mounted on the opposite side. The beam is reflected back to the receiver to complete the circuit. When a person walks through the beam, the circuit is interrupted and this causes the alarm to sound an audible warning. The warning buzzer can be mounted in any suitable location up to 10m away.

- Mains plugpack and mounting hardware included.
- Range 0.5 - 6 metres
- Power: 9VDC
- Adjustable alarm time and volume

**A lot of the spectacular video seen on the TV News comes these days from devices called Event Recorders. They can be attached to the windscreen of your car, in a shop (acting as a security camera) or even in a bushland setting to record animal or intruder activity. They offer quality pictures & draw very little power. They can be movement triggered or not. They have really changed the way we live in the world, as you never know when you are being electronically observed these days. Jaycar has a great range to suit every application & budget.**

## 1080p 2.5" DVR Event Car Cam with G-Sensor

Capable of recording in Full HD. The camera records video with audio onto a microSD card (not included) which can be played back to prove what really happened. Features G-Force sensor for automatic incident file separation recording, which is supported with a wide 170° camera angle. Powered by the supplied car cigarette adaptor, which also charges an internal Li-ion battery to keep the camera recording in case the power is disconnected during an accident.

## Uniden Dash View 30 2.5K Dual Band Wi-Fi Car Event Camera

In the first of the next generation series of smart dash cameras introduced by Uniden, the ultra-compact Dash View 30 features a 2.5K Video Resolution Front Camera providing a 140-degree wide angle lens. The addition of Sony™ Starvis Image Sensor provides back-illuminated pixel technology used in CMOS image sensors for optimum video quality and with WDR allowing you to capture clearer vision in bright and low light environments. This premium technology ensures the Dash View 30 deliver high video quality in visible-light and near infrared light regions.

The Dash View 30 features a supercapacitor, providing a longer battery lifespan and holding enough backup power to ensure any recording in progress is safely stored before the camera is powered off. With a larger range of operating temperatures than a traditional lithium-ion battery, the supercapacitor is ideal for users operating the Dash View 30 in areas with harsh Australian climate conditions.

What makes this Dash Cam so special is the Wi-Fi function (2.4GHz/5GHz), allowing you to directly transfer footage, preview and even record via your smartphone or tablet using the free Uniden app for the dash cam. This is a handy feature as you don't have to take the microSD card in and out to retrieve footage and it can be done while in the car after each event or journey.

The Speed & Red Light Camera Warnings are built into the Dash Cam alerting you while driving of upcoming fixed speed cameras and red light cameras to remind drivers to slow down.

Specifications	QV6004
Video Resolution	2.5K (2560 x 1440)
Lens Angle	140°
Storage	32GB
Car Charger Voltage Input	12VDC

Another handy feature of the Dash View 30 is the WDR function which balances the light on days of high contrast, or at night when lights are bright, giving you sharper footage and great clarity. The footage lock protection feature means the footage is safe and won't easily be deleted.

Included in the Dash View 30 is a hard wire kit to enable the Parking Mode feature. This is ideal in Shopping Centres and Parking Lots allowing you to record when your car is parked and the engine is switched off, the inbuilt sensor detects sudden vibration which will wake the hibernated Dash Cam and switch it on to start recording for a limited time.

With a sleek, high quality and a compact design the Dash View 30 is an excellent choice for Smart Dash Cams. With a brand with over 50 years of engineering excellence, the Uniden Dash Cam range is the obvious choice. Capture crisp and detailed video in bright and low-light road conditions with the release of Uniden state-of-the-art voice guidance Dash View 30 Smart Dash Cam.

Built using Japanese engineering technology and designed for Australian road conditions, the slim and stylish design can be discreetly positioned inside vehicles for a more luxurious in-car experience.

WIRELESS REVERSING CAMERA KITS CONTINUED**2.4GHz Digital Long Range Reversing Camera Kit**

Confidently manoeuvre your caravan, truck, 4WD or trailer and avoid unseen or unexpected obstacles when reversing with this wireless camera kit. The 4.3" colour display and camera features signal stabilisation and processing for high speed observation of up to 100m range as standard reversing cameras will not provide enough distance to reach a caravan, truck or trailer. Prior to travelling, securely affix the camera in place and plug the monitor into your vehicle's 12V auxiliary power outlet, then pair them to adjust the camera to the preferred angle. You can pair up to two cameras with an additional camera (QM3857) being placed on your car or 4WD and one on your caravan or trailer to have a dual camera display or be viewed individually. The camera features infrared night vision, adjustable angle and waterproof housing to ensure it will cope in the harshest weather conditions. Includes suction cup mount & cigarette lighter plug power for the monitor.

## WIRED REVERSING CAMERA KITS

### Ultimate Rear-View System - Wired

This unit enables you to monitor the area to the rear of a bus, truck, caravan, RV etc, view a much wider field-of-view than any rear view mirror array and works in the dark with IR lighting. The system comes with a 7" (diagonal) LED display that has two video inputs, so you could (for example) have another camera monitoring, say bus passengers (camera extra). The rear vision camera is fitted with a SHARP (Japan) CCD device with 18 x IR LEDs for night vision illumination. The housing of the camera is metal, IP65 and has a gymbal bracket. It can be mounted externally. The kit is supplied with 10m of preterminated connecting cable. A remote control for the monitor is also provided. In keeping with the professional status of the product, it will work from 12 or 24VDC. Camera measures 87 x 77 x 75mm

### 7" 1080p LCD Monitor Kit with Built-In 4Ch AHD Vehicle DVR + 2 x Wedge Style Vehicle Cameras

The heart of this system is a high quality 7" (diagonal) LCD screen full colour monitor with a Digital Video Recorder built-in. The screen ratio is 16:9 and has a 500:1 contrast ratio. This monitoring/surveillance system is ideal for a towed caravan, motor home or large boat, etc. It could even be adapted to a beach house, barn, workshop, etc. All that is required is a 12V supply if in a house, etc. As the monitor is configured to accept 4 x cameras in standard form, extra weatherproof cameras are available, or you can fit a dashboard forward facing dome camera which can also be mounted.

Supplied with the kit is the following:

- 7" monitor with sun visor and mounting bracket
- 2 x QC3542 1080p weatherproof cameras with IR illumination
- Monitor wiring harness and camera wiring harness (for up to 4 x cameras)
- 2 x 10m long camera extension cables (QM3743)

## GPS TRACKING DEVICES

**3G GPS/GSM Vehicle Tracker**

This 3G GSM and GPS Tracking solution will locate and track the whereabouts of your vehicle in real time via the Internet on a computer or Smartphone. The device is easy to install with only 2 - 4 wires to connect. Insert a 3G GSM SIM card (not included) and hide the device away while connecting the external antenna to your windscreen. It works by sending the vehicle's GPS coordinates via the GSM network to the free online tracking service, which shows the location on Google Maps. It can also SMS longitude and latitude coordinates to up to 3 mobile phones, as well as alerts when vehicle exits a pre-determined area or exceeds pre-set speed. Other features include an engine kill function to remotely disable the petrol pump, and movement sensor to extend battery life. An SOS/Panic button is also supplied which can send an SMS to the pre-programmed mobile phones. The built-in rechargeable Li-Po battery will keep the device functioning for up to 4 days when power is disconnected, which could help you locate the vehicle should it have been stolen and abandoned. There is no installation or on-going tracking charges. You only pay for the GSM SIM card and service. Supplied with an external antenna, wiring loom, SOS button and microphone

- Real time & history online tracking website
- Free Smartphone App available on iTunes® & Google Play
- SMS location & tracking return
- Remote engine immobilisation
- Geo fence alarm
- External microphone
- Over speed alarm
- Shock & movement alarm
- External SOS/Panic button
- Rechargeable battery

Please Note: This tracker is compatible with 4G SIM cards, however it only operates on a 3G band.

**3G GPS/GSM Personal Tracker**

Locate and track the whereabouts of a person, personal belonging or vehicle in real time via your mobile phone. The tracker is rechargeable and compact so it can fit unobtrusively inside a pocket, handbag, luggage, vehicle, etc. To operate, simply insert a GSM SIM card (not included), charge and turn on. It then sends it's GPS coordinates via the GSM network to your mobile phone which can be viewed on Google Maps.

Latitude, longitude, speed, direction, date & time, and battery condition or a GoogleMaps website link can be sent at any time by sending an SMS from your mobile phone to the tracker. You can also set it to SMS details once movement is detected, when the tracker is in a pre-determined area, over a preset speed, or when the battery is getting low.

A microphone and speaker in the tracker also allows you to dial in to listen to sounds around the tracker, and one of two phones can be called from the tracker for two way communication. To top off the rich list of features is a SOS button that sends help information to up to three pre-set phone numbers. A USB cable and mains power adaptor is supplied to recharge the built-in rechargeable Li-ion battery, which will keep the tracker functioning for up to 3 days on standby.

## CAR DISPLAYS

### LCD GPS Speedometer

More accurate than mechanical speedometers, the GPS speedometer works independently of the vehicle so it is not subject to factors such as tyre pressure, circumference, diff ratio, etc. This wireless unit is also safer to use on the road as the big LCD display can be mounted on the windshield and allows you to check speed without having to take your eyes off the road. You can also take this anywhere, use it on your boat, ATV or bike. Supplied with suction mount holder, USB cable and cigarette lighter charger.

- Selectable mph or km/h
- 2" Large digit display
- Rechargeable via USB, 5V/500mA

### GPS 5.5" Head-Up Display

This is the big brother of heads up displays. It features all the standard features such as current speed in km/h or mp/h, as well as a compass. However, it also provides a tripmeter (distance travelled) and driving time, which can be extremely useful.

The large 5.5" display ensures all information is large, clear, and easily read. Additional information is also provided such as current altitude and the number of satellites currently in range for precision. It's a fantastic unit, and a great safety addition to your vehicle to ensure you keep your eyes on the road.

- Very large 5.5" display
- Easy install, plug and play
- Altimeter and tripmeter functionality

### GPS Speedometer Head-Up Display with OBD-II Data

At the touch of the built-in scroll button, you can switch between GPS and OBD-II modes. In GPS mode, the display will show your speed, battery voltage, and the number of connected satellites. Switch over to OBD-II mode to display speed, engine RPM, water temperature, battery voltage, and distance travelled. The main unit has a glare hood and features auto dimming for night time operation. While the OBD-II mode is limited for use in 12V vehicles only, it will happily operate in GPS mode in 24V vehicles.

## 40 Years of IT & Communications

For many people, computing started in the '90s, or perhaps even later. Computing entered a new era as the Internet became more common in households during the '90s as well. Wi-Fi made networking much simpler too.

For us however, we've been selling computers and related equipment for 40 years. Back in 1981, we carried a range of Microbee computers amongst others. Early '80s hardware had less computing power than you'd find in a Bluetooth speaker in 2021. Many of us could see how this technology would change our lives, and it certainly has.

### WI-FI SYSTEMS & RANGE EXTENDERS

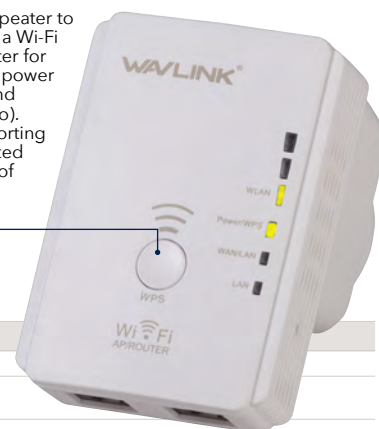

#### N300 Wi-Fi Range Extender

This intelligent Wi-Fi device can handle it all. Use it as a repeater to extend the range of your existing Wi-Fi network, provides a Wi-Fi access point for your wired network, or even acts as a router for your existing modem. It connects straight into your mains power outlet for no fuss installation, and configuration is quick and painless (with ultra-simple WPS connectivity supported too). Suitable for 802.11b/g/n standards up to 300Mbps, supporting modern standards for security too. It also features integrated status LEDs for signal strength, as well as quick reference of network status.

Repeater, Access Point or Router modes

Specifications	YN8370
Interface	2 x 10/100 LAN Port
Operating Modes	Repeater, Access Point, Router
Power	240VAC
Antennas	2 x 2dBi Internal
Wireless Standards	IEEE 802.11n/g/b
Frequency Range	2.4GHz
Signal Rate	11n: Up to 300Mbps, 11g: Up to 54Mbps, 11b: Up to 11Mbps
Wireless Security	64/128/152-bit WEP/WPA/WPA2/WPA-PSK/WPA2-PSK

#### TP-Link N300 Wi-Fi Range Extender TL-WA855RE

Boost your existing Wi-Fi coverage or create a new Wi-Fi access point to deliver fast and reliable connectivity with two external antennas. Also works as a repeater to eliminate poor signals by expanding your router's network coverage to the primary "dead zones". The Intelligent LED indicator provides a simple, colour-coded indication, allowing you to position the device in the optimum location.

- Supports AP mode which creates a new Wi-Fi Access point
- Easily expand wireless coverage at a push of the Range Extender button
- Set the Power Schedule for the range extender for power-saving
- Works with Any Wi-Fi Router

**Wi-Fi Mesh Network AC1200 Base + Satellite Kit**

Provide seamless Wi-Fi in your entire home with this Mesh Wi-Fi system. As you move about your house with your Smartphone, laptop, and other portable Wi-Fi devices the mesh system will automatically connect you to the best possible signal to ensure the fastest speeds, all the time. The kit is provided with 1 x Mesh Router and 1 x Satellite module for a coverage area up to 260 square metres. Additional Satellite modules are sold separately for larger homes or for homes with a structure that reduces the transmission range. Includes all of the modern features you would expect, such as touch link function, simultaneous 5G, and 2.4G connections, and up to 1Gbps speeds.

- AC1200 Communication
- Can be expanded with additional satellite modules
- Complies with IEEE 802.11ac/a/n/g/b standards
- Simultaneous 5G 867Mbps and 2.4G 300Mbps connections for 1167Mbps of total available bandwidth
- 4 x Internal antennas provide omnidirectional stable signal and superior wireless coverage
- Provides 10/100/1000Mbps Auto-Negotiation Ethernet WAN/LAN ports
- Supports by PPPoE, Dynamic IP, static IP and WISP access to the Internet
- Built-in DHCP server with automatic dynamic IP address distribution
- Supports touch link function, easy to share Wi-Fi with your devices

## MODEM ROUTERS

### N300 Wireless Broadband Router

Sharing your internet connection and networking your computers is made easy. It provides powerful 300Mbps wireless connectivity, as well as four wired ethernet ports. Dual antennas help boost signal strength and reduce dead-spots, while WPS provides hassle-free connection. The WAN port provides PPPoE, Dynamic and Static IP broadband support functions. It's also NBN compatible to provide smooth streaming of your favourite content. Easy to setup and configure, but still provides some advanced firewall configurations too, this is a great compact unit for the home or small office.

### AC1200 Smart Wi-Fi Router

Featuring the latest 802.11ac wireless standards for solid streaming, fast gaming, and interrupt-free networking. A stunning aesthetic design meets core functionality with the use of four 5dBi high performance antennas (two for each band), for better connectivity and greater range. It also provides a USB port for centralised storage and network sharing of data. Management is simplified with the use of a Smart App, so you can manage your network anytime. Dual 2.4G and 5G frequencies to support the latest high speed devices without forgetting about legacy devices either. Two 10/100 LAN ports are also provided for wired connectivity or expansion to another network switch. It provides a WAN interface with PPPoE and most other broadband protocols, so it's suitable for NBN connections too.

### AC2100 Dual-Band Smart Wi-Fi Router with Touchlink and Giga LAN

Wi-Fi speeds of up to 2100Mbps will keep the signal flowing to your network so you can enjoy exceptionally smooth gameplay and uninterrupted streaming. The 2.4GHz/5GHz dual-band mode avoids signal congestion to enhance the ability to switch between two bands for a good signal anywhere at home. Six omnidirectional smart antennas will ensure your signal can be reached under circumstances a regular router would otherwise not cope with due to signal congestion.

- Transmit data to multiple client devices simultaneously
- Five Gigabit Ethernet ports
- 10X faster than conventional fast ethernet
- Parental control options

## AC600 USB Dual Band Wireless Network Adaptor

This is an ultra compact Wi-Fi dongle, ideal for notebook computers being moved around and where a larger dongle may be easily knocked and damaged. While many devices now have built-in Wi-Fi, there are many of us with hardware not Wi-Fi equipped, or specialised equipment which doesn't include it either. Dual band connection offers fast and stable access to just about any Wi-Fi signal, and is compatible with Windows and Mac systems.

- Dual band 2.4GHz and 5GHz
- Up to 433Mbps data rate

Specifications	YN8334
Wireless Standards	IEEE 802.11a/n/g/b
Frequency Range	2.4GHz & 5GHz

## USB 3.0 to Gigabit Ethernet Converter

Modern Apple® MacBook® and Ultrabooks™ aren't able to connect to the internet using a LAN cable, as there is no LAN port provided. This converter provides a solution by converting a USB port to a ethernet port. With the combination of USB 3.0 and Gigabit ethernet, it maximises the data transfer speed. Plug and play installation, backward compatible with USB 2.0, and supports suspend mode and remote wake up via links and magic packs. It will also handle jumbo packets up to 9kB, and the MDIX feature automatically detects straight or cross network cables.

## NETWORKING ACCESSORIES

### USB Network Adaptor with 3 Port Hub

For ultrabooks, Macbook Air® and Tablets where USB ports are sparse or RJ-45 network ports are nonexistent. Simply connect a network cable to this device and you have a 10/100Mbps network adaptor. It also serves as a 3 port hub to connect peripherals such as a mouse, webcam, and keyboard. USB 2.0 and USB Type-C versions available to suit your requirements.

- Compatibility: Windows 10, 8.1, 8, 7, Vista, XP, 2000, Mac OS® X 10.0+, Linux

### 10/100/1000Mbps Ethernet Switches

These switches provide ultra-fast Ethernet connectivity at gigabit speeds. Use them to provide additional ports to an internet router, firewall, or a standalone network. All ports are gigabit (1000Mbps) and are backward compatible with 10/100 interfaces too. Plug and play with automatic cable detection to make it easy to install, even for beginners. Mains power supply included.

### Gigabit PoE Injector

Most conventional ethernet switches do not natively support PoE. This device adds the power inline to a single network cable, working up to 100m, so you don't need mains power down the line at the device. It supports up to gigabit network throughput for ultra-fast connectivity, and is PoE IEEE 802.3at compliant.

Specifications	YN8040

### 5 Port 10/100Mbps PoE Ethernet Switch

Reduces the need for mains power at each IP camera location, for instance, powering them from a central supply. Suitable for use up to 100m, it provides up to 30W per PoE port.

Specifications	YN8074
Ports	1 x 10/100 RJ45, 4 x 10/100 RJ45 High Power PoE
PoE Port Power	30W (per port) 65W combined
Backplane Bandwidth	1.6Gbps (non-blocking)
Max PoE Distance	100m
Network Protocols And Standards	IEEE 802.3i 10BASET, IEEE 802.3u 100BASETX, IEEE 802.3x Flow Control, IEEE 802.3af DTE Power via MDI IEEE 802.3at

### 10 Port Gigabit PoE Ethernet Switch

This is a powerful gigabit switch with 8 x PoE-enabled and 2 x standard gigabit ports. It can deliver up to 130W of power (max 30W to a single port), which is loads of power for just about any PoE-enabled device you may have. Ultra-fast gigabit network also enables fast data transfer, critical for high resolution IP cameras and data-intensive systems, and is also very useful for providing PoE to access points and switches which are also distributing the connection. Automatic PoE detection, fully compatible with non-PoE devices. Includes mains power adaptor and mounting bracket.

Specifications	YN8049
Ports:	8 x PoE (RJ45), 2 x Uplink (RJ45)
Power Output:	30W Per Port (Max) 15.4W Per Port (Across 8 Ports) 130W (Total)
PoE Standards:	IEEE 802.3at, IEEE 802.3af
Network Speed:	10/100/1000Mbps

## ANTENNAS AND ADAPTORS

## 2.4GHz Wireless Networking Antennas

Want to get a longer range in your wireless network? Here's a quick and inexpensive way to improve the range at either your base station or terminal. These antennas are specifically designed for 2.4GHz applications and 802.11 wireless networking is an ideal application. This rubber antenna is a dipole design and features a detachable base. Supplied with a 1.5 metre lead terminated to a reverse SMA connector. Both models supplied with a detachable magnetic base. See our adaptors section for conversions if needed.

## WIRED NETWORK ACCESSORIES &amp; TESTERS

## 2-in-1 Network Cable Tester &amp; DMM

Ideal for network installers or technicians and will allow the user to easily check cable integrity or measure AC & DC voltage, current, resistance, and continuity etc. without needing to carry two separate devices. The unit will check for cable continuity, open-circuits, short-circuits, and cross-connections etc. A remote terminator is included and enables the user to check network cables at a wall jack or patch panel. Supplied with loop back cable, LAN terminator, and multimeter leads.

## LAN Tester:

- LAN tester checks faults
- Mis-wired conductors
- Manual or automatic testing

## DMM Specifications:

- 600V max input
- 200mA AC/DC
- 20MΩ resistance
- 3.5 digit
- Diode test
- Data hold
- Max hold

## Mini Network Cable Tester with PoE Finder

Tests UTP/STP/Coaxial/Modular network cables by manually or automatically detecting missing or disordered wiring, and open or short circuits. It can quickly read the correct pin configuration of 10Base-T cable, 10Base-2 cable, RJ45/RJ11 modular cables, 258A, TIA-568A/568B and Token Ring cable etc. by comparing one transmitting end to the corresponding receiving end. Supplied in a plastic case and with a PoE (Power-over-Ethernet) Finder that indicates if the network port or cable has power.

### Package Contents:

- 1 x Main tester unit with terminator
- 1 x PoE finder
- 2 x BNC adaptor cables
- 1 x BNC male/male adaptor
- 3 x RJ45 to RJ11 adaptors

### Specifications:

- 9V battery required (use Cat. SB2423)

## 4P/6P/8P/ Modular Crimp Tool with Network/PoE Tester

Designed for a wide range of residential structured wiring, and professional applications. After crimping a modular connector, it enables you to quickly and easily test ethernet twisted pair cable located on the handle of the tool for wiring continuity, opens, shorts, and mis-wires. With a single press on the TEST button, it will test the cable and gives the result of pin to pin configuration of the cables. Can also clip out of the housing and can be used as a general network tester. The tool is steel framed with PVC handles and rust resistant black oxide finish. Includes a PoE (Power-over-Ethernet) finder to check if a voltage is present on a port or cable you are testing. Supplied with a carry pouch that can directly worn on your belt.

- Testing for both UTP and STP cable
- Testing cable for continuity, opens, shorts, mis-wires
- Pin to pin indication
- Single and multi-wired cable crimping
- Integrated cable stripper and cutter
- Crimping tool and cable tester in one
- Detachable cable tester

## Network Cable Tracer

This tone generator is a highly practical network installation and troubleshooting tool which features a single/multi tone signal, test leads and a 4 conductor modular cable. The signal emitted by the tone generator can be easily traced by the companion probe, even when cables are in a bundle or hidden in punch down blocks or wall plates. The generator can also be used for checking telephone line polarity and status ie. Ring/Busy/Idle. The probe is equipped with an insulated inductive pick up and will amplify the tone signal to an audible level. A LED is also included as a visual indicator. The probe has a volume control and either indicator can be switched off if desired.

- The signal leads are 185mm long & terminated with alligator clips
- The modular lead is 250mm long & terminated a 4 pin RJ12 plug
- The probe is 205mm long and approximately 35(H) x 35(D)mm
- Both units operate from a 9 volt batteries (sold separately)  
Use our Cat. SB2423

shown on this page

### 19" Rack Mount Cabinets

Ideal for studios, PA, sound reinforcement, IT, or phone system installs, with a size and configuration to suit any application. Coupled with our wide range of accessories and options, these 19" rack cabinets offer outstanding features. All come in 1.8mm solid steel powder coated cabinets with clear tempered glass doors. The sides can be removed for installation or maintenance access and all panels are key-lockable.

- High strength and rigidity under load
- Lift off side panels
- Top or bottom cable entry
- Cooling fan hole
- Camlock closures
- Front, sides and back lock separately
- Wall mount without brackets
- Static loading capacity 60kg

### Pro Grade 19" Rack Style Equipment Enclosures

Complies with IEC 297 / EIA RS-310 C-1977 / DIN 41494 standards. Each cabinet is made from phosphated steel and coated with a dark grey enamel. The colour matched rack front panel is in 3mm aluminium with extruded handles (excluding 1U). The rear panel is aluminium as well. The top, bottom and sides of each cabinet are liberally punched with ventilation holes. All screw fasteners are metal thread - not self tappers. Top, bottom, front and rear of enclosure can be separately removed without affecting the integrity of the cabinet. Each enclosure comes with punched internal rail bars to facilitate PCB, transformer, filter capacitor etc, mounting independent of cover panels. Each cabinet also features an internal sub panel (in 1.5mm enamelled aluminium) which is adjustable from 0-20mm from the back of the front panel. This panel is ideal for mounting panel hardware (no screws need appear on front panel). Rear panel is also adjustable 0-20mm inwards.

- The entire cabinet is packed flat for convenient transport.
- Rubber mounting feet are provided

### Dual PC USB Keyboard/Mouse Switch

This USB switch box enables you to share up to four USB devices between two computers. At the touch of a button, connect either computer to a keyboard, mouse, portable hard drive, scanner, printer, or any other USB accessory. This saves you the added expense of additional USB peripherals, and helps de-clutter your desk at the same time. It is USB 3.0 compliant, supports speeds up to 5Gbps, works on most operating systems, and is backwards compatible with USB 2.0 and USB 1.1 devices. It is plug-and-play, so no drivers are needed, and it can operate without any external power, however, a micro USB port is provided for optional power should you need it (power supply not included).

- 4 Inputs
- Up to 5Gbps
- Manually Switch Between PCs
- USB 3.0
- Plug and Play

### 2-Port USB KVM Switch

Share your keyboard, monitor, mouse, and USB devices between two different computers. It features a physical pushbutton switch, as well as hotkey switching support. High resolution 2048 x 1536 display support ensures you're not limited to low-grade monitors either. Power is supplied by the USB ports - no power supply needed. Plug and play operation with no drivers required.

## CONVERTERS & ADAPTORS

### RS-232 DB9 to USB Converter

Connect a variety of legacy RS-232 devices to your modern computer with this simple adaptor.

- USB 1.1 compliant / Speed: Over 250kbps
- Remote wake-up and power management
- Compatibility: Windows 10, 8.1, 8, 7, Vista, XP, Mac OS® 9.0+, Linux

### USB Port to RS-485/422 Converter

The days of on-board communication ports other than USB are virtually just a memory now, but they're still very common. RS-485/422 is commonly found in thermal printers (e.g. point of sale), modem communications, and more. This converter provides that connection from your modern USB port with great reliability.

Specifications	XC4136
Baud Rate	300bps-921kbps
Standards	TIA/EIA RS-485/RS-422
Supports	Windows XP/Vista/7/8/8.1/10 (32/64-bit)/Linux/Mac® OS

### USB to Parallel Bi-Directional Cable

This handy device replicates the old 25 pin printer socket and lets you use your legacy devices just like you would with a normal printer port. The USB interface provides up to 12Mbps data throughput, so printing is significantly faster compared with standard a parallel port (150kbps) connection.

- USB Printer Class 1.0 compliant
- IEEE1284 1994 (Bi-directional parallel interface)
- USB 1.1 Compliant A type male plug
- Windows 10, 8.1, 8, 7, Vista, XP

### 2 Way DisplayPort Switcher

With the flick of a switch this product allows you to select from one of two DisplayPort sources to output to a single computer monitor, TV or projector. Suitable for when you want the flexibility of switching between two audio visual sources for the one display device. DisplayPort can be used to transmit audio and video simultaneously, but each one is optional and can be transmitted without the other. HDMI and DVI output achievable with use of a passive adaptor or Mini DisplayPort with the use of an additional converter cable. Typically suited for small-scale use in the home, office, shop fronts or classrooms where two sources need to be switched. Compliant with VESA DisplayPort standard link rates of 1.62, 2.7 and 5.4Gbps. Switching is operated manually on the front of the unit. Includes a mains power adaptor.

## Tech talk

### M.2 Modules

M.2 modules come in a variety of physical sizes. These sizes determine what type of M.2 card you have.

M.2 shouldn't be confused as the overall term for Solid State Drives (SSD), as the term M.2 is the actual name of the form factor. Not all M.2 modules are just used for solid state memory, but can also be used for Wi-Fi, Bluetooth\* and other applications. The most common types of M.2 module is SSD (Solid State Drives). As, SSD board sizes are standardised since the release of M.2 in 2012, choosing an M.2 SSD for your requirements is as simple as deciding on the size, speed, hardware compatibility and your budget.

#### PHYSICAL SIZE

Generally, most common M.2 SSDs are 22 millimetres wide and come in 42mm, 60mm or 80mm lengths; although non consumer level cards can vary in length. The card size is identified by a four or five-digit number. The first two digits specify the width and the remaining numbers is the length. For example, a "2260" card is 22 mm wide and 60 mm long. Longer M.2 drives usually hold more NAND chips for extra capacity. Sizes can include:

- 2242: 22 mm x 42 mm
- 2260: 22 mm x 60 mm
- 2280: 22 mm x 80 mm
- 2230: 22 mm x 30 mm
- 22110: 22 mm x 110 mm

Remember the number and size of the NAND chips used will determine the storage capacity of the M.2 SSD. However, to make things easier, most M.2 SSDs will specify the storage size. This can be from Gigabytes to Terrabytes.

#### SATA OR NVME

M.2 SSDs utilise two existing data transfer interfaces - SATA and NVMe (PCIe). SATA is the most common interfaces used in consumer, enterprise and industrial systems. Modern hardware using 3rd generation SATA can transfer data (bandwidth) up to speeds of 6 Gigabytes a second (Gb/s).

NVMe uses existing PCIe technology, which has a faster bandwidth than SATA. Depending on your hardware and the type of M.2 SSD NVMe module you use, "theoretical" data transfer speeds can range between 15.75 Gb/s to 31.5Gb/s - though in reality, 10 Gb/s to 20Gb/s is more common.

From a price point of view, SATA M.2 SSD's tend to be cheaper than the faster NVMe alternative due to its slower speed.

#### SOCKET KEYS

M.2 use different types of "keyed" modules. These "keys" are basically tabs on the edge connector that prevent you from inserting an unsupported module into an incompatible M.2 socket. The type of socket you have on your hardware will determine the type of M.2 SSD you can use.

Prior to purchasing an M.2 SSD, make sure you read your host hardware documentation to determine the right module you should buy.

The three types of keys are B, M and B+M. These specifications should be printed on the M.2 SSD packaging.

A 'B' keying gives PCI Express SSDs up to 2x lanes of bandwidth (data transfer speed), while a 'M' keying provides PCI Express SSDs with up to 4x lanes of bandwidth.

Even with 2x lanes of bandwidth, a 'B' keyed M.2 SSD still gives up to 10Gbit/s performance, whereas the 4x lanes on 'M' gives up to 20Gbit/s. M.2 SSDs with B+M keying maximise compatibility in both slots, and will operate with 2x lanes of bandwidth.

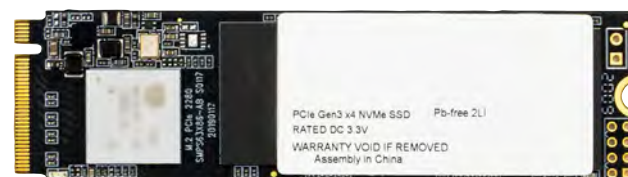

#### WHICH ONE TO BUY?

Ultimately, the type of M.2 SSD you decide to purchase will be determined by your existing host hardware. The storage size will be determined by your storage needs and the speed will be determined by what you will be using it for. At the end of the day it comes down to your budget.

### M.2 SSD

#### M.2-2280 NVMe/PCIe SSD

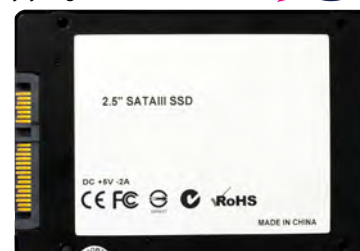

Whether you're at work, at home gaming, or on the go, ordinary bootup and read/write speeds can frustrate your best laid plans. Those days are now long gone thanks to M.2 NVMe Solid State Drives (SSD), booting and file transfers really flies. The ample storage and performance are accelerated by the latest NVMe™ technology, and being a SSD it gives you the speed and dependability you need.

#### 2.5" SATA3 SSD HDD

These 2.5" SATA Solid State Drives (SSD) are a fast and reliable replacement for slow-performing HDDs. Available in either 256GB or 512GB storage capacity, you get fast read and write speeds up to 565 MB/s, a SATA III 6.0Gbps interface and a compact 2.5" form factor to compatible with most installations.

### SSD HARD DRIVES

#### Portable SSD with USB 3.2 Type-C

Taking portable data storage to a whole new level, this super compact portable hard drive measures a mere 66mm x 46mm, making it not much bigger than a matchbox. Although small, you can still store up to 1TB of data with super-fast transfer speeds up to 473MB/s via the USB Type-C port. Use it as a backup or expansion drive, or a great way to carry large files around with you. Sleek all metal finish, no external power supply needed.

## M.2 SATA/NVME SSD CASES

## USB Type-C External M.2 SATA/NVME SSD Case

Designed to fit an M.2 NVMe or SATA SSD drive and small enough to fit in your pocket or laptop bag. The USB3.1 Gen2 port provides ultra high speeds up to 10Gbps so you can transfer or backup large data files or 4K videos in seconds. Backward compatibility means it will also work with USB3.1 Gen 1 and USB 3.0 at respective speed limits. The 5min auto-sleep mode reduces power consumption, heat, and prolongs the life of your SSD. Fully bus powered and no drivers are required. Supplied with a USB-C male-to-male lead.

- Ultra high speeds up to 10Gbps (NVMe) or 6Gbps (SATA)
- Easy setup, no screws needed
- Auto sleep mode

## 13-in-1 Multifunction USB Type-C Dock with M.2 SATA/NVME, 2 x HDMI, DisplayPort, Network, USB Ports and USB Type-C with Power Delivery

This feature rich USB-C docking station also has storage capability. Simply install a M.2 NVMe or SATA SSD\* into the enclosure and you will be able to quickly and easily backup your data, images, or video files to and from your laptop, Smartphone, or Tablet. The triple display video outputs enable you to connect to three displays simultaneously on supported systems, and multiple USB ports provide connections for a computer mouse, keyboard, thumb drive and other USB devices. Other features include an RJ45 Gigabit Ethernet port, Power Delivery 3.0 USB-C port, 3.5mm audio port with microphone support, and a Gen1 (5Gbps) high speed USB port. All housed in a stylish aluminium enclosure.

- Multiple high-speed USB-A and USB-C ports
- Supports Windows MST and macOS\* SST

Tech talk

## ADSL &amp; VDSL

ADSL stands for Asymmetric Digital Subscriber Line.

It is a technology that allows data to be sent at high speeds across copper phone lines rather than conventional voice-band modems. ADSL2+ provides double the downstream rate compared to ADSL, from 12Mbps to 24Mbps. Data speed is dependent on the distance between the user's modem to the DSLAM (Digital Subscriber Line Access Multiplexer), usually located at the local telecom exchange. VDSL stands for Very-high-bit-rate Digital Subscriber Line, which provides a faster data transmission than ADSL. VDSL is able to support applications like HDTV and VOIP (Voice over IP), and able to downstream data up to 100Mbps (or 300Mbps using VDSL VPlus).

### 1W UHF Transceiver

Features include VOX hands-free operation, 155 group CTCSS/DCS sub-channels to reduce interference from other users on the same channel, 9 level squelch, scan/monitor, integrated LED torch, and voice encryption (scrambler) for private conversations. The built-in rechargeable Li-ion battery can be charged from any USB power source. A battery save function helps conserve battery power, along with a selectable low power setting (500mW) for local communications (such as around the campsite.). A mains power adaptor is included with dual USB output to charge a second transceiver or other USB gadgets at the same time.

- 155 Group CTCSS/DCS Private Code (Sub-Channel)
- iVOX/VOX Hands-free Operation
- LED Torch
- Rechargeable High Capacity Li-ion battery
- Voice Encryption (Scrambler)
- Battery Save function/Low Power Alert
- High/Low Power Selectable (1W/0.5W)
- Squelch Level (1-9)

### 2W UHF Transceiver

An advanced 80 channel UHF transceiver for professional or recreational use. Compact in appearance but feature packed with a VOX hands-free function, CTCSS & DCS, PTT IT transmit, a group call mode, emergency alarm, selectable 25kHz wideband or 12.5kHz narrow band, and much more. An LED at the top helps shine the way at night, and an FM radio is also integrated so you can listen to important broadcasts or for entertainment purposes. A feature not seen in many other models is the Stun, Kill and Revive function. This enables you to use a second similar transceiver to send a signal that prevents unauthorised use of a lost or misplaced transceiver. The high capacity 1300mAh Li-ion battery can last up to 13 hours of average use, and a lower power mode helps extend battery life when long range communication isn't required. A mains powered charging cradle is supplied to keep the battery charged.

- Squelch Function
- Emergency Alarm
- Built-in FM radio
- Key Pad Lock
- High/Low Power Selectable
- Voice prompt
- LED Torch

## Glass Mount UHF Car Antennas

These antennas enable you to use a UHF CB in, say, a luxury 4WD/RV without the need for an external whip antenna. The antenna fixes to a glass window surface INSIDE the car for complete security. It is not a thru-glass unit like old car phone antennas, but is extremely compact and will stick to an obscure window if necessary. Installation takes minutes. Supplied with 1m of pre-terminated cable with a PL259 plug and full instructions.

- Covert On-Glass Mounting
- Pre-tuned to 477MHz
- High quality low loss coaxial cable
- Terminated with FME connector for easy installation
- Inconspicuous design

## 1.1m 6.6dBi Gain UHF Car Heavy Duty Antenna Mount Kit

This is for semi-serious off-road driving. It is meant to be bull-bar mounted. It features a medium coil spring base coupled to a very strong fibreglass whip mast that is actually 30mm (1 & 1/4") diameter where it connects to the spring base. The entire antenna is over 1.1m (3.5 feet) long. Even at its top it is still 20mm diameter! This is the sort of whip antenna that will not be broken by bush saplings, or other heavy undergrowth. It comes with 4.5 metres of RG58 commercial grade coax and a screw-demountable UHF PL259 plug. You can remove the plug to feed the cable through narrow openings, holes, etc and reassemble at the back of the rig later. Many professional bull-bars will have a horizontal mounting plate and the base of this unit will go straight on via a 1/2" (13mm) hole. Or you can use a heavy duty mounting bracket such as the DC3077 stainless steel unit.

## Universal Bullbar Mounting Brackets

These brackets are designed to mount driving lights, spotlights, UHF antennas and other various applications to a tube frame (such as a bull-bar). Allows for much easier attachment to bull-bars, trailer railing, ute roll-bars or even a roof rack. Stainless steel construction with shockproof rubber insulation so your tube frame isn't scratched or dented.

Ideal for use with 12VDC LED lights.

- Can be adapted to mount driving lights
- 3 sizes available to fit various diameter frames:

## VHF ANTENNA

### 475mm Stainless Steel VHF Marine Antenna

This 1/4 wave marine antenna is made from high-grade stainless steel and works best with a ground plane such as the centre of a metal roof. Stainless Steel antennas are generally capable of handling abusive environments and have a longer lifespan compared to braided fibreglass whips, although they do have a slightly reduced electrical performance. It is fitted with a standard 27TPI threaded ferrule for easy mounting to a standard base.

## VHF TRANSCEIVERS

## 2.5W VHF Marine Transceiver

Not only just waterproof, this product is completely submersible. It also floats. It is the ideal handheld transceiver for really wet outdoor activities, such as jet skiing, open tinnies etc. you can select output power between 1 and 2.5 watts to conserve batteries when in continuous use. It automatically monitors CH16 and while you are monitoring a selected channel. Fantastic!

- Digital squelch - 3 levels
- Battery level indicator
- Table-top drop in charger included
- Backlit LCD display
- Auto battery save
- Keypad lock
- Memory scan, scan programmed channels

## 5W GME Handheld VHF Marine Transceiver Radio with Flash &amp; Float GX800W

Built tough to withstand the harsh marine environment, GME's GX800 handheld VHF radio delivers crystal clear communication in a flexible format. Waterproof to IP67, if this high performance radio is accidentally dropped overboard, it will not only float, but the LCD will flash brightly, ensuring easy location and retrieval.

Reduce battery consumption by selecting the low power setting when using the radio at close range, ideal for communications between the mother ship and tender, or at full 5W power for communicating over longer distances. Clear and easy to read LCD screen, even in difficult lighting conditions.

Program the way in which your GX800 scans channels to suit your activity. Dual and Tri Watch enable you to monitor a working or club channel while still being able to receive important broadcasts on Channel 16.

- Float and Flash
- Priority Scan
- Waterproof to IP67
- Dual and Tri Watch
- 5/1 watt Switchable Power
- All International, US and Canadian Marine VHF Channels
- Large, Bright LCD Screen
- Weather channels on US and Canadian bands
- Private Channel Facility
- Integrated Rechargeable 1,700 mAh Lithium Polymer Battery
- Programmable Scan

## VHF Marine Radio

The VHF Marine Radio band (156 - 174MHz) has been allocated internationally for the exclusive use of two-way radio equipment with fixed technical standards for marine use. Theoretically, you can buy a VHF marine transceiver in Country A and it will work in any other country. The reality, however, is slightly different.

There are 56 channels allocated across the radio spectrum for Australia, and the main emergency channel, channel 16, is the same all over the world! There is a secondary distress channel, channel 67 and it is also universal.

When you operate a VHF Marine transceiver you monitor Ch. 16 (in case someone makes a distress call) and you can actually use that channel to call a colleague to contact them on the water.

Once you have made contact, you immediately switch to another channel to keep Ch. 16 clear for possible emergency use.

It is wise to confer with your colleague before going out to agree on the alternative channel, say Ch. 10. Then you don't have to broadcast what that channel is to discourage people from snooping in on your conversation.

The non-emergency channel allocations may have local specific uses (such as harbour management, etc.) and this info appears in the manual that comes with the equipment when you buy it, if you buy it in AUS/NZ.

## RANGE:

For most amateur boating operations you should get plenty of range with VHF marine. A good fixed installation (not handheld units) should give you 25km line-of-sight. Conditions vary enormously at sea, so don't depend on this. Most of the time someone will hear you and you can relay messages if necessary. Volunteer coastal stations monitor Ch. 16 generally 24 hours a day.

## PRIVACY:

Remember your first conversations can be heard by anyone on Ch. 16. Depending on how sophisticated your VHF unit is, you can configure it to have a private conversation with a colleague who has similarly equipment set on a non-emergency channel. One of the best features of VHF Marine use is that you do not have to be aware of actual frequencies. You can then think just in terms of channel numbers. Setting up when you go out. If you like, you can go straight to your nominated channel and bypass Ch. 16 as much as possible. You can arrange 'skeds' (i.e. schedules) to monitor, say Ch. 10, at 15 minute intervals, quarter to the hour, on the hour, a quarter past and half past for 2 - 3 minutes and then the rest of the time on Ch. 16. Happy boating!

EPIRBs

MT600 Australian Marine EPIRB

GME's digital Emergency Position Indicating Radio Beacons (EPIRBs) have lead to hundreds of successful rescues in Australia and around the world. With over 35 years of experience in engineering and manufacturing EPIRBs in Australia, GME is at the forefront in development of life saving safety equipment. The MT600 builds on this heritage, delivering next generation performance to commercial and recreational mariners alike. Compact and lightweight, the MT600 is easy to install on any vessel utilising the specially designed quick release mounting bracket. The MT600 features zero warm-up digital technology and an automatically deployed antenna. Testing the MT600 is fast and easy. Simply remove the beacon from its bracket, press the test button and the full functionality of the beacon is tested and confirmed. Certified by COSPAS SRSAT for worldwide usage, and boasting a 10 year battery life, the MT600 represents great value for peace of mind boating. Australian & New Zealand model only - Not for sale in the United States or Europe. New Zealand customers only - If purchased outside New Zealand, additional programming is required.

- Compact, lightweight, easy-to-mount design
- COSPAS-SARSAT CLASS 2 (C/S T.001)
- Meets or exceeds the applicable requirements of: AS/NZ 4280.1:2003 standards C/S T.001/007
- 121.5MHz (25mW) VHF homing beacon to assist in guiding rescuers to your precise location
- Includes quick release mounting bracket
- Zero warm-up digital technology
- Antenna deploys automatically when the unit is removed from the bracket
- Ultra high performance solid state strobe

HAM RADIO HANDBOOK

Australian Ham Radio Handbook

The Australian Ham Radio Handbook will help you become a radio amateur, set up a station and make contacts on air. Written for Australian conditions it covers practical topics that existing licence study and theory books miss. For beginning and experienced hams alike, it's an ideal read for anyone interested in taking up, continuing in or returning to amateur radio. What's in the book? First there's a quick tour of what amateur radio can offer. That includes things you can do right now, with no special equipment or licences required. Then it describes how to get your callsign and set up a station. Equipment and antennas are covered next. You'll find information on what items are necessary and where you can get it, whether you choose to buy new, buy used or build your own. Later you'll learn about what different radio frequencies do, the diverse activities hams enjoy and winning tips that will get you contacts almost any time you turn on. Near the end we cover things you can add to make your equipment more versatile, technical subinterests and how you can learn more. All up it's over 100 pages of solid information that deserves to be in any Australian amateur's shack.

VHF Radio - A History

When the Italian/British inventor Marconi developed wireless communications at the beginning of the last century, he envisioned radio apparatus to be so complicated that special experts had to be trained to operate it. Indeed, this was an accepted dictum and "The Marconi School of Wireless" was established in many countries to train people.

It was run in Australia by AWA and it was around for many, many years. As technology advanced, it was becoming obvious that you did not have to be a rocket scientist to operate a two-way type radio set. The American Motorola company (the inventor of the car radio) developed a two-way radio for the police. This innovation helped the police and soon other industries started clamouring for similar sets for their industries.

Taxi-cabs were an early adopter of two-way radio. This improved the productivity of the taxi service enormously. By the mid-to-late 60's two-way radios were being adopted for taxis, the fire brigade, police and other commercial users. Early marine two-way radio operated on the "short wave" or High Frequency Bands. It was complicated to use but had long range. You had to dial an actual frequency and the operation required some skills.

The sets were quite expensive. Riding on the back of the CB radio boom in the mid-70's came 27MHz marine radio. It was relatively simple to use, but had limited range and was plagued with interference. A VHF marine band was gazetted earlier but popularity was limited because sets were fairly expensive. Along came Japanese production technology from the CB boom and the price of VHF Marine radio equipment plummeted.

VHF Radios were refined, worked on FM which made them almost interference free, and used simple channel numbers rather than frequencies and only needed a minimum number of controls. And you did not need to be trained by the Marconi School of Wireless to operate them!

# Jaycar Resellers

Serving rural electronics enthusiasts.

Jaycar Authorised Resellers are privately owned businesses that resell an extensive range of products on a regular basis. Whilst these businesses endeavour to stock as broad a range as possible, they generally do not stock every product in the Jaycar range. They may, however, be happy to order specific goods in for you - subject to availability. As privately owned businesses, many in rural parts of Australia and New Zealand, our Authorised Resellers are subject to extra costs such as freight, and we therefore cannot guarantee they will have the same prices, trading conditions, or product specials as Jaycar retail stores. It's wise to check availability before you make a special trip into town. **For the most up-to-date list of Jaycar Authorised Resellers, visit our website.**
